1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE
To appoint Project Management Company(s) to plan and implement the key management plan activities for biodiversity stewardship sites located in critical biodiversity areas for the Land Rehabilitation project within the Environmental Programmes for a period of 6 months in Phumelela, Kamiesberg and Matatiele Local Municipalities within Thabo Mofutsanyane, Namakwa, and Alfred Nzo Districts in the Free State, Northern Cape and Eastern Cape Provinces.

2. INTRODUCTION AND BACKGROUND
The project aims to achieve biodiversity gains by supporting community stewardship sites and private landowners located in critical biodiversity areas with the implementation of management plan actions and job creation for qualifying community and private stewardship projects. The focus of the project is on supporting communities and landowners in a post-COVID 19 reality with government funding through the presidential economic stimulus package to support actions to maintain and manage the protected area and conservation estate secured through provincial biodiversity stewardship programmes.

Management plans are required to ensure compliance with the National Environmental Management Act, Act 57 of 2003 and any other relevant legislation for biodiversity stewardship sites declared as protected areas. They provide tools for protected area management authorities and their partners in strategic planning and the management of protected areas.

The purpose of the management plan is to serve as the primary tool to assist the management authority (landowner or land user) and partners in strategic planning and management of a biodiversity stewardship site. Furthermore, it is used to identify costs, motivate for financial resources for management interventions, helps build accountability into management, provides for capacity building interventions and continuity in management.

Community stewardship sites in particular have limited resources to allocate to the implementation of their management plans. Often, NGOs and where possible, provincial conservation agencies, support communities with technical expertise and resources to implement key actions identified in the management plan. Landowners need to be financially stable to allow them to execute the management actions and activities which are outlined in the management plan. Often, communally-owned and communally-managed sites do not have the required financial stability needed to implement accordingly.
3. OBJECTIVES

To appoint the Project Management Company(s) to plan and implement the key management plan activities for biodiversity stewardship sites located in critical biodiversity areas for the Land Rehabilitation project within the Environmental Programmes for a period of 6 months in the Phumelela, Kamiesberg, and Matatiele Local Municipalities within Thabo Mofutsanyane, Namakwa, , Alfred Nzo Districts in the Free State, Northern Cape and Eastern Cape Provinces.
