THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US$ 10 million or other currency equivalent to US$ 10 million will have a NIP obligation. This threshold of US$ 10 million can be reached as follows:

(a) Any single contract with imported content exceeding US$10 million.

(b) Multiple contracts for the same goods, works or services each with imported content exceeding US$3 million awarded to one seller over a 2 year period which in total exceeds US$10 million.

(c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US$10 million.

(d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US$10 million.

1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a pro-rata basis.

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

a. the contractor and the DTI will determine the NIP obligation;
b. the contractor and the DTI will sign the NIP obligation agreement;
c. the contractor will submit a performance guarantee to the DTI;
d. the contractor will submit a business concept for consideration and approval by the DTI;
e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
f. the contractor will implement the business plans; and
g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

2. INTRODUCTION AND BACKGROUND

2.1 Details of the mandate to compile a Third National Communication are as follows:

2.1.1 South Africa, as a party to the United Nations Framework Convention on Climate Change (UNFCCC), has an obligation to submit National Communications (NCs) every four years and Biennial Update Reports (BURs) in between NCs to report its current standing on climate change in terms of its efforts to mitigate climate change as well as efforts and analysis in the area of adaptation;

2.1.2 In accordance with Article 4, paragraph 1 and Article 12, paragraph 1, of the Convention, each Party shall communicate to the Conference of Parties through the secretariat, the following elements of information:

2.1.2.1 A national inventory of anthropogenic emissions not controlled by the Montreal Protocol, to the extent its capacities permit, using comparable methodologies to be promoted and agreed upon by the Conference of the Parties;

2.1.2.2 Where appropriate, national programmes containing measures to mitigate, and to facilitate adequate adaptation to climate change (general description of steps taken or envisaged by the party to implement the Convention);

2.1.2.3 Any other information that the Party considers relevant to the achievement of the Objective of the Convention and suitable for inclusion in its national communication, including, if feasible, material relevant for calculations of global emission trends; and

2.1.2.4 Participation in research and systematic observations, their implementation of the framework for transfer of technology for adaptation and mitigation; actions and issues relating to climate change education, training and public awareness, capacity building as well as information and networking.

In accordance with COP decision 1/CP.16 Paragraph 60 (b), eAnnex I Parties (including South Africa) shall submit a National Communications every four years;

2.1.3 Based on 2.1.2, South Africa intends to finalise TNC by December 2016 and develop a national system supporting TNC compilation and submission within 4 years of the receipt of the funds for the actual preparation of the national communication. The national system shall be developed such that it responds to both the compilation of BURs and National Communications;

2.1.4 The TNC report submitted by South Africa shall cover, at a minimum, the inventory for the period 2000 to 2012, i.e. four inventory years behind at the time of reporting to the UNFCC.

2.1.5 The TNC report should also make reference to the previous work and transition and progress with regards to the published 1st and 2nd national communication reports to the UNFCCC.
2 NATIONAL COMMUNICATION REPORTING AND ITS GUIDELINES

2.2 The objectives of the guidelines for the preparation of the national communications from Parties not included in Annex I to the Convention (non-Annex I Parties) are as follows:

2.2.1 To assist non-Annex I Parties in meeting their reporting requirements under Article 4, paragraph 1(a), and Article 12 of the Convention;

2.2.2 To encourage the presentation of information in a consistent, transparent, complete, accurate and timely manner, taking into account specific national and domestic circumstances;

2.2.3 To enable enhanced reporting by non-Annex I Parties on mitigation actions and their effects, needs and support received, in accordance with their national circumstances, capacities and respective capabilities, and the availability of support;

2.2.4 To provide policy guidance to an operating entity of the financial mechanism for the timely provision of financial support needed by developing country Parties in order to meet the agreed full costs of preparing their biennial update reports;

2.2.5 To facilitate the presentation of information on finance, technology and capacity-building support needed and received, including for the preparation of biennial update reports;

2.2.6 To facilitate reporting by non-Annex I Parties, to the extent possible, on any economic and social consequences of response measures.

2.2.7 To allow Non-Annex I parties to provide information in their national inventories, on a gas-by-gas basis and in units of mass, estimates of anthropogenic emissions of carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O) by sources and removals by sinks. Non-Annex I Parties are also encouraged, as appropriate, to provide information on anthropogenic emissions by sources of hydrofluorocarbons (HFCs), perfluorocarbons (PFCs) and sulphur hexafluoride (SF₆).

3. OBJECTIVES

The project has 3 Immediate Objectives. Immediate Objective A, B & C. The Objectives are explained in greater detail below.

4. SCOPE AND EXTENT OF WORK

4.1 The role of the service provider/s is to research and compile the background information of South Africa’s climate as well as projections of future climate scenarios as part of the chapter 3 of the of the Third National Communication Report. Chapter 3 of the TNC covers the Measures to Adapt to Climate Change. In order for the country to effectively adapt to climate change, vulnerability assessment of the different socio-economic and natural resources sectors have to be done. The vulnerability assessment is done based on projected climate scenarios.

