CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE

To appoint a service provider to assist the Department of Environmental Affairs (DEA) to develop a national Buffering Mechanism Policy for World Heritage Sites in South Africa. The national Buffering Mechanism Policy for World Heritage Sites is envisaged to be a comprehensive policy designed to integrate measures required to protect the Outstanding Universal Value (OUV) of the World Heritage Sites.

2. INTRODUCTION AND BACKGROUND

South Africa is a party to the World Heritage Convention of 1972. The obligations of the state parties to the Convention are to: ensure the identification, protection, conservation, presentation and transmission to future generations of the cultural and natural heritage situated within their territory and also to implement the Operational Guidelines for the implementation of the convention.

South Africa has translated the Convention into South African law through the World Heritage Convention Act No. 49 of 1999 (the ‘WHCA’). The Minister of Environmental Affairs is responsible for the enforcement and administration of the WHCA. In addition to the powers and duties conferred upon the Minister by the WHCA, the Minister has certain powers in terms of section 24(2)(a) and (b) of the National Environmental Management Act no. 107 of 1998 (the ‘NEMA’) regarding authorisation of activities. In terms of these powers the Minister may identify geographical areas based on environmental attributes, and as specified in spatial development tools, in which specified activities may not commence without an environmental authorisation from a competent authority. The Minister may identify (specify) geographic areas and activities in liaison with MECs of provinces. The MECs of provinces are the designated competent authorities for development activities taking place in the Buffer Zones of World Heritage Sites, while the Minister is the competent authority in the Core areas of World Heritage Sites. Development activities can be allowed in the Buffer Zones of WHS as long as such activities are deemed not to cause any harm to the Outstanding Universal Value (OUV) of the WHS.

In the context of the World Heritage Convention, there are two concepts that are important namely, World Heritage Site (the Core) and the buffer zone. A World Heritage Site is a site that is inscribed on the World Heritage List which has Outstanding Universal Value (OUV) and that meets the conditions and
requirements of authenticity and integrity. The World Heritage Site includes within its borders all of the attributes that are recognized as being of OUV. A buffer zone is an area surrounding the nominated site which has complementary legal and/or customary restrictions placed on its use and development to give an added layer of protection to the site.

The Operational Guidelines for the implementation of the World Heritage Convention have been subjected to revision since they came into force in 1977. During the inscription of World Heritage Sites between 1977 and 2004, the buffer zone requirements appeared less stringent and were not strictly adhered to. For Sites inscribed from 2005 to date, the State Parties were required to delineate a buffer zone. In terms of the paragraph 103 to 106 of the Operational Guidelines, State Parties are now required, when nominating a site to include in the nomination dossier, the area constituting the buffer zone and also provide details on the size, characteristics and authorized uses on the buffer zone, as well as a map indicating the precise boundaries of the property and its buffer zone. Paragraph 106 of the Operational Guidelines further states that where no buffer zone is proposed, the nomination dossier should include a statement justifying why a buffer zone is not required.

In this regard, a regional workshop on Buffer Zones was held on 18-20 October 2016 in Mpumalanga to assist with the improved management of buffer zones in Africa, and to reflect on best practices for a more efficient and inclusive framework for improved buffer zone management on the African continent. At this workshop, the concept of Buffering Mechanisms was introduced. The participants in the workshop argued that in cases where there is no need for the delineation of a buffer zone, various buffering mechanisms aimed at protecting the Outstanding Universal Value of the Site can be utilised. It was further emphasised that buffer zones/buffering mechanisms ought to be seen as one potentially effective and valuable strategy for World Heritage Sites (and Protected areas) which seek to: protect the values of the property from threats that originate outside its boundaries, thus enhancing its integrity; create linkages between a protected area and the wider area that surrounds it, and; protect other natural and cultural values of the site. This workshop resulted in the development of a Guideline for the Management of Buffer Zones.

Following the workshop, South Africa was advised to consider the development of a national Policy in addition to the Guideline document. This also necessitated a need to develop a National Buffering Mechanism Policy for World Heritage Sites in SA to guide Strategies that may be developed by Management Authorities.
The Minister of Environmental Affairs published for implementation the Biodiversity Strategy for South Africa: Strategy on buffer zones for National Parks on the 8th of February 2012. The development of the Buffer Zone Strategy was motivated by the realization that national parks tend to be negatively affected by development activities within them or in areas adjacent to them. In this regard, the strategy sets out the South African government's national strategy on the establishment and management of buffer zones around national parks in order for national parks to better meet their objectives.

