1. This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. **PURPOSE**

To request suitably qualified service providers to submit proposals for establishment of a Panel to develop Municipal Integrated Waste Management Plans (MIWMPs) for a period of 3 years.

2. **INTRODUCTION AND BACKGROUND**

2.1 The 2012 Waste Information Baseline report indicates that 90% of the general waste generated in South Africa is being landfilled.

2.2 The National Environmental Management Waste Act, Act No.59 of 2008, (NEM:WA), as amended, under section 11(4), requires each Municipality to submit its Integrated Waste Management Plan (IWMP) to the MEC for endorsement and approval by the Municipal Council as well as incorporate the approved plan in the Integrated Development Plan (IDP) of that Municipality.

2.3 The South African Constitution of the Republic, 1996 (Act 108 of 1996), under Chapter 2, stipulates that everyone has the right to an environment that is not harmful to their health or well-being and to have the environment protected through reasonable legislative and other measures that prevent pollution and ecological degradation.

2.4 The Department of Environmental Affairs (DEA) also supports Municipalities that do not have relevant capacity to ensure that waste services delivery can be improved. DEA is the sector leader for the refuse removal service and has to ensure that strategic catalytic interventions linked to the 27 prioritised District Municipalities are implemented to ensure realization of the outcome 9 target of 1.3 million additional households receiving waste service.

2.5 DEA intends to develop Municipalities within the 27 Prioritized Districts with the development of IWMPs with an objective of ensuring that there is integration and optimisation of general waste in order to maximize efficiency and minimize the associated environmental impacts.
2.6 The IWMP aims to improve the quality of life of the people in the municipality by maximizing efficiency in waste management. This includes sorting and separation at source interventions. The waste value-chain within the municipal jurisdiction would be planned for and managed through the IWMP.

2.7 The waste management system of the municipality, including the management of various disposal facilities, collection, recycling and reuse opportunities would be analysed and recommendations in the form of the IWMP would be made for implementation.

3 OBJECTIVES

The project will enable the department to set up a panel of suitably qualified service providers to select from in order to develop IWMP on behalf of the Municipalities.

The assessment of the panel will be in line with the following objectives to be stipulated in the IWMP for an efficient and effective management of waste in the municipality:

- Outline of the Status Quo and Situational Analysis of Waste in the municipality.
- Identify and profile the Waste categories within the municipality.
- Assess the existing management infrastructure (waste information, storage and disposal facilities) and develop the strategy on infrastructure provision/improvement.
- Establish the Demographics of Waste Service delivery in the municipality.
- Determine the capacity and needs in the municipality for the waste management activities (Gap Analysis).
- Develop the plan that will assist in the permitting and sound management of landfill sites.
- Develop a plan that will ensure that the waste avoidance, minimization, re-use, re-cycle, composting, treatment and disposal of waste is done in a manner that is cost effective, economically beneficial to locals and positively contribute to good public health and environmental sustainability.
- Develop Public-Private-Partnership on Waste Management in and around the municipality.
- Mobilise communities around waste management issues.
- Align the plan with the National Waste Management Strategy.
- Provide appropriate, affordable and sustainable waste collection services.
- Enforce current, new legislation, guidelines and standards for total waste stream.
- Ensure safe collection, transportation and disposal of unavoidable waste in accordance with requirements and/or standards.
- Make projections of future requirements.
- Financing of the IWMP.
- Management of hazardous waste and health care risk waste

4 SCOPE AND EXTENT OF WORK

The development of the IWMP should cover all areas within the jurisdiction of Local Municipalities. The Scope of Work should be aligned with section 12 of National Environmental Management Waste Act. The following activities will be required from the successful bidder:-

4.1. PHASE 1: SITUATIONAL ANALYSIS

The objectives of the situation analysis is to analyse and quantify all aspects related to current waste management services and practices carried out by the local municipality with the view of using this information as a basis for future planning. It includes an evaluation of the areas serviced, the waste management services rendered, infrastructure and equipment, their efficiency, cost effectiveness, operational costs and budget, social and environmental acceptability, compliance with legislation, etc.

