1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE

1.1. To appoint the Service Provider to assist the Department of Environmental Affairs with the development of an Estuarine Management Plan (EMP) for Richards Bay estuary.

1.2. To undertake a coordinated management of South African estuaries, the development of the EMP is required in terms of Chapter 4, Section 34 of the National Environmental Management: Integrated Coastal Management Act, 2008 (Act 24 of 2008) (“Act”) and the National Estuarine Management Protocol of 2013 (“the Protocol”) as the guiding document for the development and implementation of the EMPs. In addition, the EMP must be consistent with the National Coastal Management Programme. Furthermore, the Department has developed a holistic and inclusive “Guidelines for the development and implementation of Estuarine Management Plans” (EMPs) to supplement the Protocol in providing clear procedures and guidance to the responsible management authority who develop and coordinate the implementation of EMPs.

2. INTRODUCTION AND BACKGROUND

1.1. Estuarine ecosystems are not isolated but complex systems, because they are subjected to influences from marine, riverine and terrestrial ecosystems. They form a connection between marine and freshwater systems and are part of regional, national and global ecosystems either directly via water flows or indirectly through the movement of fauna. In addition to the biota that these estuaries support, they are characterized by high biodiversity and productivity; and provide a range of environmental and socio-economic benefits. Disturbances in one estuary can influence a wide variety of ecological processes and affect socio-economic benefits. Therefore, to achieve greater harmony between ecological processes and human
activities while promoting sustainable use of estuarine resources, an Estuarine Management Plan (EMP) is require.

1.2 Need for estuarine management plans:

The ecosystem services provided by South African estuaries –and the associated value –are increasingly been threatened by human activities and large scale environmental change. The National Biodiversity Assessment (NBA 2011) identified five main pressures impacting on these valuable resources, namely;

a) Flow modification (e.g. water abstraction, alien plants, forestation, increased urban runoff)

b) Pollution (e.g. agriculture, waste water treatment works, industrial, sediment)

c) Exploitation of living resources (e.g. fish, invertebrates, and mangroves)

d) Habitat destruction (e.g. low lying developments, bridges, jetties, and other structures in and around the estuaries, mining)

e) Climate change (e.g. as reflected in modification in rainfall, changes in temperature, increased storminess and sea level rise).

To realise and maximise the benefits (ecosystem services) from estuarine resources, growth and development must be achieved based on sound sustainability principles. Estuarine resources are already in a declining state and this is exacerbated by potential impacts emanating from the pressures.

3. OBJECTIVES OF THE PROPOSAL

3.1. The appointed service provider is expected to fulfil and carry out the following two main objectives:

Objective 1: Scoping Phase

The service provider is expected to review all existing local information in the form of local research reports and management processes. This information is available in the form of maps and reports from various government departments, agencies and research institutions. It is imperative that local
knowledge is considered during this phase. The information should be collated in the form of a Situation Assessment Report (SAR). The SAR should also highlight any major information gaps and the recommendation to address these. A geographical description and map of the estuary should be developed identifying different habitats and potential and existing management zones. The map should identify and record all developments within the estuarine functional zone (EFZ). The possible direct impacts of these and other local developments should be noted.

Objective 2: Estuary Management Plan (EMP)

The Objective Setting Phase (2) involves the development of the EMP in consultation with key stakeholders. This development process is informed by the Situation Assessment conducted in the Scoping phase. In accordance with the Protocol, the EMP must include the following components.

4. SCOPE/ EXTENT OF WORK

4.1. Scoping phase is a crucial part of the assignment as stakeholder support in this initiative is essential. The description of the current situation should include information on:

- Description of the legislative instruments that are currently applicable to the effective management of the estuary, including existing and planned management strategies/plans (i.e. catchment management strategies, IDP, SDF, Coastal Management Programmes, etc.) and their relevance to the proposed management of the estuary;
- Provide a detailed understanding of the structure (abiotic and biotic components), functioning and state of the estuary, including the underlying processes and drivers. This should also include the Reserve for the estuary if it has been determined (or identify the need for determining a reserve) and indicate the present ecological state of the estuary where possible
• Description of socio-economic context (demographic, economic profile, etc.) and the level/s of dependence of local communities on the estuary. This will include assessment of the opportunities and constraints within the ecological system (including potential carrying capacity for activities), taking into account its current and recommended ecological state and limits of acceptable change where available; Conservation Planning (Protected Areas, Ramsar sites etc.).

