

9 March 2006

GENERAL REASONS FOR THE DECISIONS ON THE ALLOCATION OF RIGHTS AND EFFORT IN THE TUNA POLE FISHERY

1. Introduction

After the allocation of medium-term rights in 2001/2002 and the finalisation of the appeals processes in 2002/2003 the Department of Environmental Affairs and Tourism: Branch Marine and Coastal Management (*the Department*) commenced with preparations for the allocation of long-term commercial fishing rights.

In January 2004, the Minister of Environmental Affairs and Tourism (*the Minister*) announced the commencement of the planning phase. The Minister called on the fishing industry and all other interested and affected parties to submit comment to the Department. A comment box was opened at MCM in which comments could be placed. In order to facilitate communication with the public and fishing communities, the Department developed a dedicated fisheries website (www.mcm-deat.gov.za); it established a customer services centre (0861 123 626) at its Cape Town head office and it further resourced each of the 29 fishery control offices along the coast.

In 2004, the Department also procured the services of project management specialists, specialist legal advisers, IT specialists, and a forensic auditing consortium to advise it on the long-term commercial fishing rights process. A Rights Allocation Unit was established in 2005 to co-ordinate and manage the long-term rights allocation process.

Earlier, during the latter half of 2003, rights were allocated to abalone divers for a period of ten years. In December 2004, another set of *long-term* commercial fishing rights were allocated in the large pelagic (tunas and swordfish) fishing industry. The Tuna Pole fishery is a different fishery to the large pelagics fishery. It was accordingly one of the remaining 20 commercial sectors. The allocation of long-term fishing rights in these sectors were scheduled for the last quarter of 2005.

This document is entitled the *General Reasons for the Decisions on the Allocation of Rights and Effort in the Tuna Pole fishery* and will be referred to as the *GPR*. The GPR sets out the criteria and weighting, the process and methodology and the policy reasons for the decisions on the allocation of rights

and effort in this sector. Applicants are therefore advised to carefully study the GPR before considering the assessment of their applications and the specific reasons for decisions taken.

Every applicant in this sector will receive the following documentation:

- A notification letter, informing the applicant of the delegated authority's decision, together with the reason for that decision;
- A copy of the GPR;
- Copies of the score sheet and assessment sheet used to evaluate the applicant;
- A copy of the decision-making lists of the delegated authority; and
- An appeal form, which must be submitted together with the appeal (if the applicant chooses to appeal against the decisions on the allocation of a right or effort).

The specific reason contained in the notification letter to unsuccessful applicants, together with the GPR, the score sheet and the assessment sheet, constitute the reasons for the decisions on the allocation of rights and effort in this fishery.

The approach of the Department's information officer to access to the score sheets and assessment sheets of other applicants, as well as the application forms and annexures of other applicants, is set out in the notification letter. The approach is:

☞ Assessment sheets and score sheets: Applicants may obtain copies of the assessment sheets and score sheets used to record the assessment of every application in the fishery from the Department's Customer Service Centre, 2nd Floor, Foretrust Building, Martin Hammerschlag Way, Foreshore, Cape Town (attention Mr Raymond Scott). These documents may be inspected free of charge, but standard rates would be charged for copies.

☞ Application forms and annexures: Appellants may request access to the applications of other applicants in this sector. The prescribed access to information form must be completed and submitted to the Department's Customer Service Centre, 2nd Floor, Foretrust Building, Martin Hammerschlag Way, Foreshore, Cape Town (attention Mr Raymond Scott). The prescribed access fee of R 35.00 must be submitted together with the application. Access will not be granted access to any information submitted in the confidential envelope by an applicant. Access will be granted on request to all other parts of an application (including the annexures) unless an applicant objects, in writing, to the release of specific parts of an application. Objections must be lodged at the Access to Information Centre, 2nd Floor, Foretrust Building, Martin Hammerschlag Way, Foreshore, Cape Town (attention Mr Raymond Scott) before the date specified in the appeal form enclosed in the notification letter. No information will be released before the date specified in the Appeal Form. Objections received after this date will only affect subsequent

applications for access to information. If access is sought to a part of a form in respect of which an objection was submitted, the request will be determined accordance with the provisions of the Promotion of Access to Information Act, 2 of 2000.

2. Policy and Application Form Development for Long Term Rights Allocation

A detailed report entitled “*Public Participation in the Development of Policy and Application Forms for the Allocation of Long-term Commercial Fishing Rights*” will be made available on the Department’s website (www.mcm-deat.gov.za).

A Committee was established to co-ordinate and manage the drafting of a general fisheries policy and sector specific fishing policies. Draft policies were finalised after the Minister held a series of Ministerial *Izimbizo* with coastal communities along the west, south east and east coasts between June and November 2004 and after all registered industrial bodies and interest groups were consulted on sector management issues. On 1 March 2005, the Minister issued for public comment 19 draft fishery specific policies and a draft general policy on the allocation and management of long-term fishing rights.

A key feature of the draft policies was to divide the different commercial fisheries into four clusters. The clusters were determined having regard to the level of formal organisation within the various fisheries, the capital required for participation and the make-up of the participants in a fishery. A different allocation process (method of consultation, registration, distribution, receipting, communication and evaluation) was proposed for each cluster. The Tuna Pole sector was included in “*Cluster B*”, along with other fairly capital intensive sectors such as West Coast rock lobster (Offshore), hake long line, squid and shark demersal. In these sectors, many of the participants are smaller entities owned by individuals reliant on the resource as their main source of income.

