CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

In addition, the service provider will be required to integrate the new system with that currently operational at 14 Loop Street, Condor House and 63 Strand Street in Cape Town.

2. INTRODUCTION AND BACKGROUND

2.1 The Department of Environmental Affairs (DEA) currently occupies various buildings in Cape Town. Access to the East Pier 1 and 2 buildings is mainly exercised by the security staff appointed to manage the quayside in conjunction with the service provider appointed by the vessel management service provider.

2.2 The second floor, Foretrust building has a card system, which is managed by another government department, who is the main tenant in the building.

2.3 With the departure of the Department from Fedsure Forum Building to Environment House in Pretoria, most of the bio-metric access control readers were removed and made available for installation in Cape Town. However, the monitoring system was not made available. It is the Department’s intention to secure East Pier Buildings 1 & 2 by appointing a service provider to assess the current equipment and install an access control system, which will also be integrated with the one currently in use at the Condor House, Port Road, V&A Waterfront, 63 Strand Street as well as the 14 Loop Street premises in Cape Town.

- The service provider must install Sagem – 500 series biometric readers.
- The biometric access control unit (Sagem – Model: MA500) has to be able to function with the automatic roller doors, so when you place your finger on the biometric reader the roller door should automatically open or close.
- The supplier is requested to consult with roller door manufacturer to ensure that the guarantees are still in place after the above installation.
- All 40 biometric readers, which will be provided by the Department need to be assessed and tested by bidders for installation at the two sites.
- A MorphoAccess® Enrolment and Management System (**MEMS**) control panel is to be installed in a secured office or server room to add and delete users to the access control system.
- **MEMS** is the enrolment and administration tool for MorphoAccess® access control and time & attendance terminals. It allows the administrator to create and manage users, terminals, servers, databases, logs, statistics, etc., thus enhancing the system's overall performance.
• The service provider must install an emergency override switch to deactivate the magnetic locks on the doors in the case of emergencies and power failures. This system needs to be integrated with existing fire alarms in each of the buildings.
• A back up power supply must be installed at each door where the readers are located with the battery life of at least 30 minutes in case of power failure.
• The system is to be connected to the latest Cisco 24 port switch and the Department will provide a desktop for the installation of the software for the biometric readers.
