CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. **PURPOSE**

1.1. To appoint a suitable independent Service provider that can support Department of Environmental Affairs (DEA) in collaboration with the South African National Parks (SANParks), Western Cape Nature Conservation Board (CapeNature) and Eastern Cape Parks and Tourism Agency (ECPTA) with the development of an Environmental Management Framework (EMF) for the Cape Floral Region Protected Areas World Heritage Site (CFRPA WHS).

1.2. The purpose of the EMF is to guide the environmental management and planning in decision-making in order to amongst others; ensure that the national commitments to the World Heritage Convention are implemented.

2. **PROBLEM STATEMENT**

Unesco require all 13 Protected Areas Clusters to have effective integrated management plans. Currently a total of 3 of these plans are complete, leaving a total of 12 integrated management plans are due for an update and/or finalisation. The CFRPA WHS faces pressures with a potential to threaten the long-term integrity of these areas if not managed properly, with many of these emulating from outside threats and influences. Although buffer areas have been delineated, there is concern that these buffer areas may not effectively protect the core CFRPA’s WHS. There are various tools that are currently being used in both the Western and Eastern Cape provinces to guide decision making in environmental management and development planning in areas surrounding the core of the WHS. However, these tools may not be aligned sufficiently. There is a need for a comprehensive, strategic environmental management instrument in this case EMF which will effectively incorporate plans and policies.

3. **INTRODUCTION AND BACKGROUND**

3.1. The Cape Floral Region has been recognized as one of the most special places for plants in the world in terms of diversity, density and number of endemic species. It is one of the richest areas for plants when compared to any similar sized area in the world. It represents less than 0.5% of the area of Africa but is home to nearly 20% of the continent’s flora. The outstanding diversity, density and endemism of the flora are among the highest worldwide. Some 69% of the estimated 9,000 plant species in the region are endemic, with 1,736 plant species identified as threatened and with 3,087 species of conservation concern. The Cape Floral Region has been identified as one of the world’s 35 biodiversity hotspots.
3.2. Subsequently, the CFRPA WHS was inscribed on the United Nations Educational, Scientific and Cultural Organisation (Unesco) World Heritage List in 2004 under criteria (ix) and (x). At the time of inscription in 2004, the site was made up of 8 protected areas making about 553,000 hectares located in the southwest corner of South Africa, centred on the Western Cape Province but also expanding into the Eastern Cape Province. Following inscription, the site was successfully proclaimed in terms of national legislation as a World Heritage Site on 30 January 2009. Several Committee decisions have welcomed the State Party’s intentions to extend the property to include additional areas of value and these areas were approved by the Unesco World Heritage Committee during its 39th session in July 2015.

3.3. The approved extension by Unesco bring the size of the World Heritage Site to 1,094,742 hectares thus significantly increasing the size of South Africa’s biodiversity areas with outstanding international recognition. The extension also increases the number of protected area clusters making up the Cape Floral Region Protected Areas WHS from 8 to 13 protected areas.

3.4. Furthermore a buffer area of 801,367.28 across the CFRPA WHS has been inscribed.
**Figure 1:** Map indicating the location of the study area, including Unesco approved core and buffer areas, but not including possible buffer extensions, as these will be determined in the study.

4. **OBJECTIVES**

To develop an EMF in a manner that assists in planning for the core areas of the CFRPA WHS, by filling gaps in current sensitivity mapping and protected area zonation;

4.2. To develop an EMF in a manner that will assist in determining the “Zone of Influence”, and, thus, potential buffer expansion areas, for each of the 13 Clusters.

4.3. Determine an effective buffer area within which land and water should be managed so as to avoid, minimize, or mitigate for any adverse effects to the core of the CFRPA WHS.

4.4. An EMF tool aligned with the Western Cape and Eastern Cape Biodiversity Spatial Plans (buffer) and existing Protected Area Zonation schemes, to serve as a spatial screening mechanism for EIAs in the study area through the augmentation of an environmental constraints dataset which indicates the issues that should be investigated in more detail during the EIA process.

4.5. To develop an EMF aligned with the Western Cape and Eastern Cape Biodiversity Spatial Plan Handbooks or similar (buffer), and existing Protected Area Management Guidelines, as a tool that provides strategic context for EIA applications in the study area through the development of management zones dataset to indicate through the decision support matrix whether an envisaged activity is compatible in a specific area/zone or not as seen from a strategic perspective.

