THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases/lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US$10 million or other currency equivalent to US$10 million will have a NIP obligation. This threshold of US$10 million can be reached as follows:

(a) Any single contract with imported content exceeding US$10 million.

or

(b) Multiple contracts for the same goods, works or services each with imported content exceeding US$3 million awarded to one seller over a 2 year period which in total exceeds US$10 million.

or

(c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US$10 million.

or

(d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US$3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US$10 million.

1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a pro-rata basis.

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of R10 million (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1.(b) to 1.1. (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

a. the contractor and the DTI will determine the NIP obligation;
b. the contractor and the DTI will sign the NIP obligation agreement;
c. the contractor will submit a performance guarantee to the DTI;
d. the contractor will submit a business concept for consideration and approval by
   the DTI;
e. upon approval of the business concept by the DTI, the contractor will submit
detailed business plans outlining the business concepts;
f. the contractor will implement the business plans; and
g. the contractor will submit bi-annual progress reports on approved plans to the
   DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor)
and, therefore, does not involve the purchasing institution.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.³

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and/or services for purchasers who wish to acquire goods and/or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
CERTIFICATE OF INDEPENDENT BID DETERMINATION

I, the undersigned, in submitting the accompanying bid:

TEMPLATE SPECIFICATION/TERMS OF REFERENCE FOR OUTSOURCING OF AN ENVIRONMENTAL MANAGEMENT FRAMEWORK (EMF) FOR MAPUNGUBWE CULTURAL LANDSCAPE WORLD HERITAGE SITE FOR A PERIOD OF FOURTEEN MONTHS.

PART ONE

1. REQUEST FOR PROPOSAL (RFP)

1.1. The objective of this RFP is to appoint a suitable independent Service provider/s that can support Department of Environmental Affairs (DEA) in collaboration with SANParks and Limpopo Department of Economic Development, Environment and Tourism (LEDET) with the development of an Environmental Management Framework (EMF) for Mapungubwe Cultural Landscape World Heritage Site (MCLWHS).

1.2. Preference may be given to a Service Provider/s that is not already performing consultancy work within DEA.

2. SCOPE AND EXTENT OF WORK

2.1. The role of the Service Provider/s is to assist the DEA, LEDET, surrounding district and local municipalities and other sector departments to develop an EMF for MCLWHS in terms of Regulation 3 of the Environmental Management Framework Regulations of Government Notice No. R 547 which appeared in the Government Gazette No. 333406 of 18 June 2010.

2.2. As part of the request for proposal, the service provider/s shall submit a preliminary budget containing the hours and amount to be spent on each output.

2.3. Companies may be invited to give presentation as and when required.
3. BACKGROUND OF THE STUDY AREA

Figure 1: Indicating the core and proposed buffer area of the Mapungubwe Cultural Landscape WHS in terms of the declared area.

3.1. The Mapungubwe Cultural Landscape was inscribed on the United Nations Education, Scientific and Cultural Organization (UNESCO) World Heritage List in 2003 and proclaimed as a World Heritage Site in terms of the World Heritage Convention Act, (No. 49 of 1999). This recognition of the area by the international community was as a result of existing archaeological remains of the largest ancient settlement of a powerful indigenous kingdom in the Southern African sub-continent that existed between 900 and 1300 AD before the area was abandoned. The South African Heritage Resources Agency (SAHRA) recognised this significance by declaring the area as a National Heritage Site in terms of the National Heritage Resources Act, (Act No 25 of 1999).

3.2. The extensive landscape surroundings of the archaeological remains are today a back-drop for the site. Some farms still remain, growing citrus in irrigated fields. In the valley irrigation allows large scale commercial and game farming. The agricultural enterprise is in the final phase at Mapungubwe and much of the core of the landscape is now been returned largely to its unimproved state with wild grazing game animals.
3.3. The area is currently threatened by possible changes of land use. Much of the land of high
conservation importance surrounding Mapungubwe is owned privately. It is within these privately
owned areas that interventions are needed to help conserve the integrity of the area by
encouraging land use and tourism activities which are compatible with the Outstanding Universal
Value (OUV) of the area and biodiversity conservation. The potential impact of mining on the
OUV, natural environment and ecology has not been adequately assessed.

3.4. Therefore, an EMF for Mapungubwe Cultural Landscape will be very crucial for guiding the land
use development within World Heritage Site and surrounding important biodiversity areas. The
ultimate goal is to ensure that the OUV for which Mapungubwe is inscribed on the World
Heritage List is conserved for the benefit of current and future generations.

4. PROJECT MANAGEMENT

After appointment, the consultant/s will meet with the relevant DEA officials to:

4.1. Establish the project management team which should include DEA, LEDET, surrounding district
and local municipalities and agree upon the roles and responsibilities of this team.

4.2. Establish a Project Steering Committee, which should include representatives from the DEA,
LEDET, SANParks, District and Local municipalities, Limpopo Department of Sports, Arts,
Culture and Recreation, Department of Energy (DoE), Limpopo Department of Local Government

• The Status Quo report must specify the attributes of the environment in the area, including the sensitivity, extent, interrelationships and significance of those attributes.
• During the preparation of the Status Quo report, data collection must include ground truthing in areas where no information is available and / or in order to update old existing information. It should be noted that the Department has extensive GIS information which will be made available to the consultant for use. No data should be collected without consultation with the GIS section within the Department.
• A status quo draft report must be submitted to the project team for comments prior to finalisation. This report will form the basis of consultation to establish the desired state of the environment and develop strategies to be implemented in order to guide development in the study area.

6.2. The Desired State of the Environment (DSoE)

• The Status Quo Report must be used to facilitate a public consultation process through which the desired state of the environment for the area will be established.
• The desired SoE must be compiled using a comparison analysis on the findings of the Status Quo Report.
• This desired SoE must be spatially represented in the same format as in the status quo report to enable comparison.
• The desired SoE will need to detail the identified conflicts over land use planning and identify strategies for dealing with conflicts.
6.3. **Environmental Management Zones**

- Based on the spatial component of the desired state of the environment and bio-physical constraints and opportunities, the study area must be divided into environmental management zones. The zones are to be spatially represented.
- The zones are to identify developments that would be:
  - Desirable in an area
  - Undesirable in an area
  - Development activities which should be allowed to take place in the specific areas without authorisation
  - Development activities which would require authorisation

6.4. **Strategic Environmental Management Plan**

- A Strategic Environmental Management Plan (SEMP) that will address management guidelines and responsibilities, which will include but will not be limited to:
  - A strategy for maintaining productive agricultural activity on land where agriculture has been identified as a feasible and desired land use;
  - A strategy to maintain the Outstanding Universal Value of the MCLWHS;
  - A strategy to enhance resource economics of the entire study area;
  - A strategy for maintaining biodiversity conservation on land where biodiversity conservation has been identified as a feasible and desirable land use;
  - A strategy for maintaining land as open spaces where identified as appropriate
  - The SEMP document must include all relevant action plans required for the implementation of the EMF linked to institutional framework, a system to evaluate, monitor and report on progress made towards the state of the environment and land uses in the study area. A realistic set of parameters coupled with measurable time scales must be developed.
  - A draft copy of the report must be circulated for comment to identified stakeholders.
• After incorporation of comments, the draft EMF report would need to be work shopped with the project management team and the relevant stakeholders.

• The service provider must then effect the changes derived from the workshop. The final EMF report must then be presented to the Project Steering Committee.
