THE APPOINTMENT OF A SERVICE PROVIDER TO DEVELOP AN EASY READ AND ONLINE FRIENDLY INVESTMENT CATALOGUE PROFILING THE BIODIVERSITY BASED ECONOMIC OPPORTUNITIES IN SOUTH AFRICA ESPECIALLY THOSE ASSOCIATED WITH LAND REFORM AND EMERGING WILDLIFE RANCHERS
1. REQUEST FOR PROPOSAL (RFP)

Develop an easy read and online friendly Investment Catalogue profiling the biodiversity based economic opportunities in South Africa especially those associated with land reform and emerging wildlife ranchers.

2. INTRODUCTION AND BACKGROUND

2.1 The Department has embarked on the development of the National Biodiversity Economic Strategy (NBES) targeting, amongst others, wildlife and bio-prospecting economies. The overall aim of the strategy is to provide an implementation framework for a period of 10 years to achieve optimum economic benefits—direct, indirect and induced—from the commercialization of biodiversity in South Africa. The strategy will contribute to the reduction of poverty through the development and capitalization of resources currently available in areas where the poorest of South Africa live, thus incorporating marginalized communities into the market economy. The strategy will support inclusive economic opportunities through the harmonization of modernization and rural development.

2.2 The wildlife economy contributes about R9.1 billion annually and has been growing at an annual turn-over rate of 20.3% over the past 10 years. It creates more than 100 000 jobs across the country. The national Department of Environmental Affairs calculated that the revenue generated directly by hunting in 2013 was R4.9 billion. A daily price for a hunter accompanied by a professional hunter is estimated at R4 500. In 2014, trophy prices ranged from R350 000 for an elephant and R135 000 for a buffalo to R4 500 for a bush pig. The Absa Agricultural Outlook states that the world supply of venison is 60 000 tons short of demand and South Africa’s exports of approximately 2000 tons per annum is valued at about R200 million. New Zealand with less animal’s diversity and small fraction in terms of land size, exports 41 times greater than SA. Game auctions showed a rising trend from 18 200 game animals traded in 2012 at 58 auctions to a total of 23 963 animals in 2013 which were sold at the 67 official SA game auctions generating R1.2 billion.
2.3 The new “Wildlife Economy Program” which is being pursued and implemented by the Department Environmental Affairs is in line with the fundamental objectives of the National Development Plan of government whose key tenets are poverty reduction, job creation, skills development, research, food and environmental security and equity. The program provides for a sustainable rural development approach for land reform through the enhancement of rural livelihoods, the protection and restoration of their natural assets, promoting and securing tenure of these assets. It promotes diversification and sustainable rural enterprises and industries by enabling emerging wildlife ranchers and community landholders to participate in the mainstream wildlife economy as shareholders and entrepreneurs.

2.4 It is estimated that over the next 10 years the Department of Environmental Affairs will in collaboration with other role players, especially the Department of Rural Development of Land Restitution, Chief Land Claims Commission and private sector to achieve the following:

- Create more than 60 000 new sustainable employment opportunities and secondary beneficiaries in the industry;
- Restore and develop two (2) million hectares of communal land and unproductive farms into well operated commercial game ranches and reserves;
- In partnership with conservation agencies, introduce, breed and manage 300 000 new heads of game with landholders;
- Build more than R7 billion worth of equity for emerging wildlife farmers and community landholders in the form of ownership of game, fixed assets and infrastructure;

2.5 The natural products sector/bio-prospecting sector includes any product produced from biological ingredients of indigenous plant, animal and any other organism (e.g. microorganism). These products could be of a pharmaceutical, cosmetic, industrial (functional), nutraceutical, or aesthetic nature. Resources utilized in bio-prospecting and bio-trade including whole organisms, parts thereof as well as parts that contain hereditary information or biochemical compounds. Bio-trade refers to the buying and selling of dried and sliced, and/or milled or powdered components, and/or extracts of indigenous biological resources for further commercial exploitation or bio-prospecting.
Many of the species of indigenous biological resources are traditionally used for food, medicines or cultural purposes and traded for these purposes. Other products with commercial potential for industrial or pharmaceutical application are micro-organisms, marine organisms, gums and resins and venoms.

2.6 The biggest challenge for emerging farmers and black landholders is the lack of critical resources such as capital, knowledge as well access to markets. Specifically, resources that are needed to build infrastructure and buildings, enterprise development, capacity building, mentorship and job creation. Co-ordination and leveraging on the resources and strength of the various partners in the industry, particularly between government land owners and private sector, are essential for successful growth of the sectors.

3 OBJECTIVES

The purpose of the investment catalogue is to raise awareness among potential investors and development funding institutions about the Wildlife Economy Program, bio-prospecting initiatives and associated investment opportunities, mobilization of resources to support the implementation of the programs and promote commercial partnerships between the emerging farmers and private sector.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
