CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Standard Bidding Document (SBD) must form part of all bids\(^1\) invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).\(^2\) Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

---

\(^1\) Includes price quotations, advertised competitive bids, limited bids and proposals.

\(^2\) Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE
To appoint a service provider to conduct a study on status quo and policy options for separation of waste at source

2. INTRODUCTION AND BACKGROUND
2.1 The National Environmental Management Act :Waste Act 2008 “s objectives are to protect the health, well-being and the environment by providing reasonable measures for treating and safely disposing of waste as a last resort
2.2 Goal 1 of the National Waste Management Strategy highlighted the need for metropolitan municipalities, secondary cities and large towns to have initiated waste separation at source by 2016.
2.3 The 2012 Waste Information Baseline report indicates that only 10% of the total general waste that is Generated in South Africa is recycled
2.4 One of the behaviours that has been shown to improve the recycling rate is separation of waste at source. There is a need to understand how the separation of waste at source behaviour can be influenced by specific variables.
2.5 Separation of waste at source has an influence on the quality and quantity of waste that is destined for treatment (recycling and/or waste-to-energy recovery).
2.6 Any separation of waste at source needs to include awareness, values and motivation in order to be effective as outlined by theory of planned behaviour.
2.7 The status quo and policy options that has the aim to maximize separation of waste at source needs to include the following interventions:
   a. Pro-environmental Behaviour Programmes and Campaigns: targeted at households and waste generators in general.
   b. Knowledge and value driven interventions: Demand and supply of secondary materials as well as technologies that are available to treat separated waste
   c. Equipment: Motivation that could also be linked to participant’s proximity to designated recyclable collection points
2.8 The separation of waste at source is linked to collection, transfer and transport of recyclables.
2.9 Other studies have shown that provision of incentives for separation of waste at source brings about increased participation by households. These incentives can take different forms:
   a. Reward granting
   b. Free collection service; and
   c. Additional income
3. OBJECTIVES
The project will enable the department to:
To have an understanding on the inclusive status quo as well as policy options for separation of waste at source.

4. SCOPE AND EXTENT OF WORK
4.1 Extent of separation of waste at source in all metropolitan municipalities, all secondary cities and all large towns in the country:
- How many municipalities have implemented waste separation at source initiatives with regard to status quo?
- What is the coverage of the separation at source initiative as a percentage of the total households?
- How many municipalities recognise household hazardous waste as a separate fraction requiring specific management?
- How many municipalities allow for collection of household hazardous waste for example e-waste, old paints, pesticides, nappies etc?
- What has been the resident’s participation rate in these initiatives? (zoom into an area and finding out how many households are participating)
- What factors have proven to mostly influence household behaviour separation of source?
- What source at separation approaches/models has been shown to yield the highest volumes of recyclables with the least cost input? Indicate various models /spatial coverage and explained in terms of their cost effectiveness on the municipality in terms of budget
- What incentives and disincentives has been part of the separation at source initiative to the households? Recommendations with this regard should be made.
- Identify key players in the space and what role are they playing
- What role is played by the waste pickers with this regard to accessing the separated waste?
- What role is played by the producer responsibility organisations in assisting the municipality by ensuring that the waste is not contaminated from the households?
- What waste infrastructure has been set up to support household separation at source? (e.g. separate vehicle fleet, separate bin, separate plastic bag, etc.)
- Does the municipality sell the collected recyclables? If not, what cost recovery mechanism has been put in place?
- What challenges and deficiencies have been identified along the implementation of waste separation at source?
• What are the separated waste collection measures that have been put in place? (i.e. Are recyclables collected on the same day by the same truck that collects residual waste?)
• How do the different South African separation of waste at source compare with that of the rest of the world? (comparing with 3 developing and 3 developed countries)
• What is the status quo with regard to readiness of municipalities which have not yet implemented waste separation at source?
• What are the key options consideration on separation at source that needs to be in place to support an effective implementation?
• Who will be most impacted by those options? Do they have current policy instruments and/or measures that could justify not proceeding with this policy options?
• What other enabling instruments need to be concurrent with the identified options for separation at source and proper management of the hazardous waste?
  o Different mandatory separation at source provincial policies and/or municipal by-laws existing in the country
  o Governing legislation and legal obligations
4.2 Analysis (including the Socio-Economic Impact Assessment) of different appropriate policy instrument options informed by South Africa’s experiences and other lessons from other countries Social Economic impacts analysis of separation at source including options but not limited to Incentives, Levies, Norms & Standards or Regulation
4.3 What several options are recommended for separation at source options

15 Qualifying Small Enterprise (QSE)

A business with an annual turnover more than R10 million but less than R50 million qualifies as a Qualifying Smaller Enterprise (QSE). The QSE scorecard was gazetted in May 2015.

All QSE’s are required to use all 5 elements on the amended BEE Scorecard:

1. Ownership
2. Management Control
3. Skills Development
4. Enterprise and Supplier Development
5. Socio-Economic Development

A QSE which is 100% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

Please note a QSE for Specialised Enterprises which is 75% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

QSEs are required to qualify under one of the following criteria in order to receive a QSE certificate:

- At least 25% of costs of sales excluding labour costs and depreciation must be procured from local producers or local supplier in SA (for service industry labour cost are included but capped to 15%)
- 50% of jobs created are for black people provided that the number of black employees since the immediate prior verified B-BBEE measurement is maintained.
- At least 25% transformation of raw material/beneficiation which include local manufacturing, production and/or assembly, and/or packaging.
- At least spend 12 days per annum of productivity deployed in assisting black EME's and QSE's beneficiaries to increase their operation or financial capacity.
- At least 85% of labour costs should be paid to South African employees by service industry entities.

16 Exempted Micro Enterprises (EME's)

- With the new B-BBEE Codes of Good Practice gazetted on 11 October 2013, enterprises with an annual turnover less than R10 million qualify as an EME. Please note that this does not apply to those who fall within gazetted Sector Codes (i.e those in Construction, Forestry, Tourism, Transport, Chartered Accountancy (CA), Information and Communication Technology (ICT), Property, Agriculture, Financial Services) until these Sector Codes have been updated. The only requirement is a Sworn Affidavit confirming turnover for the past 12 months and the level of black ownership of an enterprise. EMEs then automatically qualify as follows:
  - <51% Black owned will qualify for Level 4 BEE status
  - ≥51% but <100% Black owned will qualify for Level 2
  - 100% Black Owned will qualify for Level 1
