Climate Change Response Dialogue 2014, 10-14 November 2014
INTRODUCTION

• The intention of this presentation to:
  – share the current thinking process from the Department on how we see the process unfolding,
  – To solicit input on how you like to see the process unfolding and elements which should form part of the framework and strategy,
  – Begin a journey of the negotiated climate change adaptation framework and ultimately the strategy;
  – Raise on discussion on the way forward
WHY NATIONAL CLIMATE CHANGE STRATEGY /NAP?

• The key objectives of the national adaptations framework processes are to guide the development of the National Adaptation Strategy or plan
• The Strategy will be the National Adaptation Plan for South Africa
• The key objectives of National Adaptation Strategy is to:
  – Reduce vulnerability to the impacts of climate, by building adaptive capacity and resilience
  – Facilitate the integration of climate change adaptation, in coherent manner, into relevant new and existing policies, programmes, activities, in particular development planning processes and strategies, within all relevant sectors and at different levels, as appropriate
  – **Optimise policy coherence** within sectors and across sectors in order to achieve adaptation outcomes that support development aspirations
  – Facilitate for the integration of adaptation strategies in key sector plans, and
  – facilitate for the adaptation responses that require coordination between sectors, provinces, and Local Government
  – To also conform with international policy commitment in terms of the UNFCCC.
LEGISLATIVE CONTEXT FOR CLIMATE CHANGE ADAPTATION IN SA

• International Conventions and Agreements
  – United Nations Framework Convention on Climate Change (UNFCCC)
    • Adoption of the Kyoto Protocol at a meeting of the UNFCCC in Kyoto, Japan in December 1997.
    • Cop 15 outcomes in Copenhagen (2009)
    • Cop 16 outcomes in Cancun (2010)
    • Cop17 in Durban (2011)
• Section 24 of the Constitution of the Republic of South Africa
• National Environmental Management Act (NEMA), and Specific Environmental Management Acts (SEMAS) (e.g. NEMBA, NEMWA, NEMAQA, etc.)
• Sector Departments Legislation and Policies
• National Climate Change Response White Paper
NATIONAL CLIMATE CHANGE RESPONSE POLICY

VISION
Transition to a lower carbon and climate resilient society

OBJECTIVE
Make a fair contribution to the global effort to stabilize GHG concentrations

OBJECTIVE
Manage CC impacts thru interventions that build & sustain SA’s social, economic & environmental resilience and emergency response capacity

STRATEGIC APPROACH
Developmental
Transformational and participatory
Needs driven and customised
Dynamic and evidence based
Informed decision-making
Balanced and Cost Effective
Integration and Alignment
## Priority Sectors for Adaptation as Per Policy

<table>
<thead>
<tr>
<th>Sector</th>
<th>Change &amp; Impacts</th>
<th>Actions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Water:</strong></td>
<td>• Significant proportion allocated; reductions in availability, increased frequency of extremes&lt;br&gt;• Water adaptation measures, integrate climate change considerations in the short-, medium-, and long-term water planning processes&lt;br&gt;• Research, capacity building, technological improvement</td>
<td></td>
</tr>
<tr>
<td><strong>Agriculture and Commercial Forestry</strong></td>
<td>• Most scenarios suggest adverse impacts, implications for food security &amp; small-scale farmers&lt;br&gt;• Integrate agriculture and forestry into climate resilient development planning, and develop adaptation measures&lt;br&gt;• Invest in research into water, nutrient and soil conservation technologies</td>
<td></td>
</tr>
<tr>
<td><strong>Health</strong></td>
<td>• Strong interactions with environmental quality and current disease burden&lt;br&gt;• Heat Health Action Plan and various emergency responses</td>
<td></td>
</tr>
<tr>
<td><strong>Biodiversity and Ecosystem</strong></td>
<td>• Degradation trends affecting biodiversity &amp; ecosystem services; opportunities for resilience through ecosystem-based adaptation</td>
<td></td>
</tr>
<tr>
<td><strong>Human Settlements</strong></td>
<td>• Emerging understanding suggests significant and adverse impacts on infrastructure and livelihoods – coastal, urban, and rural</td>
<td></td>
</tr>
<tr>
<td><strong>Disaster Risk Reduction and Management</strong></td>
<td>• Extreme events, weather-related impacts are already exacerbated by unsustainable land use management&lt;br&gt;• To improve early warning systems&lt;br&gt;• Develop mechanism for the poor to recover after disaster&lt;br&gt;• Disaster Response Capacity</td>
<td></td>
</tr>
</tbody>
</table>
APPROACHES TO CLIMATE CHANGE ADAPTATION IN SA

Policy
- Guidelines and frameworks
- Sectoral Policy Reviews and alignment
- Cross sectoral Policy
- Strategic Coordination (IGCCC)

Planning
- National and Sector Adaptation Plans
- Provincial Adaptation Plans
- Adaptation Strategies
- Local Government (e.g. Toolkit)

Research
- LTAS
- Finer scale research projections
- Cross Sectoral Research

Implementation
- Capacity Building And Awareness programmes
- National Framework for Climate Services

International Role
- Africa
- UNFCCC
PLAN FOR DEVELOPING THE NATIONAL ADAPTATION STRATEGY