The draft policies were published in isiXhosa, Afrikaans, isiZulu and English in the Government Gazette and on the Department’s website and copies were distributed along the coastline. For purposes of public consultation, the notice and comment process set out in the Promotion of Administrative Justice Act 3 of 2000 and its regulations were adopted. During March 2005, the Department consulted with fishing communities along the coast. A total of 53 villages, towns and cities were visited and more than 6000 fishers were consulted. In April 2005, further consultations with communities took place in 16 venues along the coast about the draft traditional line fish policy. At each consultation, every comment was recorded and documented by the Rights Verification Unit (“*RVU*”), an independent team of auditors. At the end of the consultation process, more than 9000 fishers between Port Nolloth and Durban had been heard orally. Apart from the thousands of oral comments which were recorded, the Department also received more than 900 written comments on the policies. Significant changes were made to the policies after the comments were considered.

In May 2005, Cabinet approved the 19 “*sector specific policies*” and the “*General policy*”. In July 2005, Cabinet approved the traditional line fish sector policy.

Stakeholders and affected parties were also given the opportunity to comment on the application forms before they were adopted. An abbreviated notice and comment process was followed in Cluster B. Draft application forms for each fishery were published on the website and comments were invited. Numerous changes were made to the application forms after the comments were considered.

3. Appointing the Delegated Authority

In July 2005, the Minister appointed Mr Andre Share, the then Acting Chief Director, Resource Management in the Department as the delegated authority responsible for the allocation of rights in the tuna pole sector. This delegation was withdrawn in December 2005 because the Department received more applications than anticipated and Mr Share's obligations in respect of other large fisheries made it impossible for him to give sufficient attention to the applications in the tuna pole sector and to ensure a timeous allocation in the sector.

In his place the Minister, acting in terms of section 79 of the MLRA, appointed Mr Jacobus de Swardt of the Department as the delegated authority responsible for the allocation of long term fishing rights in the tuna pole sector.

4. Registration, Distribution and Receipting of Applications

A detailed report entitled "*Registration, Distribution and Receipting in the Long-Term Rights Allocation Process*" will be made available on the Department's website (www.mcm-deat.gov.za). The final deadline for registration for Cluster B sectors was set at 17h00 on Friday 25 July 2005 and for lodgement on either 5 September 2005 (between 08h00 and 19h00) or 6 September 2005 (between 08h00 and 17h00) at the Good Hope Centre in Cape Town. A total of 2179 applicants registered for Cluster B long-term commercial fishing rights. Of these, 1885 lodged their applications timeously.

The RVU receipted a total of 265 applications for long term commercial fishing rights in the tuna pole fishery on behalf of the Department. Of the 265 applications received, 121 claimed to be medium term right holder applicants and 144 were from new entrant applicants.

5. An Interactive Application Process

In the Cluster B sectors, applicants were able to communicate with the delegated authorities in the period between registration and closing day by e-mailing questions to a designated address. Queries and Responses were provided weekly by notices on the Department's website (www.mcm-deat.gov.za) and by e-mail to each registered applicant. A report entitled "*The Interactive Application Process for the Allocation of Long-Term Rights Allocation Process*" will be made available on the Department's website (www.mcm-deat.gov.za). All the Queries and Responses dealt with in Cluster B will be published as part of this report.

The delegated authority further communicated in Cluster B through website notices and updates and by way of “FishRights” – a fortnightly E-Newsletter that is placed on the Department’s website every second Monday. This newsletter is also e-mailed to over 400 fishing companies, journalists and circulated through interest groups and industrial bodies recognised by the Minister in terms of section 8 of the MLRA.

6. The Decision Making Process

The delegated authority was assisted by an Advisory Committee; legal advisors; the RVU and auditors; IT specialists; communication consultants; and administrative and project management specialists.

A report entitled “*The Decision-making Processes for the Allocation of Long-Term Rights*” will be made available on the Department’s website (www.mcm-deat.gov.za). In short, the process of allocating commercial fishing rights in the tuna pole fishery involved the following steps:

☞ Database Development: After the applications were receipted by the RVU, the delegated authority instructed the IT advisers to design a database to facilitate the analysis of applicant data across a range of fields, including, transformation, investment, job creation, compliance, and issues such as safety and environmentally sustainable practices. The purpose of the database was to assist with the development of detailed criteria and weighting and for identifying internal inconsistencies and deviations that required special verification and consideration.

☞ Criteria and weighting design: After the database for the fishery had been constructed, the delegated authority, with the assistance of the Rights Allocation Unit, designed detailed criteria and weighting for the purpose of assessing the applications. These criteria are listed below.

