THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1 PILLARS OF THE PROGRAMME

1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US$ 10 million or other currency equivalent to US$ 10 million will have a NIP obligation. This threshold of US$ 10 million can be reached as follows:

(a) Any single contract with imported content exceeding US$10 million.

or

(b) Multiple contracts for the same goods, works or services each with imported content exceeding US$3 million awarded to one seller over a 2 year period which in total exceeds US$10 million.

or

(c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US$10 million.

or

(d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US$10 million.

1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a pro-rata basis.

1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at Elias@thedti.gov.za for further details about the programme.

4 PROCESS TO SATISFY THE NIP OBLIGATION

4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:

a. the contractor and the DTI will determine the NIP obligation;
b. the contractor and the DTI will sign the NIP obligation agreement;
c. the contractor will submit a performance guarantee to the DTI;
d. the contractor will submit a business concept for consideration and approval by the DTI;
e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
f. the contractor will implement the business plans; and
g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a \textit{pe se} prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.

   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this bid invitation relates.

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

TERMS OF REFERENCE FOR OUTSOURCING THE ASSESSMENT OF REQUIREMENTS FOR MUNICIPALITIES TO FULLY UNDERTAKE AIR QUALITY FUNCTIONS: A BUSINESS CASE

PART ONE

1. BACKGROUND

The department would like to procure the services of a service provider who has expertise in the field of business case development, to develop a business case in relation to the resource requirements for municipalities to fully undertake air quality management functions as stipulated in the National Environmental Management: Air Quality Act, 2004 (Act No.39 of 2004).

Section 24 of the Constitution mandates government to ensure that ambient air quality is not harmful to health and well-being. It is this constitutional requirement that underpinned the promulgation of the National Environmental Management: Air Quality Act, 2004 (Act 39 of 2004), hereafter referred to as AQA, and the subsequent repeal of the APPA (Atmospheric Pollution Prevention Act). With the promulgation of AQA, most air quality functions were shifted from the National Department to local government. The AQA in its various sections is very particular about the specific roles and responsibilities of each sphere of government. Such roles are further elaborated in the National Framework for Air Quality Management in South Africa. Specifically Chapter 4 of the National Framework outlines the approach to governance, and refers to the governance cycle as framework for achieving continuous air quality improvement over time. All spheres of government, including municipalities have a number of responsibilities within the governance cycle shown in Figure 1
In line with the functions depicted in the governance cycle above, the AQA gives each municipality a number of exclusive air quality management responsibilities as summarised below:

The municipality must:

- Designate a municipal Air Quality Officer (AQO) from its administration.
- Develop an Air Quality Management Planning (AQMP) for inclusion in its Integrated Development Plan (IDP)
- Prepare an annual report including progress regarding the implementation of the AQMP and compliance with the plan.

The municipality may also:

- Establish municipal standards for emissions from point, non-point and mobile sources if a municipality, in terms of its by-laws, identifies a substance or mixture of substances in ambient air which through ambient concentrations, bioaccumulation, deposition or any other way, presents a threat to health or well-being or the environment, or which the municipality reasonably believes presents such a threat.
- Require the appointment of an Emission Control Officer in a given company (Section 48 of AQA), thereby extending the powers of the authority by ensuring that the Emission Control
Officer is responsible for the company applying the correct measures to minimise emissions.

In addition, Metropolitan and District Municipalities must:

- Implement the atmospheric emission licensing system, and carry out the responsibility for performing the functions of the licensing authority as set out in Chapter 5 of the AQA.

Table 1 below provides a summary of primary air quality management functions of municipalities taking into account both specific requirements under AQA and the governance cycle.

misleading information.

| Monitoring any information provided to an air quality officer to ensure that it does not contain false or misleading information. | S.51(1)(g) |

Over and above the primary functions listed above, municipalities are also responsible for providing **input** to all other aspects of air quality management as outlined in Chapter 4 of the National Framework for Air Quality Management– Governance cycle.

