CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE

The purpose of these Terms of Reference is to:

1.1 Define the scope of work and the expected delivery outcomes of the project to be undertaken by the appointed service provider within the agreed timeframe and the allocated budget as well as to outline the conditions of appointment;

1.2 Provide a reference framework for conducting a prefeasibility study at identified sites/locations for the purpose of coastal infrastructure development to unlock socio-economic development opportunities;

1.3 To articulate the feasibility study and planning needs of the programme.

2. INTRODUCTION AND BACKGROUND

2.1 The Integrated Coastal Management Act 24 of 2008 enjoins us, inter alia, to secure natural persons equitable access to the opportunities and benefits of coastal public property while promoting sustainable use and enjoyment of the coastal protection zone.

2.2 The coastline of South Africa stretches for some 2 798 kilometres across four provinces, namely KwaZulu-Natal, Eastern Cape, Western Cape and Northern Cape. Our coastline is dynamic, diverse and provides an array of social and economic opportunities.

2.3 It has been observed that even after great strides have been made to achieve democracy and an equitable society in South Africa, coastal development and associated opportunities are not facilitated or distributed in an equitable manner. Rural areas are the most neglected. This is especially the case regarding the in all probability deliberately neglected “Transkei Gap”.
2.4 The Coastal Infrastructure Development (CID) initiative seeks to support the “Tourism” aspect of point 5 of the country’s 9-Point-Plan, point 5 being Operation Phakisa (Oceans Economy, Mining, Health, Tourism, Basic Education etc.).
2.5 It is a proactive effort to respond to needs and identify responses in a manner that provides advocacy to efforts that contribute to uplifting coastal communities, alleviating poverty and exposing coastal communities to socio-economic development opportunities.

2.6 In the context of Operation Phakisa, the CID initiative is targeted at coastal and marine tourism and may propose, indeed trigger small harbours development. It brings on board skills development and capacity building, research, technology and innovation as indeed every initiative should.
2.7 The CID seeks to identify challenges, needs and development opportunities through an informed and thorough process that utilises pre-feasibility studies to identify the most recommendable among a limited array of intervention scenarios. The recommended intervention (the Project) is then subjected to planning to a point where it is ready for implementation or construction.

2.8 The studies inform a more targeted flow of public investment funds, thus eliminating their potential fruitlessness from the beginning. These studies are also intended to secure from the outset, public participation and acquisition of buy-in from all interested and affected parties.

2.9 This bid is limited to the Eastern Cape Wild Coast. The areas or sites or locations within scope for prefeasibility study and subjection to planning of initiatives are Hluleka, Presley Bay, Lwandile, Mthatha Mouth, Coffee Bay, Mapuzi River Mouth and Hole in the Wall. The initiatives are somewhat
limited to the Coastal Protection Zone (as per Integrated Coastal Management Act, 2008) which stretches one kilometre inland from the high water mark outside urban areas.

2.10 We seek a balance between enhancing environmental protection and preservation on the one hand, and socio-economic development that benefits local communities on the other, while making a contribution to the coastal and marine tourism stimulation initiatives. The table below is a guide based on consensus emanating from the respective pre-lab.

Examples of Required Enabling Infrastructure

• Harbours, Boat Launch Facilities (Leisure craft; Fishing vessels; related small industries).
• Temporary accommodation (B&B establishments; B&B and Conference centres; Hotels; Backpackers' establishments; Restaurants)
• ORV sites and trails, hiking trails, resting sites, accommodation, security
• Ablution facilities, Visitor Centres
• Aquaria and Environmental education centres or facilities
• Facilities for educators, life savers, environmental compliance officers, beach cleaners, Working for the Coast staff
• Performing arts facilities, largely outdoors (Amphitheatre)
• Parking, pedestrian walkways
• Designed open spaces, public art

2.11 Prefeasibility study clusters

A suggestion of clusters for prefeasibility analysis in this project yields the list below. The famous Wild Coast hiking trail traverses all three areas. So does coastal biking activity. Suggestions of activities to accommodate or infrastructure to erect are not meant to constrain creative generation of ideas. They are meant to establish the broad direction.

2.11.1 Hluleka to Mthatha Mouth segment

➢ Infrastructure or facilities that enhance or support the Hluleka Nature Reserve;
➢ Off-Road Vehicle (ORV) recreational destinations and trails, support infrastructure;
➢ Boat launch site;
➢ Aircraft landing strip;
➢ Other tourism stimulation and SMME development magnet.