Specific objectives of the situation analysis should include, but not limited to:-

a. Determine the generation patterns of categories of Waste in the municipality;

b. Determine the storage, transportation & disposal methods of different categories of Waste;

c. Determine the extent of re-cycling, re-use, composting & treatment of Waste and their impact on Waste reduction;

d. Determine the Waste Management Infrastructure and assess its impact on Waste Management Service delivery;
e. Determine the Demographics & Service delivery and identify the gaps;

f. Develop the Draft Status Quo Report and table before Stakeholders for inputs & comments until the Draft is adopted as the end of Phase 1 of the Project;

g. Obtain information on the current population of the area, growth estimates, densities and the population's socio-economic categories and income levels;

h. Identify and estimate the types and amounts of general waste generated in the municipal area, the composition thereof and defining distinctive waste management and generation areas;

i. Describe and assess the existing waste management systems, services and practices;

j. Determine the costs associated with providing the waste management services;

k. Determine the number of households receiving and not receiving waste manage including the number of indigent households receiving and not receiving waste management services;

l. Determine the status quo of waste services in rural and informal settlements;

m. Establish whether the municipality has indigent register for the poor households;

n. Determine the amount of money the municipality receives for the provision of waste services to indigent of households;

o. Describe different types of waste accumulated from the municipality;

p. Determine the necessary human resource capacity to effectively implement the plan [Organ of structure (organogram)] for waste management function in the municipality;

q. Determine the role of the designated waste management officer (WMO); and

r. Appraise the services in terms of quantity, quality, legal, social and environmental impacts and public acceptance.

s. Determine the management of hazardous and health care risk waste.

4.1.1. GROUND TRUTHING

The situational analysis will have to be supported by ground truthing i.e a purely desktop assessment will not be accepted. Ground truthing must specifically be itemized in the quotation.
4.1.2. POLICY AND LEGISLATION

The relevant government policies and applicable legislation should be identified and the specific requirements must be established and described. Only policies and legislations which are relevant to the identified municipalities with regard to waste services and practices should be identified and applied.

Copies of the various policies and legislative requirements must be made available to the municipalities, both in hard copy and electronic format.

4.1.3. DEMOGRAPHICS

Appropriate demographics data should be collated.

**Base population**: the service provider must quantify the base population figures in order to identify human concentrations and calculate population growth rates and future estimates.

**Existing population distribution**: for the purposes of determining current waste generation rates, future waste quantities and an estimate of recoverable materials, the service provider needs to identify the socio-economic distribution.

Typical categories are:-

- High income
- Middle income
- Low income
- Informal settlements

1. Rural

**Future population distribution**: economic growth points and development nodes as well as future housing developments must be identified.
4.1.4. WASTE QUANTITIES AND CHARACTERISTICS

The service provider shall establish current quantities of waste generated, collected, stored, recycled, treated and disposed of. Demographic data collected will assist in determining the extent of existing waste impacts and the need for current or future waste collection services.

The service provider shall determine the waste categories and characteristics through physical sampling, which shall involve a detailed assessment of waste from a representative number of generators. Determination of general waste from all sources must be included.

4.1.5. EXISTING WASTE MANAGEMENT SYSTEM, SERVICES AND PRACTICES

Once the information on the quantity and quality of the waste generated within the municipal area and waste generation areas have been established, the service provider shall compile information on the existing waste management systems and practices.

The service provider shall provide a status quo report containing a detailed survey of the existing waste practices within the local municipalities. This includes the collection and cleansing services, the transport and transfer of the waste, waste minimisation and recycling systems/initiatives, and finally the disposal of waste.

The service provider shall identify all existing, successful, and waste minimisation and recycling initiatives in the Municipalities. The service provider must identify and describe any waste treatment facilities found in the municipal areas.

For each treatment facility and waste disposal the following information should be provided:-

i. Name of treatment facility
ii. Geographic location
iii. Type of treatment (e.g. incineration)
iv. Year of construction (and any extensions)
v. Capacity of each facility
vi. Daily/weekly/monthly and annually, throughput for facility
vii. Hours of operation
viii. Flowchart for input and output of waste from facility
ix. Characteristic for residual waste from treatment process
x. Environmental monitoring programme for facility
xi. Environmental impacts due to operation of the treatment facility
xii. License/permit/registration certificate

The following information must be provided for waste disposal sites:

a. Name of disposal site
b. Geographic location of landfill site
c. Area covered by disposal site
d. Year of contraction/extension
e. Resources available on site
f. Registration/permit certificate
g. Type and quantity of waste
h. Description of neighbouring areas
i. Signposting and road access
j. Access control collection of disposal tariffs
k. Method of landfilling (e.g. trench system)
l. Co-disposal (e.g. liquid and solid waste)
m. Excavation for cover
n. Drainage
p. Control of nuisances (e.g. burning of waste, litter, odours, vermin and dust)
q. Salvaging activities
r. Waste reclamation
The service provider must identify illegal dumping and land filling in the municipality as well as the specific problems encountered with this from waste management point of view. The report shall include the status of support activities including financial, personnel, legislative, vehicle and equipment available and maintenance, purchasing and stores components and similar activities.

The service provider must:–

Record relevant information regarding the property (i.e. land and building) plant including vehicles and equipment used by the municipality in the provision of waste management services;

Record relevant information regarding waste management personnel (both permanent and temporary);

Allocate the cost associated with above as accurately as possible among the various services; and Establish all other costs associated with the provision of the various services including consumables (bin-liners, etc.), disposal costs, electricity, water, telephone calls, maintenance and running costs of depots and offices, administration costs, consulting fees, etc. to determine the total cost of providing each service.

