CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE

To appoint a service provider to manage the pre-feasibility investigation process in relation to the establishment of an infrastructure within the Port St Johns Local Municipality Beach areas.

2. INTRODUCTION AND BACKGROUND

2.1 Port St Johns has experienced increasing number of shark attacks in their Second Beach since 2004. Second Beach is a popular recreational swimming and surfing spot in the area and cited as key to the growth of the Port St Johns local economy.

2.2 The department, in response to a call for intervention in the shark attacks matter, is involved in the area through various initiatives including:

- Working for the Coast Project and
- The engagement of the KwaZulu - Natal Sharks Board (Sharks Board) to undertake scientific study to determine the type and behavior of the shark responsible for these attacks and how these could be mitigated.

2.3 In addition to the above, the department resolved to initiate pre-feasibility and feasibility studies as first steps towards the ultimate development of an infrastructure that could:

a) Provide alternatives to beach swimming or improve chances of safe swimming in the Second Beach area,

b) Contribute to the economic prospects of Port St Johns that are related to tourism, as well as

c) Facilitate investigations of effective and sustainable solutions to the problem of shark attacks experienced in Port St Johns.

2.4 The Department of Environmental Affairs (The department), with the support of the Port St Johns Local Municipality, seeks to undertake a pre-feasibility study to establish whether it could be worthwhile for government to establish infrastructure around the beach areas of Port St Johns, and where the study indicates odds against the envisaged infrastructure, receive clear recommendations on mitigation measures that government can take to address identified factors that negatively affect their feasibility.

3. OBJECTIVES

3.1 The department’s involvement in this initiative is to facilitate development of this infrastructure through the implementation of feasibility studies (both pre - and full feasibility) with the intention that government, broadly, buys in to the full develop of this infrastructure if feasible.
3.2 The pre-feasibility study should indicate flaws, if any, to the development of infrastructure in the focus area and what would need to be determined very clearly in the full feasibility study to address these in order to make the envisaged infrastructure a reality.

3.3 The service provider to be appointed (in terms of these terms of reference) will assist the department to define work to be covered in the pre-feasibility study, manage service providers appointed by the department. It is envisaged that, subject to satisfactory performance, the same service provider (project manager) will assist the department to engage and manage the process for the full-feasibility study, if the pre-feasibility study gives an indication to government to move ahead. However, this will be run on new contract separate from this at the appropriate time.

4. **SCOPE AND EXTENT OF WORK**

a. **Services required**

Taking into account the physical and environmental properties of the area, especially its ocean and coastal dynamics, the social and economic challenges faced by Port St Johns, the Department of Environmental Affairs (the department) invites proposals and quotations/ bids from suitable individuals or organizations to:

i. Detail the scope of work necessary for an appropriate, useful and informative pre-feasibility study to be undertaken to inform government on viability of the envisaged infrastructure,

ii. Determine and advise the department on the Costs, Time Schedule as well as Risks and their Mitigation Plans in relation to conducting the pre-feasibility project,

iii. Advise the department on the identification of appropriate pre-requisite criteria to select a suitable service provider to undertake the pre-feasibility study for the envisaged infrastructure,

iv. Advise the department on the development of management tools as well as technical considerations for contracting with the service provider,

v. Manage the project and the successful service provider to ensure completion of the project,

vi. Present and implement their proposed skills transfer to the designated staff member involved in the project,

vii. Ensure appropriate compilation and communication of the study report or reports to DEA and other relevant parties in a manner conducive to decision-making, as well as

viii. Any relevant task related to the successful undertaking of the pre-feasibility and its communication.
b. Period of engagement (Time Frame)
   i. Period of the Project Management appointment: The period for the management of the pre-feasibility process shall be for a period of twelve (12) months from the date of signing the service level agreement.
   
   ii. Pre-feasibility service provider sourcing: The sourcing of the pre-feasibility service provider will be expected to be initiated within a two (2) months of the Project Manager - Service Provider having been appointed.

   iii. Full Feasibility: Depending on the recommendations of the pre-feasibility study report, it is the department's intention to source a service provider to conduct the full feasibility study immediately on completion of the pre-feasibility study. Subject to satisfactory performance and in the interest of continuity, a service provider assisting the department to manage the pre-feasibility study may be appointed to assist the department to manage the full feasibility study process.

c. Areas of focus: The primary area of focus for the pre-feasibility study is Second Beach, within the Port St Johns Municipal area, however, it is emphasized that other areas of Manteku, Agate, First Beach, Third beach, Mpande and Umngazi will have to be considered as secondary possible areas for pre-feasibility study (See attached Map)

d. Minimum performance requirements
   i. Maintain strictest sense of confidentiality in dealing with information they become privy to in conducting the work for the department.
   
   ii. Understand that they are held in a position of trust and thus must ensure accuracy and quality of information and product they provide to and or accept for government.

   iii. At all times declare any information that may lead to their conflict of interest in relation to this project.

   iv. The service provider shall demonstrate experience and insight in conducting of feasibility studies that involve development in sensitive and risky areas such as the coast and take into account socio-economic considerations.

   v. A person of appropriate seniority, experience and qualification will be designated by the service provider to undertake the role defined in these terms of reference.

e. **Detailed project implementation plan and methodology**

The project is mainly for the management of service providers to undertake pre-feasibility study for the infrastructure explained above. While the feasibility is mainly a desk top investigation of the area, the following should be taken into account:

- *Provision* should be made for at least two additional visits to the Port St Johns area during the working of the service providers on pre-feasibility study. Any other visit shall have to be agreed to between the department and service provider during the term of the contract.

f. **Service Provider Responsibilities on Safety and Environment Impact**

The Port St Johns, the area for which the pre-feasibility is intended, is a sensitive coastal area as well as a highly dynamic coastal area. The risks inherent in this project, broadly, must be explained and addressed consistently throughout these studies so that they could be adequately addressed in future design and construction plans; should the studies point to feasibility of the beach infrastructure.

g. **Plans and drawings, if applicable**

Maps or plans may be included as part of the investigation.