☞ Constitution of the Advisory Committees: The delegated authority constituted an advisory committee, which was chaired by a member of the Rights Allocation Unit. The advisory committee for the tuna pole fishery consisted of –

- ☞ Mr Shaheen Moolla (chairperson)
- ☞ Mr Cheslyn Liebenberg
- ☞ Mr Mbulelo Ruda
- ☞ Mr Almo Lubowski
- ☞ Ms Micha-Rose Emmett

☞ The role of the Advisory Committee in the tuna pole fishery was to determine whether the applications were properly lodged, not materially defective and met the essential requirements of the fishery, to assess

the information provided in each application, to comment, and, in some instances, to score the application in terms of the balancing criteria and weighting determined by the delegated authority.

☞ Instructing the Advisory Committees: Each advisory committee was briefed and instructed by the delegated authority, members of the Rights Allocation Unit and legal advisors on, *inter alia*, the following:

- The applicable statutory provisions and case law;
- The regional and international instruments that directly impacts on the fishery;
- The general policy and the sector specific policy adopted by the Minister and Cabinet for the tuna pole fishery;
- The current biological, economic and transformation profiles of the sector;
- The detailed criteria and weighting to be applied; and
- The purpose of each question asked in the application form applicable to tuna pole fishery.

☞ Guiding the Advisory Committees: Over the duration of the verification and scoring process, the delegated authority met with the advisory committee and if necessary, instructed them on the manner in which to verify information or score a particular aspect of the application.

☞ Decision-making: After all applications were evaluated, the advisory committee presented the results to the delegated authority. The delegated authority then considered each assessment form and score sheet, having regard to the application. If there was any uncertainty regarding the score or the assessment, the delegated authority carefully re-assessed or rescored the application. The delegated authority also considered whether the selected criteria and weighting achieved the objectives set for the fishery and, if necessary, adjusted weighting or criteria in order to better achieve the objectives.

7. Sector Profile Prior to Long Term Rights Allocations

The tuna pole fishery uses surface gear to target schooling juvenile albacore in the southeast Atlantic, largely for export to canning markets. Other tuna species that are landed include yellowfin and bigeye tuna, but these species make up less than five percent of the annual catch. However, some right-holders have started targeting these tunas for sale on the sashimi markets in Europe, the United Kingdom, the United States of America and Japan. Southern Atlantic albacore has been commercially fished since the 1950's. Total landings had fluctuated around 24 000 tons between 1965 and 1985. Thereafter landings increased to approximately 30 000 tons.

The fishing nations that target albacore in the South Atlantic are Chinese Taipei (averaging 16 800 tons between 1998 and 2002), South Africa (6 200 tons), Brazil (4 000 tons) and Namibia (2 300 tons). The

South Atlantic albacore stock is not over-exploited, despite catches exceeding the global TAC for several years.

As the International Commission for the Conservation of Atlantic Tunas (“ICCAT”) has not issued country allocations for the South Atlantic albacore stock, the South African fishery is managed by the Department through a total applied effort (“TAE”) of 200 vessels carrying a maximum of 3 600 crew. Over the years, two types of vessels have emerged in this fishery. The first are large vessels with onboard freezers, capable of spending substantial periods at sea with a crew of 20 or more. The second type are smaller vessels that carry less than 20 crew, spending no more than five days at sea.

Some 165 vessels were authorised to target tunas using the pole method. More than 2 700 crew were employed on these vessels. The fishery is not capital intensive, but locating and fishing for tuna using the pole method requires a skilled crew. The tuna pole fishery has traditionally had access to line fish stocks, such as snoek and yellowtail. Certain right holders have targeted threatened and overexploited line fish stocks, which is a concern.

8. Tuna Pole Medium term rights

During the medium term rights allocation process, 152 commercial tuna pole fishing rights were allocated, thereby authorising 165 vessels and more than 2 700 crew to target tuna using the pole method. Of the rights allocated, 20.5 percent were allocated to black persons or black-owned and controlled entities. Only 29 percent of the right-holders in this fishery were legal entities. The remainder were natural persons (individuals).

9. Applicants for Long Term Rights

A total of 265 applications were received for long term commercial rights in the tuna pole fishery. Of these 121 applied as medium term right holder applicants and the balance (144) applied as new entrant applicants.

9.1 Application Form Database

The data supplied by the applicants was loaded on to an IT application that made it possible to view summations of data and to sift and rank data. The data will be published as part of the report entitled “*The Decision-making Processes for the Allocation of Long-Term Rights*”.

The database provided the delegated authority and the Advisory Committee with the means to look at each applicant individually whilst also being able to have a “global” view of the entire sector instantaneously. This provided a huge gain on the 2001 allocation where spreadsheet capturing of data and institutional memories had to be relied on far more.

The statistics provided a wider backdrop to sectoral fisheries than was extracted for purposes of analyses and ranking. This provided the delegated authority with the means to have a comprehensive insight into each fishery and thus the ability to make decisions on the basis of a context and relevant backdrop.

The statistics have provided data on each fishing sector that has never before been recorded and collated at such a detailed and comprehensive level. A detailed profile of each fisheries sector and indeed a profile of the entire commercial fishing industry can be written up for the first time ever. The data is presumed to be highly accurate as the applicants who supplied it would not want to risk or jeopardize their application by supplying inflated or misleading information. The data provides a tool for the management of fisheries beyond the round of current allocations.

9.2 Profile of the medium term right holder (MTRH) Applicants

A summary of some of the information submitted by medium term right holder applicants in their application forms is set out directly below. It should be kept in mind that the information provided by applicants was assessed and in some instances claims made were rejected or corrected.

