2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1 PURPOSE

The Waste Management Bureau intends to contract with transporters for a period of 3 (three) years for the transportation of waste tyres across the country.

2 INTRODUCTION AND BACKGROUND

The Department of Environment Affairs established the Waste Management Bureau ('Bureau) as per the Waste Amendment Act of 2014 with the objectives of the Bureau among others to:

- Promote and facilitate the minimisation, re-use, recycling and recovery of waste;
- Manage and monitor the implementation of industry waste management plans
- Support and advice on the development of waste management plans, tools, instruments, processes, systems, norms, standards and municipal waste management plans and capacity building programmes.

In terms of the Waste Tyre Regulations of 2017, Should a waste tyre management plan expire, be withdrawn or be terminated for any reason, the Waste Bureau shall be responsible to facilitate, supervise and control the management of waste tyres for the interim until a new industry waste tyres management plan is approved. The Waste Bureau thus took over the waste tyre management operations from the 01 October 2017 following the withdrawal of the REDISA Waste Tyre Management Plan.

3 TRANSPORTATION NETWORK

The existing transport network comprises of the following:

1) Primary transporters:
These transporters collect waste tyres from collection points (generation points e.g. tyre dealers) and deliver to depots. This network is largely short distance, with smaller trucks (1 up to 10 ton capacity) and therefore location specific. There are exceptions in this category, where certain collection points are very far from the depots, requiring transporters to travel long distances to service them.

2) Secondary Transporters:
These transporters collect waste tyres from depots to processors and or holding depots. This network is largely long distance, with super links, although there may also be exceptions
where the processors are located close to the depot. Secondary transporters operate across the country.

These transporters will collect waste tyres from collection points (generation points e.g. tyre dealers) and deliver to depots. Transporters will be allocated collection points, which will be serviced on a regular basis (depending on the needs of specific collection points). The frequency of the collections vary from daily, weekly or more depending on the demand.
2) Secondary Transporters:

These transporters will collect waste tyres from depots to processors, holding depots and/or secondary industries. This network is largely long distance, with super links, although there may also be exceptions where the processors are located close to the depot. Secondary transporters operate across the country.

5.1 REQUIREMENTS

Below are the requirements for both categories of transporters:

1) Primary transporters:
   - The bidder should own the vehicles being submitted for contracting with the Waste Bureau. Leased vehicles will not be considered.

6 EXPECTED DELIVERABLES

Transporters are allocated collection points by the Waste Bureau. The transporter will be expected:

8 COSTING/COMPREHENSIVE BUDGET

8.1 The Waste Bureau will determine rates for those transporters who passed the three stages of evaluation (refer to Section 10 below).

Primary transporter rates are based on the following:

• **Vehicle size**: This will have relevance on the potential vehicle repayments, operational and maintenance costs.

• **Average monthly distances travelled** based on the allocated collection points. Each Primary Transporter is allocated collection points, which they need to service. The frequency of collection is done by the transporter based on the generation rate as well as ensuring efficiency in the collection service. This can also be influenced by the collection point needs. The Waste Bureau can however override the transporter and instruct a collection frequency.

• **Average monthly tonnage to be transported**. This varies from each collection and will be determined from the collection/delivery notes submitted by each transporter.

Secondary transporter rates are based on distance, since the vehicle sizes and loads are generally within the same margin.
