1. PURPOSE

- 1.1 The purpose is to appoint a professional service provider to provide veldfire statistics in South Africa for a period of thirty-six (36) months.

2. INTRODUCTION AND BACKGROUND

- 2.1 The National Veld and Forest Fire Act 1998, Act no. 101 of 1998 (NVFFA) is the primary legislation regulating veld fire in South Africa. The purpose of the Act is to prevent and combat veld, forest, and mountain fires throughout the republic and to provide for various institutions, methods, and practices for achieving the purpose.
- 2.2 These methods and practices include but are not limited to the formation of Fire Protection Associations (FPA), development and maintenance of a National Fire Danger Rating System (NFDRS), veldfire prevention through firebreaks, provision of veldfire risk profile, prescribed minimum requirements for firefighting, and enforcement mechanisms. Essentially, in this Act, obligations are placed on the landowners on which there is a risk of veld fire and citizens at large who may be affected by the risk of veld fire.
- 2.3 Veld fire, although it is vital in the management of the ecological ecosystem, is a natural hazard in South Africa. Currently, there is no centralised veldfire database to quantify the number of veldfire incidents and the area impacted at the national level. Monitoring of veld fire and veld fire effects for large territories is mainly based on satellite remote sensing. Mapping of burnt areas and assessment of wildfire effects is one of the most successful applications of satellite remote sensing. Satellite remote sensing provides the means for acquiring comprehensive and harmonized information on veld fire effects for large territories at low cost.
- 2.4 The veld fire statistics should integrate with relevant provisions in the Act, for example, the fire danger rating system. It should provide an assessment at the policy level, to support operational assessments and mitigation plans in the provincial and local spheres of government. It should integrate with bioregional plans in terms of the National Environmental Management: Biodiversity Act as well as Integrated Development Plans.

3. OBJECTIVES

- 3.1 The overall objective is to supply the Department with veld fire data.

4. SCOPE AND EXTENT OF WORK

- 4.1 The appointed service provider will be required to provide the following services:
- 4.1.1. Monitor active veld fire and provide statistical reports at the municipal (local, district, and metro), provincial, and national levels.

 - 4.1.3. Provide investigative analysis in terms of the course of fires when requested.
 - 4.1.4. Provide veld fire trajectories and the extent of burnt areas with imagery.
 - 4.1.5. Identify and provide areas with high frequency of veld fire incidents at the municipal (local, district, and metro), provincial, and national levels.