(a) Investment

Table 1: Investment in the Tuna Pole Sector

Total assets (book value)	R62,617,388.99
Land-based (book value)	R6,651,933.15
Harbour and Sea-based (book value)	R52,345,942.02
Total assets (insured value)	R125,750,990.00
Land-based assets (insured value)	R16,332,939.00
Sea-based assets (insured value)	R109,993,840.00
The mean harbour and sea-based insured value (per vessel allocated) of all applicants	R752,958.34
The mean land-based assets insured value (per vessel allocated) of all applicants	R75,291.72

A total of 61 applicants claimed that they invested in on-board or land-based processing.

(b) Job creation

Table 2: Jobs in the Tuna Pole Sector

Total salaries and dividends paid over the last year	R16,149,533.56
Mean total jobs (including seasonal)	17.65
Median total jobs per vessel allocated	14.00
Mean yearly salary bill per vessel allocated	R152,946.61

(c) Financial information

The mean annual turnover of the MTRH applicants (all sectors) was R 1,491,939.04. The average rand value of turnover per vessel allocated was R 154,051.85.

Tuna Pole MTRH applicants made R 7,556,839.11 profit after tax, taking into account all the fishing sectors in which they participated. The MTRH applicants paid a total of R 3,001,039.20 in dividends in 2004. The combined asset value of the applicants across all sectors was R 194,054,020.43.

(d) Transformation

Out of the 121 applicants, 88 claimed that they fully achieved the goals set in the transformation plans submitted to the Department in 2001, whereas 18 claimed that they only partially met the goals, and 15 claimed that they did not meet the goals at all.

Ownership

Black ownership of 88 applicants increased, 5 decreased and 28 remained the same. Only 18 applicants have employee share schemes, and on average these employees (other than top salary earners) own 22.07% of the 18 applicants.

Table 3: Black Shareholding

Black Shareholding	54.06%
Black Voting rights	49%
Black Dividend entitlement	49.52%

R 1,557,902.20 was paid in dividends to black shareholders over the last year. Calculated on net asset value, the black shareholding in the applicants is worth R 78,618,406.32.

Table 4: Female Shareholding

Female Shareholding	29.19%
Female Voting Rights	29.45%
Female Dividend Entitlement	29.45%

Calculated on net asset value, the female shareholding in the applicants is worth R 36,023,596.85.

Employment Equity / Management

Table 5: Top Salary Earners

Ratio of Black to White Top Salary Earners	142 Black, 167 White: Ratio 0.85:1
Ratio of Male to Female Top Salary Earners	281 Men, 29 Women: Ratio 9.690:1

The average top 5 salary earner received R 61,333.67 per annum, with R 607,750 at the top. The average of the five lowest salaries was R 12,007.74 per annum.

Table 6: Income levels (Percentage of workforce (Levels 1 to 10))

1	Less than R2 500 per month	67.04%
2	Between R2 500 and R 5 500	29.66%
3	Between R5 501 and R10 500	21.11%
4	Between R10 501 and R16 000	18.64%
5	Between R16 001 and R20 000	9.59%
6	Between R20 001 and R25 000	12.74%
7	Between R25 001 and R30 000	14.57%
8	Between R30 001 and R40 000	12.52%
9	Between R40 001 and R60 000	33.48%
10	More than R60 000	15.52%

The MTRH applicants claimed that 41.72% of the employees in levels 5 – 10 are black.

Skills Development

Of the 121 MTRH applicants, 37 submitted approved workplace skills plans and 35 submitted approved annual training reports. The applicants paid R 257,652.84 to SARS in skills development levies. The mean percentage of training budget spent on black employees was 66.21 % amounting to a total of R 1,139,551.97. On average 29.05% of employees received learnerships.

CSI

Of the 121 MTRH applicants, 13 made tax deductible donations and 32 made other forms of donations.

Affirmative Procurement

The top ten suppliers of the applicants were, on average, 31.88% black and the applicants procured, on average, 67.94% of total expenditure from their top ten suppliers.

9.3 Profile of the New Entrant (NE) Applicants

A summary of some of the information submitted by new entrant applicants in their application forms is set out directly below. It should be kept in mind that the information provided by applicants was assessed and in some instances claims were rejected or corrected.

(a) Investment

The book value of total assets of NE applicants amounted to R 122,281,922.10 and the insured value of assets amounted to R 177,780,304.00 (for all fishing sectors). A total of 54 out of the 144 NE applicants claimed that they invested in on-board or land-based processing.

(b) Job creation

The NE applicants claimed to have an average of 23.66 employees at date of application in fishing sectors other than Tuna Pole. They paid R 10,327,905.65 in salaries and dividends over the last year.

(c) Financial information

The mean annual turnover of the NE applicants was R 3,211,407.75. Profit after tax for all the applicants together (in all sectors) amounted to R 3,683,418.00. The NE applicants paid a total of R 201,029.00 in dividends in 2004. The combined asset value of the NE applicants (in all sectors) was R 209,754,799.49 in 2004.

(d) Transformation

Ownership

Table 7: Black Shareholding

Black Shareholding	80.43%
Black Voting rights	80.82%
Black Dividend entitlement	82.49%

Calculated on net asset value, the black shareholding in the NE applicants was worth R 79,212,962.98. NE applicants claim to have paid R 440,367.00 in dividends to black shareholders in the last year.

