THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US$ 10 million or other currency equivalent to US$ 10 million will have a NIP obligation. This threshold of US$ 10 million can be reached as follows:

(a) Any single contract with imported content exceeding US$10 million.

or

(b) Multiple contracts for the same goods, works or services each with imported content exceeding US$3 million awarded to one seller over a 2 year period which in total exceeds US$10 million.

or

(c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US$10 million.

or

(d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US$10 million.

1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a pro-rata basis.

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

a. the contractor and the DTI will determine the NIP obligation;

b. the contractor and the DTI will sign the NIP obligation agreement;
c. the contractor will submit a performance guarantee to the DTI;
d. the contractor will submit a business concept for consideration and approval by the DTI;
e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
f. the contractor will implement the business plans; and

g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

1. PURPOSE

Project manage the refurbishment of research laboratories and implement the recommendations of the assessment plan that would render the Department of Environmental Affairs: Oceans and Coasts (DEA: O&C) research laboratories functional and compliant with the Occupational Health and Safety Act (Act No. 85 of 1993) and relevant regulations, through appointment and management of sub-contractors and specialists.

2. INTRODUCTION AND BACKGROUND

2.1 The DEA: O&C conducts scientific research within the marine environment in order to support management decisions and objectives related to the sustainable utilisation and conservation of South Africa’s oceans and coasts. A wide range of research activities requires laboratories for analyses of various physical, chemical and biological parameters. On the 23rd May 2013 an electrical fault on the distribution board located outside the laboratories caught alight. Most of the damage of the laboratory infrastructure and equipment was due to corrosive soot rather than heat, as the fire was contained outside the laboratories.

2.2 These are highly specialised laboratories that require an ultra-clean environment to ensure functionality and data integrity. To ensure that the laboratories are operational post-fire, it is required that all laboratories meet occupational health and safety (OHS) standards. As a result, the Department appointed a service provider in 2015 to do an assessment of OHS requirements across the second floor of Foretrust building. The service provider delivered the following assessment documents, namely an OHS Layout Report, Fire and Safety Report and Gas line reticulation recommendations.

2.3 This project will use highly specialized sub-contractors which will require specialized expertise which are not available internally, therefore the Department requires an expert Project Management company to oversee and implement these recommendations contained in the aforementioned reports to fulfil the brief as contained in this Bid.
3. **OBJECTIVES**

Project manage the reconfiguration and refurbishment of research laboratories and sample storage areas for the Branch Oceans and Coasts, in the Forestrust Building, in accordance with the Occupational Health and Safety standards as per OHS Act (85 of 1993) including:

- appointment of various sub-contractors and/or specialists and specialist companies to refurbish research laboratories;

Implement user needs in accordance with previously conducted OHS assessment, including existing fire and safety report and recommended gas lines reticulation options;

4. **SCOPE AND EXTENT OF WORK**

4.1 The primary purpose of the bid is to ensure compliance with the Occupational Health and Safety Act (Act 85 of 1993), its regulations and directives, for occupancy of a mixed-use space, i.e. offices, biological laboratories, chemistry laboratories, engineering space, and chemical and sample storage on the 2nd Floor of Forestrust Building in Cape Town.

4.2 In order to achieve this, the bidders are required to Project Manage the reconfiguration/refurbishment through the appointment of various building construction companies and specialists.

4.3 Please note, the building owner requires the use of a specific architect for the drafting of plans for submission to council. Appointment of all sub-contractors must be undertaken using auditable and equitable process. Sub-contractors and specialists should be in possession of the requisite professional accreditation and implement the user needs, with regard to OHS and infrastructure requirements for full functionality.

4.4 Implement the recommendations of the fire and safety report and the gas lines reticulation report (with its necessary council approval)

4.5 Provide scope of work to all relevant sub contracted specialist and construction companies.

4.5.1 Oversee sub-contractors and report to DEA during the refurbishment period to ensure timely implementation.

4.6 Manage the approved budget for the refurbishment of the laboratories and ensure all sub-contractors remain on target.

4.6.1 All sub-contractors and specialists report directly to the Project Manager/project management company.

4.6.2 Payment of sub-contractors is handled by the Project Manager using auditable financial processes.
4.7 Ensure best modular configuration, as far as possible, to allow that most fixtures are removable and easily-relocatable.

4.8 Dependent on Local Authority approval of the gas line reticulation suitable for the building, its usage and location the final floor plan will be adjusted and agreed upon.

4.9 As per paragraph (4.8) appropriate gas reticulation lines to various laboratories to be installed, including fume detectors, as per recommendations in the Fire and Safety Report;

4.10 Laboratories should be refurbished in order to ensure that chemicals are not distilled into the general water draining system.

4.11 General refurbishment requirements applicable to all laboratory spaces:
   - Repaint laboratory walls with epoxy (metal-free paint); replace/repair/divert wall tiling and electrical points and wiring with new where needed and replace doors and glass walls and replace with dry-wall or brick wall as needed.

20 Qualifying Small Enterprise (QSE)

A business with an annual turnover more than R10 million but less than R50 million qualifies as a Qualifying Smaller Enterprise (QSE). The QSE scorecard was gazetted in May 2015.

All QSE’s are required to use all 5 elements on the amended BEE Scorecard:

1. Ownership
2. Management Control
3. Skills Development
4. Enterprise and Supplier Development
5. Socio-Economic Development

A QSE which is 100% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

Please note a QSE for Specialised Enterprises which is 75% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

QSEs are required to qualify under one of the following criteria in order to receive a QSE certificate;

- At least 25% of costs of sales excluding labour costs and depreciation must be procured from local producers or local supplier in SA (for service industry labour cost are included but capped to 15%)
- 50% of jobs created are for black people provided that the number of black employees since the immediate prior verified B-BBEE measurement is maintained.
- At least 25% transformation of raw material/beneficiation which include local manufacturing, production and/or assembly, and/or packaging.
- At least spend 12 days per annum of productivity deployed in assisting black EME’s and QSE’s beneficiaries to increase their operation or financial capacity.
- At least 85% of labour costs should be paid to South African employees by service industry entities.

21 Exempted Micro Enterprises (EME’s)

- With the new B-BBEE Codes of Good Practice gazetted on 11 October 2013, enterprises with an annual turnover less than R10 million qualify as an EME. Please note that this does not apply to those who fall within gazetted Sector Codes (i.e those in Construction, Forestry, Tourism, Transport, Chartered Accountancy (CA), Information and Communication Technology (ICT), Property, Agriculture, Financial Services) until these Sector Codes have been updated. The only requirement is a Sworn Affidavit confirming turnover for the past 12 months and the level of black ownership of an enterprise. EMEs then automatically qualify as follows:
  - <51% Black owned will qualify for Level 4 BEE status
  - ≥51% but <100% Black owned will qualify for Level 2
  - 100% Black Owned will qualify for Level 1

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a \textit{pe se} prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
