1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE

To appoint service provider(s) to conduct feasibility studies to determine the optimal economic benefits that communities can derive from identified biodiversity nodes, and development of associated business plans.

INTRODUCTION AND BACKGROUND

In South Africa the process of land reform has made some progress in distributing and restituting land back into the hands of local communities. In a remote context, communities have claimed back private game reserves, portions of national parks and provincial nature reserves. These areas are often prime tourism destinations in the country. The challenge is that communities are not equipped with the expertise and investment capital to participate or take over and maintain these areas as functional economic units. This means a loss of productivity and jobs and it's unsustainable for the communities, who loose income and are experience disruption to society. If this takes place in the context of protected areas, functional processes are not maintained with the resultant loss of biodiversity due to threatened species not being protected; access and benefit sharing is not optimized; the value of the ecosystem services is not shared; and the end result is that the land use is not optimized for community benefits. Therefore, the Department of Environmental Affairs will prioritised the potential areas to be studied. Undertaking this project will contribute to the attainment of the Department’s vision to ensure the sustainable utilisation of biological resources by communities to sustain their livelihoods. Finally, the successful implementation of this project would contribute towards poverty reduction, the sustainable use of indigenous biological resources and job creation to stimulate the local economy of the country.

2. OBJECTIVES

The proposals are invited from suitable independent service provider (s) who will assist DEA to conduct feasibility studies to determine the optimal economic benefits that communities can derive from identified biodiversity nodes, and development of associated business plans.

3. SCOPE AND EXTENT OF WORK

4.1. SITUATIONAL ANALYSIS/STATUS QUO

The situational analysis to be conducted for each identified biodiversity node indicated in the terms of reference, covering but not limited to geographical and physical environment, socio-economic environment, natural and cultural assets, economic environment, existing infrastructure, institutional environment, current planning and programme framework, and any key issues and challenges.

4.2. THE FINAL FEASIBILITY STUDY
The feasibility study report should include but not limited to the following:

b) A strategic planning context; this requires a description of how the proposed projects will support the current development priorities within the municipality and the park. The projects must be contextualised within the relevant integrated development plans and other applicable planning frameworks, where they exist.

c) A legal and site review - This must confirm the institution / community’s rights to tenure and rights to enter into agreement for the identified projects.

d) An indicative market review - A rapid demand and supply analysis must be done. Key indicator for the market review will include but not limited to:
   - Current trends.
   - Investment patterns as per the existing and proposed Biodiversity Economy products e.g. are private developers investing money in similar product or area.
   - Existing secondary research and analysis e.g. existing regional or national supply and demand analysis.
   - An informal “test the water exercise” with private sector on community driven products.

e) Environmental pre-scoping exercise designed to screen for fatal flaws that would result from the likely impacts of the projects must be conducted. This exercise will need to identify any specific environmental issues requiring further assessment.

f) Stakeholder and institutional analysis- the main internal and external stakeholders including land owners, and government officials must be identified.

g) Personnel and human resources- It must be determined where the implementation of the projects in the area will require skills/capacity building for beneficiaries of the projects;

h) An infrastructure and equipment assessment-. In particular there needs to be a focus on elements of infrastructure that the institution or the state will probably have to provide. These must all be listed in the assessment and quantified. They must include
not only the infrastructure on the site but the necessary support infrastructure, such as access roads.

i) SWOT analysis of the nodes;

j) The identification of high biodiversity value areas within the nodes for conservation purposes;

k) Identify socio-economic opportunities within the node that are compatible with conservation and linked to, but not limited to:

- DEA Biodiversity economy strategy
- DEA Biodiversity Economy Lab outcomes;
- Community based Natural Resource Management projects;
- Environmental Protection and Infrastructure projects;
- Coastal economy, where applicable;
- Heritage;
- Land restitution and reform;
- Co-management agreements;
- Tourism;
- Protected area expansion and community benefit;

l) Conservation threats and pressures;

m) Spatial mapping of each node that includes but not limited to, layers illustrating biodiversity value; economic activities; heritage; infrastructure etc;

n) Project identification and packaging through stakeholder participation and sign-off;

o) Undertaking resource leveraging for the packaged projects with the relevant implementing institution and through business plan development and the identification of the relevant financing and technical support partners.

The appointed service provider must:

- Cater for stakeholder engagements and necessary site visits
- Ensure that all relevant stakeholders are involved.

   • Competitor analysis

d) Provide a sustainability plan for the commercial activities:

16 Guidance for evaluation committee

IN EVALUATING THE TECHNICAL INFORMATION CONTAINED IN THE BID, THE EVALUATION COMMITTEE WILL BE GUIDED BY THE FOLLOWING:

- **Bidder’s understanding of the brief** – The bid provides a clear indication that the bidder fully understands the purpose and scope of the work and the bidders’ own roles and functions in this regard.

- **Capability and experience** – The bid provides a clear indication that the bidder’s team comprises people with the necessary experience, skills, qualifications, knowledge and skills required to ensure the efficient and effective generation of the required deliverables to the highest standards of quality.

- **Track Record** – The bid provides clear information on previous, relevant projects that confirm that the bidder has the required experience and success track record in the area of general project management and management related projects.

- **Qualifying Small Enterprise (QSE):**
A business with an annual turnover more than R10 million but less than R50 million qualifies as a Qualifying Smaller Enterprise (QSE). The QSE scorecard was gazetted in May 2015. All QSE’s are required to use all 5 elements on the amended BEE Scorecard:

1. Ownership
2. Management Control
3. Skills Development
4. Enterprise and Supplier Development
5. Socio-Economic Development

A QSE which is 100% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

Please note a QSE for Specialised Enterprises which is 75% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

QSEs are required to qualify under one of the following criteria in order to receive a QSE certificate:

- At least 25% of costs of sales excluding labour costs and depreciation must be procured from local producers or local supplier in SA (for service industry labour cost are included but capped to 15%)
- 50% of jobs created are for black people provided that the number of black employees since the immediate prior verified B-BBEE measurement is maintained.
- At least 25% transformation of raw material/beneficiation which include local manufacturing, production and/or assembly, and/or packaging.
- At least spend 12 days per annum of productivity deployed in assisting black EME's and QSE's beneficiaries to increase their operation or financial capacity.
- At least 85% of labour costs should be paid to South African employees by service industry entities.

**EME’s ( Exempted Micro Enterprises)**

With the new B-BBEE Codes of Good Practice gazetted on 11 October 2013, enterprises with an annual turnover less than R10 million qualify as an EME. Please note that this does not apply to those who fall within gazetted Sector Codes (i.e those in Construction, Forestry, Tourism, Transport, Chartered Accountancy (CA), Information and Communication Technology (ICT), Property, Agriculture, Financial Services) until these Sector Codes have been updated. The only requirement is a Sworn Affidavit confirming turnover for the past 12 months and the level of black ownership of an enterprise. EMEs then automatically qualify as follows:

- <51% Black owned will qualify for Level 4 BEE status
- ≥51% but <100% Black owned will qualify for Level 2
02 May 2018

- 100% Black Owned will qualify for Level 1