Table 8: Female Shareholding

Female Shareholding	40.31%
Female Voting Rights	40.89%
Female Dividend Entitlement	41.66%

Calculated on net asset value, the female shareholding in the applicants is worth R 55,313,235.29. A total of 11 NE applicants claimed recognition for employee ownership, and on average 21.38% employee ownership was claimed.

Employment Equity / Management

Table 9: Top Salary Earners

Ratio of Black to White Top Salary Earners	146 Black, 92 White: Ratio 1.587:1
Ratio of Male to Female Top Salary Earners	172 Men, 67 Women: Ratio 2.567:1

The average top 5 salary earner's salary was R 91,650.57 with R 458,519.00 at the top. The average of the five lowest salaries was R 15,462.84 per month.

Table 10: Income levels (Percentage of workforce (Levels 1 to 10))

1	Less than R2 500	63.65%
2	Between R2 500 and R 5 500	44.30%
3	Between R5 501 and R10 500	22.33%
4	Between R10 501 and R16 000	11.82%
5	Between R16 001 and R20 000	12.91%
6	Between R20 001 and R25 000	5.85%
7	Between R25 001 and R30 000	6.76%
8	Between R30 001 and R40 000	4.83%
9	Between R40 001 and R60 000	4.71%
10	More than R60 000	9.00%

Skills Development

Of the 144 NE applicants, 16 submitted approved workplace skills plans and 12 submitted approved annual training reports. The applicants paid R 657,386.47 to SARS in skills development levies. The mean percentage of salary bill spent on training was 0.42 % and R 97,495.29 was spent training black employees.

CSI

Of the 144 NE applicants, 12 made tax deductible donations and 19 made other forms of donations.

Affirmative Procurement

The top ten suppliers of the applicants were, on average, 23.12% black.

10. Criteria

10.1 Exclusionary Criteria

All the applications were initially scrutinised to determine whether they were properly lodged, whether they were not materially defective and whether they fulfilled the essential requirements of the sector.

An application was **improperly lodged** if:

- ☞ the application was not lodged at the prescribed place within the prescribed time;
- ☞ the correct application fee was not paid within the required timeframes; or
- ☞ the application was not lodged on the official prescribed application form.

An application was **materially defective** if:

- ☞ the declaration was not signed and attested to by the authorised representative of the applicant, and if applicable, the authorised representative of the Holding Company, the Sister Company or the JV Partner(s);
- ☞ more than one application was received from the same applicant in the same sector;
- ☞ the applicant provided false information or false documents or the applicant failed to disclose material information, or
- ☞ the applicant attempted to influence the Minister or the delegated authority other than in the manner provided for in the General policy during the application period.

An applicant failed to meet the **essential requirements** of the sector if:

- ☞ the applicant posed a paper quota risk as defined in the General policy;
- ☞ the applicant was a new entrant applicant and a medium-term right holder held shares in the applicant or used the applicant in order to proliferate in the sector in a manner contrary to the General Policy;
- ☞ the applicant is not a close corporation or company;
- ☞ the applicant breached a provision of the MLRA resulting in sanctions provided for paragraph 8.1(b) of the tuna pole policy;

- ☞ the applicant is not more than 50% South African owned;
- ☞ The applicant failed to utilise its tuna pole medium term fishing right, in that it caught, according to its own records, 1 ton or less fish over the medium term period (2002-2004);
or
- ☞ the applicant has not demonstrated access to at least one suitable vessel. A suitable vessel for this fishery is a vessel that –
 - has a minimum SAMSA registered length of approximately 10 metres (smaller vessels were considered, provided the applicants could demonstrate a catch performance in the tuna pole fishery with this vessel);
 - is certified by SAMSA to have a minimum operational range of 40 miles (category B vessel);
 - has a functioning vessel monitoring system; and
 - is equipped with freezer or ice facilities.

9.2 Comparative Balancing Criteria: Medium Term Right Holder Applicants

The delegated authority adopted the following detailed criteria and weighting for medium term right holder applicants:

Criteria	Breakdown	Weighting	Section Weighting	Major Section Weighting	Section Percentage
					50%
Catching Performance			20		20%
Applicant spent more than the mean number of days fishing in the years 2002 to 2004		20			
Investment			8		8%
Insured value of harbour and sea based assets per vessel allocated	>90 th	8			
	80th-90th	7.2			
	70th-80th	6.4			
	60th-70th	5.6			
	50th-60th	4.8			
	40th-50th	4			
	30th-40th	3.2			
	20th-30th	2.4			
	10th-20th	1.6			
	1st-10th	0.8			
Environmentally Sustainable Practices			2		2%
Applicant has put in place energy reduction mechanisms		1			
Applicant has sponsored research		1			
Local Economic Development			2		2.0%
Applicant will land and process at harbours other than the Cape Town harbour		2			
Reliance on the Resource			5		5%
Applicant relies on the resource for more than 50% of its		5			