4.1.6. GEOGRAPHIC WASTE MANAGEMENT AREA MAPPING

The geographic waste management area should be mapped. Maps should be constructed which indicate where the waste is generated. This should include existing and possible future collection and transport routes, recycling and treatment facility locations and the location of disposal facilities or site(s).

The information will determine the need for transfer stations and regional waste disposal sites and optimize possible identified sites for recycling, treatment and disposal facilities. The maps should be a conventional
drawing with appropriate labelling and legends but preferably should be generated by geographic information system (GIS) software.

4.2. PHASE 2: GAP AND NEEDS ASSESSMENT

This stage seek to identify issues, gaps and needs which must be addressed. The end result of this step would be the prioritization of the issues, gaps and needs identified while aligning them to set targets and objectives. The issues, gaps and needs are to be analysed and prioritised in order of low, medium and high categories for implementation in the short, medium or long term.

The service provider must identify gaps and needs from the situation analysis. These gaps and needs should be listed and categorized under suitable categories. The following categories may be used:-

- Regulatory issues
- Financial and Economic issues
- Institutional and Organisational issues
- Socio-economic issues
- Technical and operational issues

Waste management services (entails info on; number of households receiving and not receiving waste collection, Infrastructure, equipment, Areas where waste services not provided and challenges)

- Waste Minimisation and Recycling issues
- Social issues
- Information issues
- Environmental issues

4.2.1. ESTIMATE FUTURE WASTE GENERATION RATES QUANTITIES AND CHARACTERISTICS

Future waste trends, in terms of quantities, qualities and characteristics, for the planning period of 10 years, should be estimated using the information collected on domestic waste.
Generation rates per capita for each socio-economic category, the population, population distribution, commercial, mining and industrial waste generation rates should be estimated.

The following must be looked at in details:-

- Collection needs
- Waste transportation and waste transfer needs
- Recycling and re-use initiatives
- Waste disposal site airspace requirements
- Development of goals, objectives and policies

4.3. PHASE 3: DEVELOPMENT AND EVALUATION OF ALTERNATIVES AND SCENARIOS

The service provider must evaluate and develop the scenarios in terms of appropriate criteria to ensure that the most suitable scenario(s) is/are selected for implementation. The service provider will then be expected to advise in details on opportunities and activities to institute such waste prevention and minimization strategies, systems and practices.

The service provider must advise on the appropriate implementation method for waste collection and transportation taking the type of waste and area into consideration. Solutions should focus on job creation and various options, alternatively examples of successful community projects should be investigated and presented together with a final recommendation on the most suitable method.

The service provider must determine the cost and final viability of suggested/proposed waste collection, waste transport, waste disposal and waste recycling or waste minimization proposals over a period of 5 years. The cost of each of the proposed waste management systems in each municipality must be established. The annual investment and operating costs for collection, transport, treatment and disposal of waste over the next 5 years must be established.
These include costs for:–

• Personnel (wages, salaries, etc)
• Transport (fuel, repairs, etc.)
• Operating and maintenance
• Administration and staff training
• Environmental impact abatement and penalties
• Interest and depreciation

The service provider must describe financing of the waste system and practices as follows:–

• Funding mechanisms for collection, treatment and disposal
• Affordable user charges by rates payers for collection treatment and disposal waste
• Progress for the determination of user change/tariff setting/fees
• Major obstacles, e.g. non-payment

An indication of the extent of regionalisation of waste management facilities should be described. Strategies to identify and address the problems associated with cross-border movement of waste mainly by road must be identified and described including the legislative requirements and obligations. The service provider must identify the key stakeholders that must be consulted in the development of the IWMPs. The service provider must also advice on the acquisition, characteristics and cost implications of a suitable waste information system for use by the district and local municipalities.

4.4. PHASE 4: DEVELOP AN IMPLEMENTATION STRATEGY

After the development and evaluation of Alternatives and Scenarios, the service provider shall manage the approval process for the preferred scenarios. In each instance, once the preferred scenario has been accepted by the public and at political level, the service provider must develop a strategy, with associated action plans, to
implement it. The strategy will consist of a number of projects identified in the selected scenario, which will realise the identified objectives and targets.

These projects may have to be managed and implemented in a specific order to ensure that the best results are achieved at the lowest possible cost to the ratepayers. The implementation strategy must have short, medium and long term target dates that have to be met in line with the set targets.

The implementation strategy should describe the following:-

- Who will be responsible for the organisation, planning and implementation of the IWMP.
- How will the IWMP be integrated into the IDP.
- The IWMP project implementation programme.
- The introduction of partnerships.
- The public participation programme.
