CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. **PURPOSE**
   To appoint a service provider to conduct feasibility studies to determine the optimal economic benefits that communities can derive from their communal areas and development of associated business plans, for the 6 independent clustered sites.

2. **INTRODUCTION AND BACKGROUND**
   In South Africa the process of land reform has made significant progress in distributing and restituting land back into the hands of local communities. In a remote context, communities have claimed back private game reserves, portions of national parks and provincial nature reserves. These areas are often prime tourism destinations in the country. The challenge is that communities are not equipped with the expertise and investment capital to take over and maintain these areas as functional economic units. This means a loss of productivity and jobs and it's unsustainable for the communities, who loose income and are experience disruption to society. If this takes place in the context of nature reserves, functional processes are not maintained with the resultant loss of biodiversity due to threatened species not being protected; access and benefit sharing is not optimized; the value of the ecosystem services is not shared; and the end result is that the land use is not optimized for community beneficiation. Therefore, the Department of Environmental Affairs have prioritised the potential areas to be studied, to investigate the economic potential and develop the business plans for possible business opportunities. Undertaking this project will contribute to the attainment of the Department’s vision to ensure the sustainable utilisation of biological resources by communities to sustain their livelihoods. Finally, the successful implementation of this project would contribute towards poverty reduction, the sustainable use of indigenous biological resources and job creation to stimulate the local economy of the country.

3. **OBJECTIVES**