Criteria	Breakdown	Weighting	Section Weighting	Major Section Weighting	Section Percentage
gross annual income					
Jobs			10		10%
Total (including seasonal) employees per vessel allocated	>90th	5	5		5%
	80th-90th	4.5			
	70th-80th	4			
	60th-70th	3.5			
	50th-60th	3			
	40th-50th	2.5			
	30th-40th	2			
	20th-30th	1.5			
	10th-20th	1			
	1st-10th	0.5			
Total salaries and wages per vessel allocated	>90th	5	5		5%
	80th-90th	4.5			
	70th-80th	4			
	60th-70th	3.5			
	50th-60th	3			
	40th-50th	2.5			
	30th-40th	2			
	20th-30th	1.5			
	10th-20th	1			
	1st-10th	0.5			
Safety			3		3%
The applicant has appointed a qualified safety officer for each nominated vessel in terms of section 36 of the Maritime Occupational Safety Regulations		0.5			
Every crew member on board each nominated vessel has completed the approved safety induction training required by the Merchant Shipping Act, 57 of 1951		0.5			
The applicant completed a formal safety assessment in terms of Marine Notice no 26 of 2004		0.5			
The applicant has registered with the Commissioner in terms of the Compensation for Occupational Injuries and Diseases Act 130 of 1993		0.5			
The applicant has an HIV/AIDS policy		0.5			
The applicant has been convicted or forfeited a deposit for contravening any part of the Marine Pollution (Prevention of Pollution from Ships) Act 2 of 1986 or Section 30 of the Marine Pollution (Control and Civil Liability) Act 6 of 1981		-0.5

¹ The Employment Equity (“EE”) profile in terms of income levels was determined as follows. As a first step the percentage blacks in the workforce at each completed income level (blacks divided by total workers at a level multiplied by 100) was calculated. This percentage was then subtracted from 89.4% (the current % blacks in the Economically Active Populations in the coastal provinces) for each level. The result was multiplied by an assumed mean salary at each level divided by 1000 (in other words, 1.25, 4, 8, 13.5, 18, 22.5, 27.5, 35, 50 and a figure of 60 was used for level 10). This result was multiplied by the percentage the level constitutes of the total workforce. The results of all the completed levels were added up and divided by the number of levels completed by the applicant. The results were then converted and expressed into percentiles for comparison. The applicant with the highest negative figure achieved the best score and the applicant with the highest positive figure received the lowest score.

² This criterion was assessed as follows: black and female representation was measured with the emphasis on occupational categories where black and female representation has traditionally been low. This was done by assigning a different number of penalty points to the different levels of occupational categories. There were four (4) levels and the following penalty points were assigned: top management – 6, professionals – 4, Skilled - 2, Semi-skilled – 1. The score was calculated by taking the % figure for each occupational category and comparing it to the EAP in the coastal provinces, consisting of 48.5% females and 89.4% blacks. If the applicant had a higher figure, it would automatically score a 1. If the figure was less, the following calculation was used: $1 - (\text{applicant's \%} / \text{EAP})$. The result was then multiplied by the penalty points. This gave a penalty for that occupational category. A score for each category was calculated and the four numbers added together and the total divided by the number of levels, in this case four. This was done separately for black and for female, yielding two scores.

³ Applicants were not allocated points for this criterion if they achieved the maximum number of points (18) for black ownership, above.

Criteria	Breakdown	Weighting	Section Weighting	Major Section Weighting	Section Percentage
Applicant's employee ownership falls:	>75th	2	2		2.0%

9.3 Comparative Balancing Criteria: New Entrant Applicants

The delegated authority adopted the following detailed criteria and weighting for new entrant applicants:

Criteria	Breakdown	Weighting	Section Weighting	Major Section Weighting	Section Percentage
				49	49%
Investment			5		5.0%
Investment in assets, including marketing and processing initiatives ⁴	None	-5			
	Non-trading/newly established Entity	0			
	Acceptable	5			
Financial Performance			20		20.0%
Return on Equity		10			
Profit after tax as a percentage of turnover		5			
Retained earnings as a percentage of turnover		5			
Applicant has the financial ability to enter the sector (for newly established and non-trading entities only) ⁵	Does not have the ability	0			
	Has the ability	20			
Jobs			5		5.0%
Applicant's Jobs Score ⁶	Has not created jobs	-5			
	Non right holder/newly established	0			
	Has created jobs	5			
Safety			1		1%
The applicant has an HIV/AIDS policy		1			
ESP			2		2.0%
Applicant has undertaken or sponsored research ⁷		2			
Fishing Ability			15		15.0%
Fishing Ability ⁸	Demonstrates no ability or does not demonstrate access to a suitable vessel	0			
	Demonstrates acceptable ability	10			

⁴ The reason why negative scores were given to right holders (in other sectors) with no investments is to allow them to be compared with non-trading and newly established entities. Non-right holder new entrants that have made investments in the fishing industry were also scored 5 points.

⁵ The reasons for this assessment in respect of individual applicants are set out in the assessment sheets.

⁶ The reason why negative scores were given to right holders (in other sectors) with a poor job creation record is to allow them to be compared with non-trading and newly established entities. Non-right holder new entrants that have created jobs in the fishing industry were also scored 5 points.

⁷ The reasons for this assessment in respect of individual applicants are set out in the assessment sheets.

