THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US$ 10 million or other currency equivalent to US$ 10 million will have a NIP obligation. This threshold of US$ 10 million can be reached as follows:

(a) Any single contract with imported content exceeding US$10 million.

(b) Multiple contracts for the same goods, works or services each with imported content exceeding US$3 million awarded to one seller over a 2 year period which in total exceeds US$10 million.

(c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US$10 million.

(d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US$10 million.

1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a pro-rata basis.

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

a. the contractor and the DTI will determine the NIP obligation;
b. the contractor and the DTI will sign the NIP obligation agreement;
c. the contractor will submit a performance guarantee to the DTI;
d. the contractor will submit a business concept for consideration and approval by the DTI;
e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
f. the contractor will implement the business plans; and

g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   
a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
CERTIFICATE OF INDEPENDENT BID DETERMINATION

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

1. REQUEST FOR PROPOSAL (RFP)

1.1. The objective of this RFP is to appoint a suitable independent service provider/s that can support DEA with the determination of the number of transformers, capacitors and other receptacles with polychlorinated biphenyls (PCBs) and PCB contaminated oil.

1.2. Preference may be given to a Service Provider/s that is not already performing consultancy work within DEA.

2. INTRODUCTION AND BACKGROUND

South Africa is a Party to the Stockholm Convention which protects human health and the environment from Persistent Organic Pollutants (POPs). The Department of Environmental Affairs (DEA) is a designated national authority (DNA) tasked with the performance of administrative functions required by this Convention. The Convention started by initially listing twelve POPs chemicals of which PCBs was one of the twelve POPs. PCBs have been identified for elimination by this Convention due to its toxic nature, resistance to degradation and bioaccumulation in the environment. The Convention requires that each Party shall, with regard to the elimination of the use of polychlorinated biphenyls in equipment (e.g. transformers, capacitors or other receptacles containing liquid stocks) by 2025, subject to review by the Conference of Parties, take action in accordance with the following priorities:

- Make determined efforts to identify, label and remove from use equipment containing greater than 10 per cent polychlorinated biphenyls and volumes greater than 5 litres.
• Make determined efforts to identify, label and remove from use equipment containing greater than 0.05 per cent polychlorinated biphenyls and volumes greater than 5 litres
• Endeavour to identify and remove from use equipment containing greater than 0.005 per cent polychlorinated biphenyls and volumes greater than 0.05 litres.

During the development of the National Implementation Plan (NIP), as per the provisions of article 7 of the convention text, a framework for the implementation of the Convention, municipalities were identified as one of the potential major PCB holders, contained in their electricity generation and distribution equipment such as transformers, capacitors and other receptacles containing liquid stocks. It was also noted that currently there is no PCB inventory in the country particularly in municipalities. Therefore for the development of the proper strategy for the management of POPs an inventory of all PCBs stock in the country is crucial. As a result, in the action plan for the NIP, DEA committed to assisting the municipalities in developing their inventories which is the starting point for the identification of management options to deal with PCB containing materials. PCBs have been used in closed, partially closed and open applications. Closed applications include dielectric fluids (transformers, capacitors, microwave ovens, air conditioners, electric motors), electrical light ballads and electromagnets. Partially closed applications include hydraulic fluids, heat transfer fluids, switches, voltage regulators, circuit breakers, vacuum pumps and electrical cables. Open applications include inks, lubricants, waxes, flame retardant, adhesives, surface coatings, insulating materials, pesticides, dyes, paints, asphalt, condensate from pipelines and plasticizers. The inventory process referred in this project relates to closed systems PCBs.

3. PROBLEM ANALYSIS
In order for PCBs to be gradually phased out, the number of equipment containing PCBs and the amount of PCB and PCB contaminated oil in litres has to be determined. This data will significantly inform the next stage which is budgeting or sourcing of funds
for testing and environmentally sound disposal. Private companies are considered an income generating sector and well capable of financing the development of their own inventories. The difficulty faced by the municipalities, is the lack of capacity in terms of finance and personnel to undertake activities associated with the phasing out of PCB as they are a non-profit sector and heavily reliant on limited government taxes for the delivery of basic services to the public.