• PLAN FOR 2014/2015
  • Development of the National Climate Change Adaptation Framework

• PLAN FOR 2015/2016:
  • Development of the National Climate Change Adaptation Strategy
  • The strategy will be used as the National Adaptation Pan (NAP) for South Africa
  • It will therefore have to conform to the UNFCCC guidelines for the developing of NAP for developing countries, while responding specific South Africa needs
Guide to developing the National Adaptation Plan

This serves to provide the framework for improving the life of the

---

**TABLE 1. STEPS UNDER EACH OF THE ELEMENTS OF THE FORMULATION OF NATIONAL ADAPTATION PLANS, WHICH MAY BE Undertaken AS Appropriate**

<table>
<thead>
<tr>
<th>ELEMENT A. LAY THE GROUNDWORK AND ADDRESS GAPS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Initiating and launching of the NAP process</td>
</tr>
<tr>
<td>2. Stocktaking: identifying available information on climate change impacts, vulnerability and adaptation and assessing gaps and needs of the enabling environment for the NAP process</td>
</tr>
<tr>
<td>3. Addressing capacity gaps and weaknesses in undertaking the NAP process</td>
</tr>
<tr>
<td>4. Comprehensively and iteratively assessing development needs and climate vulnerabilities</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ELEMENT B. PREPARATORY ELEMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Analysing current climate and future climate change scenarios</td>
</tr>
<tr>
<td>2. Assessing climate vulnerabilities and identifying adaptation options at the sector, subnational, national and other appropriate levels</td>
</tr>
<tr>
<td>3. Reviewing and appraising adaptation options</td>
</tr>
<tr>
<td>4. Compiling and communicating national adaptation plans</td>
</tr>
<tr>
<td>5. Integrating climate change adaptation into national and subnational development and sectoral planning</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ELEMENT C. IMPLEMENTATION STRATEGIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Prioritizing climate change adaptation in national planning</td>
</tr>
<tr>
<td>2. Developing a (long-term) national adaptation implementation strategy</td>
</tr>
<tr>
<td>3. Enhancing capacity for planning and implementation of adaptation</td>
</tr>
<tr>
<td>4. Promoting coordination and synergy at the regional level and with other multilateral environmental agreements</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ELEMENT D. REPORTING, MONITORING AND REVIEW</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Monitoring the NAP process</td>
</tr>
<tr>
<td>2. Reviewing the NAP process to assess progress, effectiveness and gaps</td>
</tr>
<tr>
<td>3. Iteratively updating the national adaptation plans</td>
</tr>
<tr>
<td>4. Outreach on the NAP process and reporting on progress and effectiveness</td>
</tr>
</tbody>
</table>

---

Elements A to D for the formulation of national adaptation plans are given in the annex to decision 5/CP.17. The steps are numbered here for ease of reference, however, it is understood that countries will choose which steps are applicable for their country-specific situation, and in what order they would be undertaken.
National Climate Change Adaptation Framework 2014/15

This serves as the process to define what we are going to do develop strategy, and input is needed to enrich it.

1. Setting the scene for climate change strategy
2. Current status of climate change adaptation in South Africa
3. Climate Science
4. Governance: Roles and responsibilities
5. Sectoral Adaptation Plans
6. Provincial Adaptation Plans
7. Local government Adaptations
8. Measuring and Monitoring Progress
9. Roadmap toward NAP/Strategy
From Framework to a strategy or NAP

1. Setting the scene for CCA Strategy
   - Introduction
   - Understanding adaptation
   - Linking adaptation to mitigation
   - Policy context for CCA

3. Climate Science
   - Trends and Projections
   - Current Climate Trends
   - Climate Projections
   - Impact, vulnerability and adaptive capacity

4. Governance: Roles and Responsibilities
   - National Governance structures
   - Governance at UN Level
   - Sector Departments
   - Role of DEA
   - Role of Local Government and DEA
   - Policy Coherence

9. Roadmap toward NAP/Strategy
   - Governance Strategy
   - Climate Science and research strategy
   - Vulnerability and assessment results
   - Appraisal of adaptation options
   - Sectoral, provincial and local adaptation plan
   - Strategy for Climate Services
   - National training and capacity development strategy to support implementation
   - CCA Funding Strategy
SUMMARY OF THE PROCESS FLOW AND EXPECTED ROLES
INPUT SOURCES FOR THE STRATEGY AND ALIGNMENT

- National Adaptation Strategy
- Sector Adaptation Plan
- Local Government Response Plan
- Fine Scale VAS Downscaling
- Provincial Response Plans
- NFCS
- Policy Gap Analysis
- INPUT FROM STAKEHOLDERS

Research: LTAS, SARVA, SANAS, etc.

UNFCCC

ICCC

GLOBAL CHALLENGES

NCCRP
THANK YOU

1. What are the key elements that should be addressed in SA National Adaptation Strategy?

2. What Governance structures need to be established or used to oversee the processes?

3. Who are the key role players and how do they see their role in the process?

4. What are other potential sources of information to help the country develop the strategy and how to access them?

5. How do we address the issues of uncertainty when implementing the strategy?