⁸ The reasons for this assessment in respect of individual applicants are set out in the assessment sheets. The applicant's fishing plan was taken into consideration, especially the annexure setting out the implementation of the fishing plan and the skills and knowledge of the persons designated to do so; and the suitability of the nominated vessel.

Criteria	Breakdown	Weighting	Section Weighting	Major Section Weighting	Section Percentage
	Demonstrates good ability	15			
Local Economic Development (“LED”)			1		1.0%
Applicant will land catch at fishing harbours other than the Cape Town harbour		1			
Transformation				51	51.0%
Transformation - Directors			8		8.0%
Applicant's black directors (or members if CC) as a percentage of total directors is higher than the mean		4			
Applicant's female directors (or members if CC) as a percentage of total directors is higher than the sector mean		4			
Transformation - Top Salary Earners			3		3.0%
Applicant's black top salary earners as a percentage of total top salary earners ⁹	<33.3%	-2			
	33.3 - 66.6	0			
	>66.6	2			
Applicant's female top salary earners as a percentage of total top salary earners	<33.3%	-1			
	33.3 - 66.6	0			
	>66.6	1			
Transformation – Occupational Categories			1.5		1.5%
ACI Performance Score ¹⁰	<33.3%	-1			
	33.3 - 66.6	0			
	>66.6	1			
Female Performance Score	<33.3%	-5			
	33.3-66.6	0			
	>66.6	0.5			
Transformation - Ownership				34	34.0%
Applicant's black ownership falls:	>90th	22	22		22.0%
	80th-90th	20			
	70th-80th	18			
	60th-70th	16			
	50th-60th	14			
	40th-50th	12			
	30th-40th	10			
	20th-30th	8			
	10th-20th	6			
	1st-10th	4			
Applicant's female ownership falls:	>90th	10	10		10.0%
	80th-90th	9			
	70th-80th	8			
	60th-70th	7			

⁹ Negative scores were given to right holders (in other sectors) with comparatively low scores in order to compare such new entrant applicants with non-trading and newly established entities without workers. The latter were scored 0. Non right holder new entrant applicants with jobs were scored in the same manner as right holder applicants. Female top salary earners were assessed in the same manner.

¹⁰ The ACI occupational levels were determined as set out above for medium-term right holder applicants. Negative scores were given to right holders (in other sectors) with comparatively low scores in order to compare such new entrant applicants with non-trading and newly established entities without workers. The latter were scored 0. Non right holder new entrant applicants with jobs were scored in the same manner as right holder applicants. Female occupational categories were assessed in the same manner.

Criteria	Breakdown	Weighting	Section Weighting	Major Section Weighting	Section Percentage
	50th-60th	6			
	40th-50th	5			
	30th-40th	4			
	20th-30th	3			
	10th-20th	2			
	1st-10th	1			
Applicant's employee ownership	None but has employees	-2			
	No Employees	0			
	Has Employee Share Scheme	2	2		2.0%

Applicant has an AP policy		1			
Applicant procures from black suppliers		1			
Enterprise Development			1		1.0%
Enterprise Development Score	Right holder with no Enterprise Development	-1			
	Non-trading/newly established entity	0			
	Right holder with Enterprise Development	1			
EE Compliance			0.5		0.5%
Applicant is a designated employer and has failed to comply with the Employment Equity Act		-3			
Applicant complied with the Employment Equity Act		0.5			
Applicant complied voluntarily with the Employment Equity Act		0.5			
Compliance					
Applicant, or applicant's members, directors or controlling shareholders have entered into a plea bargain in respect of a contravention MLRA, its Regulations or permit conditions		-3			

¹¹ Applicants with employees that did not pay levies were scored -1. Applicants without employees scored 0. Applicants that paid levies and participated in learnership programmes or other skills development programmes through SETA scored 1 point. Applicants with employees that (only) paid levies scored 0.

¹² Applicants that made a profit and made no donations scored -1. Applicants that did not make a profit (or newly established and non trading entities) and that did not make donations score 0. Applicants that made donations scored 1.

¹³ One point was awarded if the applicant had a policy or if the applicant procured from suppliers with some black shareholding.

Criteria	Breakdown	Weighting	Section Weighting	Major Section Weighting	Section Percentage
Applicant, or applicant's members, directors or controlling shareholders have paid an admission of guilt fine for contraventions of the MLRA, its Regulations or permit conditions		-1			
Total Score			100		100.0%

10. The Decisions on the allocation of rights

The delegated authority decided to allocate a total of 98 long term commercial tuna pole fishing rights. Of these 69 were allocated to medium term right holder applicants and 29 to new entrant applicants.

The delegated authority reserved his decisions on 8 applicants, pending the outcome of an investigation to be conducted by the RVU. Of the 8 applicants, 7 were medium term right holder applicants and 1 is a new entrant applicant. The investigations will relate to the possible targeting of linefish, non-utilisation of the medium term fishing right and the accuracy of information submitted.

The following lists are attached as annexures to this GPR:

- "A.1", the successful MTRH applicants in alphabetical order, together with their application numbers and the vessel(s) and number of crew authorised;
- "A.2", the successful NE applicants in alphabetical order, together with their application numbers and the vessel(s) and crew authorised;
- "A.3", the reserved applicants in alphabetical and their application numbers,
- "A.4", the unsuccessful MTRH applicants in alphabetical order, together with their application numbers;
- "A.5", the unsuccessful NE applicants in alphabetical order, together with their application numbers;
- "B.1", the MTRH applicant scores;
- "B.2", the New Entrant applicant scores.