2.11.2 Mapuzi River Mouth node

➢ Mapuzi small craft harbour (fishing craft, leisure craft);
➢ Mini waterfront (accommodation, braai and events lapa, entertainment);
➢ Mapuzi golf course re-development;
2.11.3 Hole in the Wall

- Accommodation/resort, entertainment;
- Camping site;
- Traditional village, exhibition of local art;
- Boardwalk with viewing platforms;
- Ridge development.

The recommended project package will emerge through the mutual consultations and/or workshops and may be drawn from across the above clusters at the reasonable discretion of DEA. The projects so selected will be executed up to Stage 4.2 of Standard Architectural Services, stopping just short of calling for tenders. As a guide, for buildings of private interest (b&b, hotel, shopping complex etc.), conceptual designs will be expected, as well as construction documentation for the delivery of serviced sites for each respective facility. Design development (Stage 3) in this instance is thus excluded.

2.12 “Low-hanging Fruit” or the must do projects

There are small projects that are deemed necessary, and that will not be subjected to a special study other than viabilities as contemplated in Standard Architectural Services. They are the following:

- Safe children’s amusement centre (water world, ablutions, tuck shops, accommodate attractive adult oversight concept);
- Visitor information centre (in consultation with Tourism);
- Marine life and environmental education centre, exhibit space, etc.;
- Work rooms and facilities for staff (compliance officers, working for the coast, working on fire, educators etc.);
- Life savers’ facilities;
- Temporary accommodation e.g. B&B and Conference Centre (conceptual design, construction documentation for delivery of a serviced site for the facility);
- Pockets of paved vehicle parking (for staff and patrons of facilities, peak season busses, taxis, private vehicles);
- Paved pedestrian walkways (also aim to ease peak season pedestrian congestion).

Except where the contrary is stated, these projects will be executed up to Stage 4.2 of Standard Architectural Services, therefore cost estimates and bills of quantities will be produced, stopping just short of calling for tenders.

3. **OBJECTIVES OF THE PROJECT**

The objectives of the Project are:

3.1 To compile a Prefeasibility Study Report relating to projects or project clusters at identified Eastern Cape Wild Coast areas, sites or locations. This step culminates in the articulation of the recommended intervention(s) (the Project), and its further processing as detailed in “Scope and Extent of Work” below;

3.2 To provide departmental decision-makers and government with sufficient information to justify acceptance, modification or rejection of any and all of the intervention scenarios or project clusters;

3.3 To develop a comprehensive assessment tool as a prioritisation framework to be used for Coastal Infrastructure Development initiatives comprising of PESTLE (Political, Economic, Social, Technological, Legal & Environmental) factors or utilising any advanced methods and analytical tools;
3.4 To conduct project formulation and internal DEA approval facilitation utilising at relevant project cycle stations, three (3) internal stakeholder consultations;

3.5 Obtain buy-in from all relevant stakeholders of the recommended Project through external stakeholder consultations with various interested and affected parties at relevant project cycle stations;

4. **SCOPE AND EXTENT OF WORK**

4.1 Expected Study Outcomes

The prefeasibility study for the identified site/location is expected to generate the following outcomes:

4.1.1 Three (3) main infrastructural intervention scenarios are generated through a process that uses a recorded “basket of possibilities”, reviewed available material/publications as well as internal and external stakeholder consultations. A guide is given in paragraph 2.11 above;

4.1.2 An analysis of the generated scenarios with a view to identification of a preferred, therefore proposed intervention scenario to address problems in the economic, social and environmental sectors;

4.1.3 The proposed scenario may draw projects coming from different initial clusters, and such projects may be in different locations, all at the discretion of DEA;

4.1.4 An analysis the proposed scenario based on preliminary designs, taking account of technical, economic, financial, institutional, management, environmental, socio-cultural, regulatory and operational aspects;

4.1.5 Recommendation of the preferred scenario (the Project), detailing the expected benefits to the users and beneficiaries within the project’s lifetime, and its contribution to the environmental, social and economic development of the region.
4.1.6 A preliminary indication of the envisioned project activities, resources required, timing or phasing and estimated costs - all within a preliminary logical framework;

4.1.7 An assessment of the potential sustainability of the project results;

4.1.8 Recommendations for further actions in the formulation of the project, possibly also financing proposals where relevant;

4.2 Issues to be reviewed

4.2.1 Relevance of the Project to and consistency with national policy initiatives, coastal protection zone governance, development issues, district and local municipality planning and development objectives;

4.2.2 High level Feasibility of the Project:

4.2.2.1 Overall objectives;

4.2.2.2 Project purpose;

4.2.3.2 Initial cost estimates;

4.2.3.3 The organisational format of the implementing structure, the phasing where applicable, and implementation.
4.3 Work Plan

4.3.1 The service provider is expected to submit a work plan with their offer. Such work plan will contain the bidder’s articulation of the brief to ensure understanding and alignment.