The national Buffering Mechanism policy for World Heritage Sites is envisaged to be a comprehensive policy that will integrate measures required to protect the Outstanding Universal Value (OUV) of World Heritage Sites.

3. OBJECTIVES

The objectives of the National Buffering Mechanism Policy for World Heritage Sites in SA are as follows:

- To set principles on the various buffering mechanisms that could be used to protect the OUV of the World Heritage Sites.
- To stipulate the roles and responsibilities of various role-players for the identified buffering mechanisms.
- To provide guidance to the Management Authorities in implementing the Policy in their respective sites taking into account the existing planning frameworks and tools.

4. SCOPE AND EXTENT OF WORK

The appointed service provider will assist the Department of Environmental Affairs (DEA) with the development of a national Buffering Mechanism Policy for World Heritage Sites in SA. The appointed service provider will undertake the following activities:

4.1 Conduct a synthesis study on Buffering Mechanisms for World Heritage Sites and ensure that such Mechanisms are legally aligned, compatible and embedded in sectoral plans and other decision-making frameworks in the areas in which the Sites are located.

4.2 Develop a key Stakeholder Engagement Work Plan, outlining a consultation methodology in detail as well as any plans for the facilitation of meetings or workshops that may be envisaged;
4.1.3 Undertake consultation with all relevant and key stakeholders with respect to integrating the National Buffering Mechanism Policy into land-use Planning Instruments and Policies;

4.1.4 Identify the buffering mechanisms that could be used by Management Authority to protect the OUV of the World Heritage Site;

4.1.5 Consult with competent authorities with respect to the implementation of the National Buffering Mechanism policy on the implication of NEMA and the associated EIA regulations and other applicable legislation;

4.1.6 Clarify the roles and responsibilities of various role-players for the identified buffering mechanisms; and

4.1.7 Identify any gaps or areas that need to be amended in relevant legal tools or instruments.

16. GUIDANCE FOR EVALUATION COMMITTEE

IN EVALUATING THE TECHNICAL INFORMATION CONTAINED IN THE BID, THE EVALUATION COMMITTEE WILL BE GUIDED BY THE FOLLOWING:

- Bidder’s understanding of the brief – The bid provides a clear indication that the bidder fully understands the purpose and scope of the work and the bidders’ own roles and functions in this regard.
- Capability and experience – The bid provides a clear indication that the bidder’s team comprises people with the necessary experience, skills, qualifications, knowledge and skills required to ensure the efficient and effective generation of the required deliverables to the highest standards of quality.
• **Track Record** – The bid provides clear information on previous, relevant projects that confirm that the bidder has the required experience and success track record in the area of general project management and management related projects.

• **Qualifying Small Enterprise (QSE):**

A business with an annual turnover more than R10 million but less than R50 million qualifies as a Qualifying Smaller Enterprise (QSE). The QSE scorecard was gazetted in May 2015.

All QSE’s are required to use all 5 elements on the amended BEE Scorecard:

1. Ownership
2. Management Control
3. Skills Development
4. Enterprise and Supplier Development
5. Socio-Economic Development

A QSE which is 100% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

Please note a QSE for Specialised Enterprises which is 75% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

QSEs are required to qualify under one of the following criteria in order to receive a QSE certificate;

- At least 25% of costs of sales excluding labour costs and depreciation must be procured from local producers or local supplier in SA (for service industry labour cost are included but capped to 15%)
- 50% of jobs created are for black people provided that the number of black employees since the immediate prior verified B-BBEE measurement is maintained.
- At least 25% transformation of raw material/beneficiation which include local manufacturing, production and/or assembly, and/or packaging.
- At least spend 12 days per annum of productivity deployed in assisting black EME’s and QSE’s beneficiaries to increase their operation or financial capacity.
- At least 85% of labour costs should be paid to South African employees by service industry entities.
• **EME’s (Exempted Micro Enterprises)**

  With the new B-BBEE Codes of Good Practice gazetted on 11 October 2013, enterprises with an annual turnover less than R10 million qualify as an EME. Please note that this does not apply to those who fall within gazetted Sector Codes (i.e. those in Construction, Forestry, Tourism, Transport, Chartered Accountancy (CA), Information and Communication Technology (ICT), Property, Agriculture, Financial Services) until these Sector Codes have been updated. The only requirement is a Sworn Affidavit confirming turnover for the past 12 months and the level of black ownership of an enterprise. EMEs then automatically qualify as follows:

  • <51% Black owned will qualify for Level 4 BEE status
  • ≥51% but <100% Black owned will qualify for Level 2
  • 100% Black Owned will qualify for Level 1