4.6. To develop an EMF aligned with the Western Cape and Eastern Cape Biodiversity Spatial Plans (buffer) and existing Protected Area Zonation schemes, as a tool to inform strategic spatial planning in the area through the development of management zones dataset which, in future, inform the development of a Spatial Development Framework (SDF) responsible for strategic spatial planning and guiding land use management in the area.

5. **SCOPE AND EXTENT OF WORK**

**PROJECT MANAGEMENT**

5.1.1 **An inception meeting will be hosted by the service provider to:**

- Introduce the Consultant to the Project Management Team (PMT).
- Establish the Project Management Team (PMT) which will include DEA, DEA&DP, DEDEAT, SAHRA, Heritage Western Cape, Heritage Eastern Cape, South African National Parks, Western Cape Nature Conservation Board and Eastern Cape Parks and Tourism Agency.
- Clarify the roles and responsibilities of the Project Management Team.
- Clarify the consultation process (i.e. scope, mechanisms and stakeholder groupings to be included).
- Clarify the scope of work of the project.
- Clarify the project plan and time frames for the deliverables.
- All available info (i.e. appropriate and relevant pieces of legislations, tools/instruments, programmes, plans, policies and guidelines documentation) will be indicated and/or provided to the service provider.

5.1.2 STUDY AREA

The study area of the EMF should cover the Unesco approved core and buffer of the Cape Floral Region Protected Areas World Heritage Site. The study area should cover the CFRPA WHS’s thirteen (13) Protected Areas Clusters, namely: Bavianskloof Complex, Cedarberg Complex, Groot Winterhoek Complex, Table Mountain National Park, Boland Mountain Complex, Hexrivier Complex, Rivieronderd Nature Reserve, Agulhas Complex, De Hoop Nature Reserve, Langeberg Complex, Garden Route Complex, Anysberg Nature Reserve and Swartberg Complex, including their associated and inscribed buffer zones (privately owned, declared Mountain Catchment Areas and other private protected areas), as well as possible buffer extensions.

5.1.3 The Service Provider would be responsible to undertake the following activities in different Phases:

PHASE 1: STATUS QUO ASSESSMENT, SENSITIVITY ANALYSIS AND ZONE OF INFLUENCE

- This phase sets the scene in terms of environmental issues, constraints and opportunities within the study area, and steers the realistic conception of the desired state. This ‘stock-taking’ should be conducted through the lens of a Sensitivity Analysis for core of the CFRPAs [data to be provided by the agencies], and a Zone of Influence delineation to determine a practical buffer area.
- Assess any gaps in the information provided by the Agencies and source the additional data required.
- Conduct a sensitivity analysis on 13 Protected Areas Clusters, using the methodology provided by the Agencies for core CFRPAs [data to be provided by the agencies].
- Propose a standard methodology to determine a “Zone of Influence” for each cluster, in collaboration with the relevant authorities, and present to the PMT for them to adopt a preferred methodology. This methodology should be written up (word doc) and be easily replicable to other South African Protected Areas.
• Delineate a “Zone of Influence” for all 13 Protected Areas clusters.
• Workshop with all the relevant agencies to conduct assessment of threat, pressures and driving forces and pressures on the CFRPA core, the current state of -- and impacts to -- the environment, and the human responses, including opportunities and constraints.

PHASE 2: DESIRED STATE OF THE ENVIRONMENT (DSoE)
• Having produced both a sensitivity map and zone of influence map for all 13 Protected Areas clusters, as well as having identified strategically significant issues and environmental opportunities and constraints, clearly describe the desired future state of the environment for specific geographic areas within the core and expanded buffer areas.
• Clearly describe the desired future state of the environment for specific geographic areas within the core CFRPA WHS.
• Clearly describe the desired future state of the environment for specific geographic areas within the redefined buffer zone/area. Noting that the desired future state has been determined for the full extent of the Western Cape and Eastern Cape Province (outside of protected areas) by the Western Cape and Eastern Cape Biodiversity Spatial Plan, and should serve as a basis for developing these areas. The DSoE must include; Biophysical issues, including geology, topography and climate, biodiversity and conservation, hydrology and water resources, ecological infrastructure, air quality and agricultural potential; and socio-economic issues, including socio-economic profile, infrastructure development, land use, heritage resources, tourism and mining and others. The DSoE must identify and detail conflicts between land-use planning, biodiversity issues and agriculture and identify the strategies needed for dealing with those conflicts. The deliverables from this phase is twofold in nature and include: a detailed development vision for the area, and a comprehensive set of development objectives related to the desired future state relating to the priority environmental issues within the area
• Identify development pressures and threats.
• Conduct Public Participation Workshops to engage with relevant stakeholders.