In view of this, Local Government is unlikely to prioritize undertaking a PCB inventory over the delivery of the basic services to the public. Noting that the PCB phase out period stipulated by the convention is approaching, the country is required to develop and implement strategies for their ultimate phase out. To facilitate the development of the PCB inventory appears to be the starting point for this initiative. This department would like to assist municipalities, through the development and implementation of a project which will include undertaking a PCB inventory in local municipalities that supply power to the citizens within their areas of jurisdiction including suburbs, locations and informal settlement, and probably have electricity infrastructure which would date back to when PCB equipment and oils were imported into the country.

4. SCOPE AND EXTENT OF WORK

The overall objective of the consultancy is framed as:

For the purposes of development of the PCB inventory for municipalities, to determine the number of electric PCB contained equipment including transformers, mini-sub, sub-station and capacitors and/or other receptacles and PCBs contaminated oil in local and metropolitan municipalities generation, transmission and distribution infrastructure services.

5. IMMEDIATE PROJECT OBJECTIVES

In order to contribute to the overall project objective, the consultancy has the following immediate objectives:
5.1 Immediate Objective A - Inception meeting and detailed work plan

An inception meeting is to be held where aspects of the project will be discussed and agreed upon between the consultant, DEA and COGTA, and a report of this meeting will be generated. A detailed work plan which includes a preliminary budget containing the hours and amount to be spent on each case must be developed by the consultant.

5.2 Immediate objective B - Identification of Local Municipalities where data collection will take place

For the purpose of this exercise only 100 municipalities (i.e. local and metropolitan) will be considered, and this information will be used to extrapolate for the whole country for the development of the preliminary PCB inventory for municipalities. Consultants must identify 92 local municipalities (a total of 10 in each province and a total of 12 in Gauteng province) where data collection will take place, and the criteria for the selection of these municipalities including the methodology for data collection need to be reported. The details of 8 metropolitan municipalities will be provided by the Department of Environmental Affairs.

5.3 Immediate Objective B – Introduction of the Project

During the assessment of potential holders of PCB containing and contaminated equipment the power generation sector was identified at the potential source. In South Africa, Eskom is the main generator of electricity and certain percentages of electricity generated is supplied to some of the municipalities for distribution to the end users. Therefore, it will be important to liaise with Eskom for the list of PCB containing equipment and the age (years) of equipment that are likely to be contaminated with PCBs. This information will form part of the discussions during the provincial workshops.

Before the commencement of the data collection process, workshops for local municipalities must be convened provincially, with the following objectives:

- To introduce the proposed project and to lobby for their collaboration,
- To discuss the scope of the project, and
- To agree on the data collection methodology.

5.4 Immediate Objective C – Information Gathering Process

DEA will provide the consultant with the data collection forms adapted from the UNEP Guidelines for the Identification of PCBs and Materials Containing PCBs dated August 1999. Consultants are required to ensure that the data collection forms are completed, and the following information is reflected on the forms:

- Type of equipment and location
- Size
• Serial number
• Year of manufacture
• Name of manufacturer and country of origin
• Fluid contained and volume of fluid in litres
• Power (KVA) ratings
• Condition of equipment
• Concentration of PCBs in parts per million (mg/kg)

Should the project necessitate the physical collection of information from the equipment name tags, the following should apply:

• The PCBs equipment identified must be labeled for ease of identification during the next phase of the project which entails sampling and analysis of the liquid stock.
• Other equipment was imported and will have foreign name tags, therefore the consultant will have to verify the meaning of the information reflected on the tags.
• It should be noted that PCBs were manufactured and sold under many different names; therefore, a list of other names for PCB will be required and the name used in the particular equipment should be reflected in each form.

5.5 **Immediate Objective D – Development of PCB Inventory for Municipalities**

The information obtained from the metropolitan municipalities on PCB containing or contaminated equipment will be consolidated with the information obtained during the data collection in local municipalities to make a PCB inventory for the municipality sector.