4.2 Immediate Objective A – The TNC is compiled is such a way that covers all the elements needed to be reported on by non-Annex-I countries. The TOR is developed for an author to conduct research and report on South Africa’s climate trends and future climate scenarios and to conduct vulnerability and adaptation assessment for the key economic sectors. The following outputs are expected and are also summarised in Table 1 below:
4.2.1 Better understanding of climate change, climate variability and the resulting sea level rise resolution:

4.2.1.1 Performance of a detailed analysis of historical climate data to detect changes at the provincial and community levels and determine current trends. Elements of this work is covered already in the Phase 1 of the Long-Term Adaptation Scenarios (LTAS). The two processes therefore have to be aligned. Any gaps that have been identified need to be researched further and addressed.

4.2.1.2 Analysis of sea level data and trends available at different locations around the country. Inputs from the LTAS phase 1 will feed into the TNC.

4.2.2 Improved climate change and sea level rise scenarios for improved projections at the spatial and temporal and geographical scales (This work may be an expansion of the work done in the LTAS phase 1) and similar work is also about to resume on fine scale projections at provincial level:

4.2.2.1 The latest GCMs and RCMs are tested and the best used for projecting climate scenarios for vulnerability and adaptation assessments.

4.2.2.2 Improved climate change and sea level rise scenarios are generated at the local, national and regional levels for different time-steps up to the 2100 time horizon are generated. Work has already been done through LTAS. Service provider’s role is to address gaps particularly in relation to fine scale representation (local and regional presentation of sea-level rise).

4.2.2.3 Projected sea level rise are available for impact assessment on the coastal zone and other related activities.

4.2.3 Socio-economic scenarios developed, approved by government and made available for use when implementing the Convention (This work may be expansion of work done in phase 2 of the LTAS):

4.2.3.1 Socio-economic scenarios developed for use in the evaluation of adaptation measures.

4.2.3.2 Risk assessments made and vulnerability indices developed for most probable climatic risks and extremes. DEA and service provider will jointly identify and address gaps in a separate set of ToRs. The service provider will also develop a risk assessment methodology that is widely accepted by the adaptation community and easy to implement. Vulnerability indices should also be developed for all the sectors assessed in the LTAS

4.2.4 Improved vulnerability and adaptation assessments of key socio-economic sectors. (This work should be done in consistent with Phase 2 of the LTAS):

4.2.4.1 Indepth impact assessments of climate change on the Agriculture, Water Resources, Forest and other terrestrial Ecosystems, Coastal Zone and Health sectors are completed. This work has already been covered in the LTAS and only a synthesis is required.

4.2.4.2 Adaptation assessments including the socio-economic aspects for the sectors Agriculture, Water Resources, Forest and other Terrestrial
Ecosystems, Coastal Zone and Health are completed.

4.2.5 More informed decisions based on outputs and enabling mainstreaming of adaptation climate change into development plans. (This work should be done in consistent with Phase 2 of the LTAS):

4.2.5.1 The more reliable vulnerability and adaptation assessments enabling the development of an adaptation strategy based on prioritization of key activities within sectors. The author should also take into account and mention what is being done at policy level to implement adaptation strategies. The Department is currently in the process of developing the National Adaptation Strategy. In carrying out 4.2.5.1, the service provider should also document existing sectoral adaptation plans and other activities which will be aligned or build into the national adaptation strategy in line with the UNFCCC guidelines.

4.2.5.2 Spatial vulnerability profiles in GIS format produced at local and national levels based on vulnerability indices for different sectors and sub sectors produced.

4.2.6 More appropriate planning for concrete actions to adapt to climate change impacts:

4.2.6.1 A robust national adaptation plan with both short term and long term strategies is ready for implementation and taking into special consideration the poorer rural population as well as the economic engines. The work has already been covered in 4.2.4.1. The service provider needs to look into existing into models, policies and strategies.

4.2.6.2 A series of project briefs prepared and ready for development for funding

4.3 Immediate Objective B (Draft Chapter 3 of the TNC) – The TNC will be subjected to an independent review and as part of public consultation process for the whole TNC report to ensure quality and credibility that warrants submission to the United Nations Framework Convention on Climate Change (UNFCCC) secretariat by December 2016. The author shall work with both independent reviewers and the consultants integrating all chapters to address both independent review and public consultation comments. The outputs associated with this immediate objective are as follows:

4.3.1 An independent review comment and response database – a populated table that lists, at least: the source of comments; the comment; a cross-reference to the TNC; and proposed responses to the comments.

4.3.2 An independent review and response report – a report that provides an analysis of the comment and response database including, among others: an analysis of comment sources; areas of common concern; issues that are better addressed in future National Communications; and recommendations on how key and/or common comments should be addressed.

4.3.3 A public consultation comment and response database – a populated table that lists, at least: the source of comments; the comment; a cross-reference to the TNC; and proposed responses to the comments.

4.3.4 A public consultation public comment and response report – a report that provides an analysis of the comment and response database including, among others: an analysis of comment sources; areas of common concern; issues that are better addressed in future National Communications; and recommendations on how key and/or common comments should be addressed.

The key guiding principle for the development of the SPM is that it is policy relevant as opposed to being policy prescriptive. The SPM should not be more than 10 pages long and should be written in such a way that its content is accessible to policy makers and the general public.

4.5 In addition to the outputs highlighted in sections 4.2, 4.3, and 4.4 above, the service providers shall;

4.5.1 Formally submit the 1st chapter of the TNC to the department in electronic copies (preferably on individual memory sticks);
