CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE

To appoint a service provider to review the 2\textsuperscript{nd} South Africa Environment Outlook (SAEO) report and compile the 3\textsuperscript{rd} SAEO synthesis report on behalf of the Department of Environmental Affairs (DEA).

2. INTRODUCTION AND BACKGROUND

2.1 The SAEO is a report required in terms of the National Environmental Management Laws Second Amendment Act (No.30 of 2013). It is a critical tool that provides objective, accurate and scientifically credible information on the condition and prospects of the environment. The first publication of the SAEO report was released in 2006, and was followed by the 2\textsuperscript{nd} report officially released in 2016.

2.2 The 2\textsuperscript{nd} SAEO report released in 2016 consists of four parts which are structured as follows:

2.2.1 Part I which is an introductory part which sets the scene for the report. The following chapters have been discussed in detail under Part I: introduction; what is affecting our environment; sustainability in South Africa; governance; and human settlements;

2.2.2 Part II which consists of specialist chapters which discuss the current environmental state in terms of specific themes and identify theme-specific trends in environmental change. The eight specialist chapters are: land; biodiversity and ecosystem health; inland water; oceans and coasts; air quality; climate change; energy; and waste management;

2.2.3 Part III which is the environmental outlook section which shapes the information on environmental trends from the specialist chapters within possible future scenarios in order to anticipate the strategic decisions and actions that need to be taken in order to avoid environmental degradation; and,

2.2.4 Part IV which explores different options for action to guide policy formulation and decision making processes.

2.3 The 2\textsuperscript{nd} SAEO report was released together with a standalone executive summary report which summarized a national ‘big picture’ that portrays how South Africa is
performing in terms of short- and long-term responses to changing conditions and to assess the effects of human interventions and management actions. The executive summary report also highlighted trends in the state of environment in relation to nine thematic areas (i.e. human settlements, land, biodiversity and ecosystem health, inland water, oceans and coasts, air quality, climate change, energy, and waste management). The report further reflected on the positive gains, looking at the future, areas for action, and the implementation framework.

2.4 Subsequent to the release of the 2nd SAEO report, the DEA carried out a process of investigating the availability, accessibility and cost of data in preparation for the review and update of the report. The DEA further collected, processed and analyzed data for 9 thematic areas namely: human settlement, inland water, air quality, ocean and coast, waste management, climate change, biodiversity and ecosystem health, energy and land.

2.5 During the investigation process 110 SAEO indicators reported upon in the 2nd SAEO were investigated in terms of data availability, accessibility and cost however, during the data analysis, collection, and processing exercise only 46 indicators were updated for the various thematic areas, and the remaining indicators are still to be updated. Indicator factsheets (one pager) were compiled in relation to the 46 updated indicators.

2.6 Noting that the reporting cut-off date for the 2nd SAEO report and the executive summary report was 2012, the DEA took a decision to review the report released in 2016 and compile the 3rd SAEO synthesis report.

3. **OBJECTIVES**

3.1 The objective of this exercise is to appoint a service provider to compile the 3rd SAEO synthesis report that will provide objective, accurate and scientifically credible information about the condition and prospects of the environment in such a manner that it will be informative for all, including general public, decision- and policy-makers.

4. **SCOPE AND EXTENT OF WORK**

4.1 The role of the service provider is to carry out the following tasks on behalf of the DEA:
4.1.1 Review the 2nd SAEO report and the executive summary report in order to compile the 3rd SAEO synthesis report;

4.1.2. Identify issues or sections in the 2nd SAEO report that are outdated and improve such accordingly. This must take into account all key indicators reported upon in the 2nd SAEO report. The DEA will make available all the one pager Indicators Factsheets (46) produced during the process of collecting, processing and analysing the data. Noting that the DEA only managed to collect data for 46 indicators (out of 110) the sourcing of addition data in relation to the remaining indicators need to be carried out as part of the scope of work for this project. The source material collected during the process of collecting, processing and analysing the data will also be made available by the DEA.

4.1.3. Conduct additional research, literature review and collect source material to enhance the global, regional, national, provincial and local trends and discussion in the new report to be compiled. This will include reviewing all relevant global, regional, national, provincial and metropolitan Environment Outlook reports. The process must also take cognisance of other planning documents such as National Development Plan, Delivery Agreement on Government Outcomes, Sustainable Development Goals (including associated targets and indicators), Agenda 2063, and all other related plans and strategies.

4.1.4 Compile the 3rd SAEO synthesis report using the relevant and credible data and information gathered during the research and literature review. The Driver, Pressure, State, Impact and Response (DPSIR) reporting framework or a hybrid must be applied during the writing process in order to ensure that there is harmony and linkages in different sections of the report. The report must include high quality (300 dpi or more) diagrams, maps, graphs tables and proper references list.

4.1.5 Organise stakeholder engagements workshops and present the draft reports to the Project Steering Committee (PSC) and relevant key stakeholders. It is envisaged that two national consultation workshops will be held in the duration of the workshop. The venue and refreshments for the workshops will be provided by the DEA.

4.1.6 Identify peer reviewers and facilitate the process of peer reviewing the content of the report.
4.1.7 Incorporate comments/inputs received from the stakeholder consultation process, including from the peer reviewing process.

4.1.8 Provider the copy editing service mainly focusing on readability, grammar, tone and pitch of the report. The outcome must be an easy to read report that is comprehensible to a broad spectrum of potential readers that are interested in finding out more about the state of South Africa’s environment.

4.1.9 Edit all the diagrams, graphics, tables, maps and labelling them accordingly in order to ensure consistency throughout the report.

4.1.10 Prepare design and layout of the report and ensure that the diagrams, graphics, tables, and maps are aligned consistently in terms of size and colour. The diagrams, graphics, tables, maps must also be aligned with relevant text and referenced according in the text.

4.1.11 Source all necessary photographs to enhance the design of the report.

4.1.12 Submit to the DEA two hard copies, a soft copy of a word version and a print ready PDF version of the report for sign off. Upon sign off of the report all the raw data, graphs drawn, high resolution images, maps (300 dpi or higher) used in the report must be submitted to the DEA.

5. EXPECTED DELIVERABLES / OUTCOMES

5.1. The following are expected deliverables:

5.1.1 Literature review report covering issues or sections of the 2\textsuperscript{nd} SAEO report that require to be reviewed and a list of indicators to be reported upon in the 3\textsuperscript{rd} report. The literature review report must also include the proposed a \textit{table of content} for the 3\textsuperscript{rd} SAEO synthesis report;