• Identify the goods and services or human use activities and their impacts or potential impacts on the present ecological state of the estuary

• Current institutional structures governing estuarine issues

• Finally, an assessment of the opportunities and constraints (e.g. legal obligations, constraints of tenure, prior usage, health and safety, natural hazards) should be done to guide the development of the EMP.

The estuary should be represented spatially in the form of a GIS Map indicating the following:

Important biophysical features (open channel area, Macrophyte beds, Invertebrate (prawn) beds, saline and freshwater interfaces etc.); All protected/conservation areas; Areas earmarked for rehabilitation; Land-use and planning provisions of surrounding lands; Infrastructure (e.g. roads, bridges); Cultural & heritage sites; Recreational activities (e.g. swimming, boating etc.); Living resource exploitation (e.g. bait collection, fishing areas, etc.); Mariculture activities; Riverine and groundwater inflows; Wastewater discharges (i.e. sewage, industrial waste); Storm-water drains; Solid waste dump sites (current and historical); Water circulation and sediment transport systems

More specifically, the service provider will be required to:

a) Review of legislation and how it pertains to the management of environmental threats within the Estuary

Review governmental legislation, e.g. national, provincial, regional and local (i.e. DWAF 1999: Resource Directed Measures for the Protection of Water Resources, National Environmental Management Act etc.). Requirements,
linkages and overlaps with existing management plans and strategies (required by legislation) should be documented, e.g. IDPs and SDF’s.

The arrangements for co-operative governance or management should then be assessed in relation to the existing legislation and available capacity. Procedures for the establishment or use of a local forum should be delineated and an optimum management scenario identified in association with local stakeholders.

It is important for the service provider to explain exactly how this legislation impact on this specific estuary (Richards Bay harbour estuary), as the structure and function of individual estuaries, as well as the managerial interaction of the respective governmental departments will vary. An assessment of local by-laws also needs to be included.

b) Determine the goods and services provided by the estuary

Identify the various goods and services provided by the specific estuary (both existing and potential), as well as the means to ensure the continued provision of these services. Where possible, quantify the economic value of the different goods and services. Consult the C.A.P.E. Estuaries Programme document addressing estuary classification, prioritization, protection and rehabilitation for guidance.

c) Identify issues relating to the exploitation of living resources

Describe the degree to which exploitation of living resources occurs in the estuary and its potential impact on the goods and services provided by the system, such as the levels of consumptive use that can be sustained by fishing, bait harvesting, Mari-culture etc. Include the limits to exploitation, such as access (Port no-go areas) and contamination (such as sewage, heavy metals, persistent organic pollutants, etc.).

d) Assess the water quantity and quality requirements
Synthesize all available information on the current freshwater flows (e.g. ground water, river flow and effluent) entering the estuary and the relationship between these and water quality and mouth condition. This synthesis should be integrated with the DWS Reserve process for the specific river and estuary, where appropriate. It should also include a sand budget and dredging assessment (TNPA to assist with the information).

This can include a desk top assessment of land use practices in the overall catchment, as well as the damage caused by specific land use practices within the estuary itself. This process should be conducted through the Catchment Management Agency (under the National Water Act). The transformation of habitats by the changes in water flow or the impacts of altered or polluted flows on the biota within the estuary (present and historic) should also be addressed.

The findings of existing and future national and regional evaluations done for the DWS and/or DEA, such as the classification and prioritization of South African estuaries on the basis of health and conservation priority status for the determination of estuarine water reserves must be incorporated.

e) Determine priority restoration actions

Within the specific estuary, identify sections where restoration is required and suggest potential means of rehabilitation. More specifically, the impacts of the different land use practices both in the catchment and estuary should be identified.

