THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US$ 10 million or other currency equivalent to US$ 10 million will have a NIP obligation. This threshold of US$ 10 million can be reached as follows:

(a) Any single contract with imported content exceeding US$10 million.

or

(b) Multiple contracts for the same goods, works or services each with imported content exceeding US$3 million awarded to one seller over a 2 year period which in total exceeds US$10 million.

or

(c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US$10 million.

or

(d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US$3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US$10 million.

1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a pro-rata basis.

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of R10 million (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

a. the contractor and the DTI will determine the NIP obligation;
b. the contractor and the DTI will sign the NIP obligation agreement;
c. the contractor will submit a performance guarantee to the DTI;
d. the contractor will submit a business concept for consideration and approval by the DTI;
e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
f. the contractor will implement the business plans; and
g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

1. **PURPOSE**

1.1 To appoint a service provider to assist the Waste Bureau with the identification and securing of site, development of a business plan, and management of the setting-up; equipping; operating; training of beneficiaries (and their employees where applicable) and handover of the Pilot Construction and Demolition Waste Crushing and Block Manufacturing Facility

2. **INTRODUCTION AND BACKGROUND**

2.1 The Waste Bureau is a specialist implementing agent of the Department of Environmental Affairs whose object is to, among others, promote and facilitate minimization, re-use, recycling, and recovery of waste.

2.2 The Waste Bureau's work is premised on the fact that waste is a valuable resource that can be re-used, recycled, or recovered and in the process contribute to economic development (including the development of new businesses within the recycling sector), job creation, and the creation of a cleaner environment.

2.3 In order to achieve this goal, the Waste Bureau is thus focusing on various waste streams including the construction and demolition waste (C&DW) stream.

2.4 The 2012 Waste Information Baseline report indicates that the C&DW is the highest by weight (20% of the total waste generated) and is also among the lowest in terms of recycling rate, with some 4 725 542 tonnes of C&DW being generated in 2011 of which only 756 087 tonnes were being recycled. It is therefore imperative, based on the magnitude of this waste stream, that it be prioritised.

2.5 It is therefore intended to establish a pilot site for the recycling of C&DW (crushing of C&DW) with some or all of the crushed material being used for the manufacturing of blocks (e.g. compressed earth blocks, concrete blocks, etc.) that could be used in the construction of new housing.

2.6 It is also intended for the project to be used as a vehicle to foster inclusive growth and job creation through the sourcing, training and mentoring, and handing over of the project to beneficiaries from historically disadvantaged groups and who require social and economic upliftment (e.g. informal sector, unemployed youth, etc.).

3. **OBJECTIVES**

The objectives of the project are to:
3.1 Establish a pilot C&DW recycling and block making facility that will then be used as a basis to pilot the concept (as detailed in these Terms of Reference), learn from it, and then use it as a basis for rolling out of similar facilities nationally

3.2 Use the project as a vehicle for inclusive growth and job creation through the sourcing, training and mentoring, and handing over of the project to beneficiaries

4. **SCOPE AND EXTENT OF WORK**

4.1 The work shall entail:

- A detailed project plan
- Identification, negotiation, and securing of the site(s) that will be used for the C&DW crushing and block making operations – the location of the site should ensure sufficient feedstock of C&DW on an ongoing basis whilst also minimising logistics and other related costs (it is envisaged that the site(s) will be located at or very close to a landfill)
- Identifying the possible products that could be produced from the site based on market demand and the types of feedstocks that will be available, and ranking them according to their profitability potential – products could include aggregates and manufactured blocks
- Developing a three year business plan for the project including detailed projections for the required feedstock, sales volume (per product type), labour requirements, plant and machinery, and financial performance (including a detailed operational budget)
- Develop the plant and machinery specification (based on the business and operational plans) that will then be used by the Waste Bureau for procurement thereof – please note that the equipment specified should be mobile
- Establishing the site in compliance with the Norms and Standards for Sorting, Shredding, Grinding, Crushing, Screening, Chipping and Baling of General Waste, 2017.
- Commissioning, and operationalising the requisite plant and machinery (that has been procured and supplied by the Waste Bureau) to enable the facility to function as per the approved business and operational plans
- Proposing the criteria for the selection of the beneficiaries (taking into account the objectives and requirements as detailed in these Terms of Reference) and thereafter sourcing and onboarding the beneficiaries as well as the required labour (if additional labour not forming part of the beneficiary group is required)
- Training and mentoring of the beneficiaries (and their employees, where applicable) throughout the project so that they are able to take over and independently manage the operation at the end of the project
- Developing of operational standards and procedures for the plant and site that must also comply with applicable regulations – this will include the identification of product quality and safety, health, and environmental management (SHEQ) risks and standards, and the development of procedures to manage these SHEQ risks and ensure compliance with the set standards and regulations

- Setting-up of the system to facilitate the recording of all activities in the site (including the recording of waste, product, and financial flows) and providing monthly progress reports in a format to be agreed with and approved by the Waste Bureau

- Managing of the facility in accordance to the approved business and operational plans, and where required optimize business and operational performance (in consultation with and with the approval of the Waste Bureau if not in accordance with the approved plans) in order to achieve the operational and financial targets as set in the plans

- Handing over of a financially viable site with all the required systems, guidelines, and appropriate documentation to the Waste Bureau (who will then subsequently handover to the beneficiaries).

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

---

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