PHASE 3: ENVIRONMENTAL MANAGEMENT ZONES (EMZ) AND GUIDELINES
• In order to aid strategic environmental management in the study area, environmental management zones must be delineated by grouping areas which share the same characteristics together with regards to land use and sensitivity. The EMZ must focus the attention of the relevant authority on the critically important areas and to facilitate effective decision making.
Similarly, EMZ must be developed in such a way as to ‘red flag’ critical environmental areas to ensure that any development applications lodged in the zones adhere to the management guidelines which will be developed as part of this process.

- Divide the study area into environmental management zones based on the spatial component of the desired state of the environment phase, and directly integrating any existing Protected Area Management Plan zonation products.
- Delineate recommended Environmental Management Zones for 13 Protected Areas clusters and their expanded buffer area.
- Compile EMZ Guidelines

**PHASE 4: ENVIRONMENTAL MANAGEMENT FRAMEWORK REPORT**

- Draft the Environmental Management Framework with comments from all relevant stakeholders
- Conduct Public Participation Workshops, to engage with relevant stakeholders when drafting the EMF.
- Finalise the EMF in consultation with the relevant stakeholders and submit to DEA (print ready).

**6. REPORTS AND DOCUMENTATION**

6.1 The service provider must make available, a copy of the Power Point presentation of the outputs of the project to the project team.

6.2 The service provider is required to provide electronic copies in Ms Word and hard copies of all draft and final reports, to DEA, DEA&DP, SANPARKS, CapeNature and Eastern Cape Parks and Tourism Agency and Joint Management Committee and any other relevant stakeholders.

6.3 All GIS spatial information must be provided in four (4) external portable devices.

6.4 Allow for 4 sets of PDF proofs incorporating PMT revisions Open editable files of finished artwork as well as print-ready PDF files to be supplied on DVD to DEA at close of project

### STAGE 2: Preference Point System (80/20)

#### 9.5.1. Calculation of points for price

The PPPFA prescribes that the lowest acceptable bid will score 80 points for price. Bidders that quoted higher prices will score lower points for price on a pro-rata basis. Where functionality is set as a criteria, only bid proposals that meets functionality requirements will be considered to be evaluated on price and B-BBEE.

#### 9.5.2. Calculating of points for B-BBEE status level of contribution

Points will be awarded to a bidder for attaining the B-BBEE status level of contribution or a sworn affidavit certified by the commissioner of oath in accordance with the table below:

b) A trust, consortium or joint venture must submit a consolidated B-BBEE Status Level Verification Certificate for every separate bid to substantiate their B-BBEE rating claims. Bidders who do not submit B-BBEE Status Level Verification Certificates or are non-compliant contributors to B-BBEE do not qualify for preference points for BBBEE but should not be disqualified from the bidding process.

c) They will score points out of 90 or 80 for price only and zero (0) points out of 10 or 20 for BBBEE. The points scored by a tenderer for B-BBEE contribution must be added to the points scored for price and should be rounded off to the nearest two decimal places.

d) In a case whereby a pre-qualification criteria requires BBB-EE status level of contributor, all tenderer who failed to submit an original and valid B-BBEE Status Level Certificate or certified copies thereof, issued by SANAS or an original/ certified copy of the DTI sworn affidavit will be disqualified on Pre-qualification stage and will not reach preference point system stage due to non-compliance.

e) A bidder will not be awarded the points claimed for B-BBEE status level of contribution if it is indicated in the bid documents that such a bidder intends subcontracting more that 25% of the contract value to any other enterprise that does not qualify for at least the same number of points that the bidder qualifies for, unless the intended sub-contractor is an EME that has the capability and ability to execute the sub-contract.
