CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. **PURPOSE**

To appoint a service provider to assist the DEA the critical evaluation of air quality management capacity development and support programmes conducted since 2012.

2. **INTRODUCTION AND BACKGROUND**

The DEA together with the provincial departments developed Air Quality Management Capacity Development Programmes, outlining all key areas that the fraternity needed to focus on with a view to developing the necessary technical capacity within provinces and municipalities. This is to ensure the effective implementation of the National Environmental Management: Air Quality Act (Act No. 39 of 2004) (AQA). These capacity programmes have been executed through the memorandum of understanding signed between the DEA and the National Association for Clean Air (NACA) since 2012 and has been facilitated by academics within the NACA membership.

Parallel to this tailor-made capacity development programmes mentioned above, the DEA has also implemented support programmes on Atmospheric Emission Licensing and Air quality Management Planning. The DEA continued to provide technical support to provinces and municipalities with regard to all tools and regulations that the DEA has developed towards the implementation of the Air Quality Act.

Despite the fact that evaluation forms were distributed and feedback received during some of the training sessions, it is important to undertake an independent and unbiased evaluation on how these training initiatives were beneficial to the authorities, especially in the execution of their day to day air quality management functions. Hence, it is critical for the DEA to establish the level of impact that these capacity development programmes contributed and to determine whether the objectives or goals of the programmes were achieved. It is expected that the results from these assessments will be used to inform future training initiatives in the air quality management fraternity.

The project requires expertise and understanding of the evaluation tools and methodologies, their limitations, and how best to apply these tools to evaluate the effectiveness and efficiency of capacity development initiatives and support programmes.

3. **OBJECTIVE**

The overall objective of this project is to undertake a critical evaluation on the effectiveness of the air quality management capacity development and support programmes conducted since 2012 in order to inform future training initiatives in the air quality management fraternity.

4. **SCOPE AND EXTENT OF WORK**

4.1 The role of the Service Provider is to develop and conduct a comprehensive critical evaluation of air quality management capacity development and support programmes conducted to government officials since 2012 in order to:

   4.1.1 Assist DEA in understanding how well the training initiatives were received and whether the course contents have been relevant to government day to day functions as well as in bridging the
skills gaps in AQM. The DEA will provide detailed information on the training objectives and expected outcomes.

4.1.2 Evaluate how well the officials are applying or able to apply the skills acquired in improving government service imperatives.

4.1.3 Identify gaps/areas of improvements and provide the DEA with possible recommendations for future capacity development and ongoing support.

4.2 The work requires the collection, evaluation and in-depth analysis of the data by the Service Provider through an in-depth online evaluation tool, and where necessary through telephone interviews, focus group interviews, questionnaire development and analysis, and other methods.

4.3 The detailed database of the sampling frame will be provided by the DEA for the three spheres of government to be used in the evaluation.

4.4 The sample size should be at least 80 – 90% of the total frame/sample and should cover all provinces, metropolitan municipalities, district municipalities and all priority area municipalities.

4.5 The DEA will make available the feedback from evaluation forms distributed during some of the training sessions.