4.3.2 It will contain a project plan, task analysis, an assignment organisational chart, manning schedule etc.;

4.3.3 The work plan will also set out the service provider’s approach to key project activities.

4.4 Expertise required

The ideal project team will require professional built environment architectural, engineering or project management practitioners registered in terms of the relevant professional councils to assume the project management role;

The projects manager must interact with:

4.4.1 Municipal and other state authorities;
4.4.2 Town and regional planner(s);
4.4.3 Architects and urban designers;
4.4.4 Professional land surveyors and/ or GIS practitioners;
4.4.5 Environmental scientists and integrated coastal management personnel;
4.4.6 Traditional authorities and other local stakeholders.

4.5 Reporting

4.5.1 The week of the issuing of a purchase order for the assignment shall be deemed week zero (0). The service provider will present an inception report (±8-15 pages) by the end of week two (2). This report will set out the service provider’s detailed work plan for the study based on their initial scan of conditions in the field;
4.5.2 The service provider will prepare an interim report by the end of week fourteen (14). In this report, the various options reviewed by the service provider will be described in sufficient detail to enable an informed decision to be made on the further development of the preferred option (the Project), which will be recommended by the service provider at this stage;

4.5.3 As a separate project stream, selected sub-projects of the Project (the preferred Project cluster) will at this stage go to planning implementation (where applicable, up to Stage 4.2 of Standard Architectural Services, including costing and bills of quantities, but short of calling for tenders). Meanwhile the prefeasibility study report compilation continues. A planning update meeting on these will be held every four (4) weeks at an agreed location until final submission end of week thirty six (36);

4.5.4 For the sub-projects referred to in 4.5.3 above, the necessary EIA processes, municipal building approval application processes and any institutional consultations must be embarked on timeously, and concluded by the end-date of the Project where this is practicable.

4.5.5 The study conclusions must be presented in the relevant section of the Prefeasibility Study Report. The underlying analysis is to be presented in appendices to the Report;

4.5.6 At the draft prefeasibility report stage a presentation will be made to the project steering committee. A Draft Prefeasibility Study Report in five hard copies and a soft copy is to be presented to the Programme Manager for comment by the end of week twenty (20) of the project. By end of week twenty two (22) comments will be received from the Programme Manager and members of the Project Advisory Committee;

20. QUALIFYING SMALL ENTERPRISE (QSE)

A business with an annual turnover more than R10 million but less than R50 million qualifies as a Qualifying Smaller Enterprise (QSE). The QSE scorecard was gazetted in May 2015.

All QSE's are required to use all 5 elements on the amended BEE Scorecard:

1. Ownership
2. Management Control
3. Skills Development
4. Enterprise and Supplier Development
5. Socio-Economic Development
A QSE which is 100% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

Please note a QSE for Specialised Enterprises which is 75% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

QSEs are required to qualify under one of the following criteria in order to receive a QSE certificate;

- At least 25% of costs of sales excluding labour costs and depreciation must be procured from local producers or local supplier in SA (for service industry labour cost are included but capped to 15%)
- 50% of jobs created are for black people provided that the number of black employees since the immediate prior verified B-BBEE measurement is maintained.
- At least 25% transformation of raw material/beneficiation which include local manufacturing, production and/or assembly, and/or packaging.
- At least spend 12 days per annum of productivity deployed in assisting black EME's and QSE's beneficiaries to increase their operation or financial capacity.
- At least 85% of labour costs should be paid to South African employees by service industry entities.

21. EXEMPTED MICRO ENTERPRISES (EME’S)

- With the new B-BBEE Codes of Good Practice gazetted on 11 October 2013, enterprises with an annual turnover less than R10 million qualify as an EME. Please note that this does not apply to those who fall within gazetted Sector Codes (i.e those in Construction, Forestry, Tourism, Transport, Chartered Accountancy (CA), Information and Communication Technology (ICT), Property, Agriculture, Financial Services) until these Sector Codes
have been updated. The only requirement is a Sworn Affidavit confirming turnover for the past 12 months and the level of black ownership of an enterprise. EMEs then automatically qualify as follows:

- <51% Black owned will qualify for Level 4 BEE status
- ≥51% but <100% Black owned will qualify for Level 2
- 100% Black Owned will qualify for Level 1