Degraded areas, as well as proposed rehabilitation measures, should be highlighted to assist managers with future rehabilitation efforts, through an understanding of the gravity of the various types of degradation. A list of all available degradation profiles and for each specific estuary should be provided. This should include all successful and potential rehabilitation options associated with each type of degradation. In addition, monitoring programmes should be suggested for the rehabilitation of each degradation profile.
f) **Determine protected area potential**

Indicate whether a specific estuary is suitable for inclusion in the future network of Protected Areas (MPA, PA, RAMSAR, NHS etc.) in KwaZulu Natal province. Both specific requirements of the listed conservation area type and the associated application procedure that results in declaration should be described.

g) **Awareness-raising and public participation/stakeholder involvement**

The service provider should develop a generic awareness programme for the estuary as part of the EMP (Objective 2). It should relate to what estuaries are, the environmental roles they play and the goods and services that they provide. The valuation of the roles, goods and services must be addressed. This section must highlight the threats to estuaries, as well as how the implementation of existing legislation and political support can aid the management of these systems.

In addition, processes for involving relevant stakeholders and user groups in estuary management and decision-making should be provided.

4.2. **Objective Setting Phase** involves the development of the EMP in consultation with key stakeholders and should include information on:

- An executive summary of the Situation Assessment Report (SAR) that highlights the key information that would inform and/or influence the management decisions within the estuary;
- A geographical description and a map of the estuary based on the Estuarine Functional Zone (EFZ) clearly identifying the boundaries of the system.
- The local vision and objectives that give effect to the strategic vision and objectives of the protocol;
- A list of management objectives and activities, that at minimum addresses the following: conservation and utilization of living and non-living resources (taking into account the priority biodiversity list in the 2011 National Biodiversity Assessment and subsequent updates), social issues, land-use and
infrastructure planning and development, water quality and quantity, climate change, education and awareness; compliance and enforcement, and any other activities that will be required to maintain and or improve the condition of the estuary;

- Details of intended spatial zonation of the estuary specifying activities that may or may not take place in different sections of the estuary, and indicating:
  - which organs of state will need to be consulted given the type of zonation that is proposed; and
  - which organs of state will need to enact the relevant laws to implement the proposed zonation (for example if a no-fishing zone is proposed then either DAFF or the Department will be required to consider declaring a closed area or a protected area, respectively);

- A detailed integrated monitoring plan with a list of performance indicators for gauging the progress with respect to achieving the objectives of the EMP; and

- Details of the institutional capacity and arrangements required for managing different elements of the EMP, taking into account different departmental mandates.

- should identify key research needs for the effective management of the estuary

The EMP should identify management actions to be addressed by the responsible government departments (as per their legislative mandates). The management actions will be translated into project plans (including human and financial) as an implementation plan within a period of five year.

CERTIFICATE OF INDEPENDENT QUOTATION DETERMINATION

1  This Standard Bidding Document (SBD) must form part of all quotations¹ invited.

2  Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a per se prohibition meaning that it cannot be justified under any grounds.

3  Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the quotation of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4  This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when quotations are considered, reasonable steps are taken to prevent any form of quotation-rigging.

5  In order to give effect to the above, the attached Certificate of Quotation Determination (SBD 9) must be completed and submitted with the quotation:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
CERTIFICATE OF INDEPENDENT QUOTATION DETERMINATION

I, the undersigned, in submitting the accompanying quotation:

(Name of Institution)

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.

   (b) geographical area where product or service will be rendered (market allocation)
   
   (c) methods, factors or formulas used to calculate prices;

   (e) the submission of a quotation which does not meet the specifications and conditions of the quotation; or
   
   (f) bidding with the intention not to win the quotation.

8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this quotation invitation relates.

9. The terms of the accompanying quotation have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.
10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No 12 of 2004 or any other applicable legislation.