11. The Allocation of Effort

As stated above, long term tuna pole commercial fishing rights were allocated to 98 applicants. The 98 applicants are authorised to use a total of 103 vessels and 1729 crew. This leaves 97 vessels and 1871 crew available for allocation by the Minister on appeal.

12. Policy Decisions on the allocation of rights and effort

Most of the reasons for excluding the applications that were materially defective or failed to meet the essential requirements for participating in the fishery have been dealt with in the General policy and the Tuna Pole sector policy and will not be repeated here. As far as non-utilisation is concerned, the sector policy provided that the delegated authority may refuse to re-allocate a right if a MTRH applicant failed to fully utilise its medium-term commercial tuna pole fishing right between 2002 and 2004. The delegated authority decided that MTRH applicants that, according to their own catch records, did not catch more than 1 ton of tuna between 2002 and 2004 failed to fully utilise their rights in the medium term period and decided to exclude these applicants.

As far as the decisions on the applications in terms of the comparative balancing criteria are concerned, the delegated authority decided to allocate commercial rights to all the MTRH applicants that scored 30.5 points or more. This decision was informed by the following considerations:

- 12.1 the catch performances of MTRH applicants that scored less than 30.5 points were below the mean during the period 2002 to 2004; and
- 12.2 the MTRH applicants that scored below 30.5 points scored poorly for investment, job creation and reliance and/or failed to adequately transform.

The delegated authority decided to allocate commercial rights to all NE applicants that scored 51.5 points or more. The reasons for this decision are as follows:

- 12.3 the NE applicants that scored below 51.5 points failed to score sufficient points in terms of the three key new entrant criteria: ability to target tunas, financial ability to enter the fishery; and transformation.

As far as the allocation of effort is concerned, the delegated authority's decisions are informed by the following considerations:

- 12.4 The delegated authority authorised the successful applicants to utilise the vessels nominated provided they were suitable.
- 12.5 The delegated authority allocated the successful applicants the maximum number of crew that, according to the South African Maritime Safety Authority (SAMSA), the vessel could carry safely.

- 12.6 A number of vessels that were less than 10m in length were considered to be unsuitable as the applicants did not demonstrate that these vessels had a satisfactory performance history in the tuna pole fishery. To allow such vessels to continue in the tuna pole fishery would, in the opinion of the delegated authority, undermine a key policy objective, which is to improve South Africa's record of performance in the tuna fisheries in order to place it in a better position in the negotiations for quotas from regional tuna management organisations such as ICCAT. Very small vessels are more likely to target line fish on a tuna permit.
- 12.7 A number of successful applicants have been requested by the delegated authority to nominate alternative vessels, as the vessel nominated in their application form have been authorised to harvest west coast rock lobster offshore. WCRL offshore vessels may not also participate in the Tuna Pole fishery. The alternative vessel may not have more crew than the vessel originally nominated.

The tuna commercial fishing rights are allocated for an eight-year period. The delegated authority recognises that the fishery has historically been undersubscribed and that it is a policy objective to improve South Africa's performance in the tuna fisheries. Applicants were refused because they did not demonstrate, in the opinion of the delegated authority that they would sufficiently contribute to this objective and the transformation of the sector. Some of these applicants may be able to demonstrate on appeal that they meet the key policy criteria, but that decision is best left to the Minister.

The allocation of rights and effort in this fishery has significantly improved the transformation profile of the tuna pole fishery. After the allocation of medium term commercial fishing rights in 2002, 20.5% of right holders were black. The allocation of long-term commercial fishing rights has resulted in the allocation of 98 commercial fishing rights, of which 52.87% are black controlled.

13. Permit Conditions for this Fishery

The Tuna Pole policy stipulates that prior to the finalisation of permit conditions for this fishery, the Department will consult with the right holders. The Chief Director: Resource Management (*“the CD:RM”*) is authorised to determine these conditions. In order to better manage the sector, maintain the transformation profile of the fishery, and to obtain regular catch data on tunas, the CD: RM, after consultation with the delegated authority, and having regard to the policy objectives of this fishery intends to determine permit conditions that give effect to, *inter alia*, the following considerations:

13.1 Performance Measuring: Right holders in this fishery will be measured against criteria such as transformation, investment, reporting, compliance and sustainable fishing harvesting practices. The CD:RM will design permit conditions to ensure adherence with these criteria and will require right holders to provide data after a year.

13.2 Line Fish Targeting: The by-catches and targeting of linefish in this sector are of concern. Current by-catch limits for these species will be retained and may be reduced further. The targeting of line fish species on a tuna permit may result in section 28 proceedings.

13.3 Reporting: All right-holders in this sector will have to adhere to strict and regular reporting measures to ensure that this fishery remains environmentally and economically sustainable.

Mr Jacobus de Swardt

Delegated Authority: Tuna Pole Fishery

9 March 2006

Annexure A1

Decisions of the Delegated Authority

Successful Tuna Pole MTRH Applicants in Alphabetical Order and Effort Allocated
