CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids\(^1\) invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).\(^2\) Collusive bidding is a \textit{pe se} prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

\(^1\) Includes price quotations, advertised competitive bids, limited bids and proposals.

\(^2\) Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1 PURPOSE

To appoint a service provider to develop the Summary for Policy-Makers Report of South Africa’s 2\textsuperscript{nd} Biennial Update Report (BUR-2) to the United Nations Framework Convention on Climate Change (UNFCCC).

2 INTRODUCTION AND BACKGROUND

The United Nations Framework Convention on Climate Change (UNFCCC) was adopted in 1992 as the basis for a global multilateral response to the threat of anthropogenic climate change. The Convention invites Parties (national states) to become signatories, and to thereby commit themselves to taking actions dependent on their common but differentiated responsibilities and respective capabilities to limit or reduce greenhouse gas (GHG) emissions that contribute to anthropogenic climate change, and to co-operate in adapting to the impacts of climate change. The government of the Republic of South Africa signed the convention in June 1993, and ratified it in August 1997. As party to this convention South Africa is obliged to comply with all the requirements of Non-Annex I parties under the UNFCCC. Amongst the requirements for the Non Annex I parties are the reporting requirements to the Conference of Parties (COP) on what the country is doing to implement the Convention. The commitment for Parties to communicate to the COP information relating to the implementation of the Convention is guided by Articles 4 and 12 of the Convention.

At the 16\textsuperscript{th} Conference of Parties (COP 16) in Cancun, Mexico in 2010, the Parties decided to enhance reporting in national communications from non-Annex I Parties on national Greenhouse Gas (GHG) inventories, mitigation actions and their effects, and support received. It was also decided that developing countries, consistent with their capabilities and the level of support provided for reporting, should submit their first BURs by December 2014 and every second year afterwards.

BURs are intended to provide updates on actions undertaken by a Party to implement the Convention, including the status of its greenhouse gas emissions and removals by sinks, as well as on the actions to reduce emissions or enhance sinks, and support needed and received to implement these actions. At the 17\textsuperscript{th} Conference of Parties (COP 17) in Durban in
2011, Parties adopted guidelines for preparation of BURs from Non-Annex I Parties (developing countries) and also agreed on the frequency of submission of BURs, which is every two years (either as a summary of parts of their national communication in the year when national communication is submitted or as a stand-alone update report. COP17 also adopted Decision 2/CP.17 that brought about a rigorous verification process for BURs from non-Annex I countries through the International Consultation Analysis (ICA) for enhanced accountability and transparency in reporting by developing country Parties. South Africa submitted its BUR-1 on 17 December 2014 which underwent ICA technical analysis in Bonn, Germany from 18 to 22 May 2015. The summary report of South Africa’s BUR-1 is available on the UNFCCC website.

South Africa is currently developing BUR-2 will be finalized in March 2017. In South Africa the BUR reports are packaged in two formats for the purposes of international and domestic reporting and for public awareness outreach programmes. The information on BUR is packed in the following reporting formats;

(i) A complete version of the BUR Report – This version is mainly intended for international reporting purposes to enable South Africa meet its international reporting obligations under the UNFCCC.

(ii) Summary for Policymakers Report – This version is mainly prepared for domestic reporting purposes to enable dissemination to the wider general public and to the policy makers. The BUR Summary for Policy Makers is intended to inform policy and decision makers about the progress the country is making in the reduction of GHG emissions and also making recommendations on which mitigation actions are relevant and consistent with the attainment of national developmental goals as well as priorities.
3 OBJECTIVES

The primary objective of this task is twofold;

(1) To summarize the content of BUR-2 and develop a Summary for Policymakers Report (SPM) in three official languages of the Department of Environmental Affairs including English, Tswana and Zulu with the view to extracting key policy response interventions that the country should embark on in response to climate change.

(2) To design and prepare the SPM report into a brochure which will be published in the three official languages of the Department of Environmental Affairs (DEA) which including English, Tswana and Zulu. This is in accordance with DEA’s language policy as derived from Government Gazette No. 40221 on the use of official languages Act 2012 (Act No.12 of 2012) published by the Minister of Environmental Affairs on the 19 August 2016.