In ensuring that the constitutional mandates of municipalities are carried out effectively, the Municipal Systems Act provides mechanisms and procedures through which municipalities can provide such services.

**Problem statement**

Immediately following the promulgation and implementation of AQA, it became clear that, while some municipalities are coping with these responsibilities (table 1 above) there are others that are facing challenges in fully undertaking all the functions as required by the AQA. This is mainly because the undertaking of such functions requires investment in resources including:

- Human resources (AQM staffing, including special skills required)
- Finance (AQM operational and procurement budget)
- Infrastructure (e.g. AQ information systems, monitoring stations etc)
- Tools (e.g. Air Quality Management Plans, templates, manuals etc)
- Other resources

While the nature of resources required is the same across all municipalities, the extent to which these resources are required varies in between the municipalities depending on the size of the municipalities and the existing air quality issues. To this end, the Department of Environmental Affairs (DEA) has initiated a project that seeks to establish the requirements for municipalities to fully undertake air quality functions, and to develop a business case. It is expected that the outcome of this work will enable decision making in terms of appropriate resources (technical, financial and human) to be allocated to air quality management within municipalities.
To assist in fulfilling this task, the department is looking for a qualified service provider with experience in developing functionality business case (or similar work) to submit proposals.

2. REQUEST FOR PROPOSAL (RFP)

2.1. The objective of this RFP is to appoint an independent service provider/s with specific experience in business case development to support the Department of Environmental Affairs (DEA) with a project that seeks to establish the business case requirements for municipalities to fully undertake air quality functions.

2.2. It is expected that a multidisciplinary team will be required to successfully undertake this study. The successful service provider will have but not necessarily limited to the following competencies: good project management skills, have thorough knowledge of and experience in business case development, knowledge of research design, data collection, analysis and report writing, and have a good understanding of government legislative framework. Furthermore the appointed service provider should demonstrate:

2.3. Companies/service providers who were contracted to draft the Terms of Reference will not be considered.

3. SCOPE AND EXTENT OF WORK

3.1. Project Planning: The appointed Service Provider/s, in consultation with the Chief Directorate Air Quality Management will develop a detailed project process plan that clearly gives form and focus of the project, set direction, guidance and create the general process necessary to reach an ultimate goal. The submitted plan demonstrate an understanding of the project basis and background, understanding of air quality functions of the municipalities, a process for gathering information and for reaching goals, etc. This process plan must include, among other things, (i) a detailed description of how the appointed service provider intends to conduct the resource requirement audit, (ii) a Gantt Bar Chart detailing the timing and critical path of key activities and milestones; (iii) governance participation strategy; (iv) methodology and/or best practice in the field of business case development, auditing and planning.

Output 1: Project Process Plan (complete with a detailed skills development plan)

3.2. Stakeholder Participation: The development of the business case will be in accordance with the spirit and letter of the cooperative and participatory governance requirements and
principles contained in Chapter 3 of the Constitution, the National Environmental Management Act, Municipal Systems Act and the AQA.

Working in close cooperation with the DEA Sub-Directorate: Atmospheric Air Quality Management Planning, the appointed service provider will attend and facilitate 2 governance workshops (around 50 - 100 people each) to be hosted following the achievement of an appropriate project milestones. This will ensure that research outcomes are grounded in field experience. The DEA will take responsibility of all logistical arrangements for the workshops (venues, invitations, meals etc). The first workshop should be aimed at introducing and presenting the project concept to the governance structure for their buy-in, introduction of the appointed service provider and receive inputs from provinces and municipalities. The second workshop is aimed at presenting a draft document(s) to the governance structure.

Output 2: Workshop Reports

3.3. Auditing/status quo analysis: The appointed service provider will undertake an assessment that includes but not limited to the following:

- Air Quality Management structure in municipalities including vacancy rates
- Policies, plans and regulations in place
- Air Quality targets and objectives
- Air Quality Budget allocation
- Sentiment amongst the municipal management
- Integration of policies of other department that have an impact on Air Quality
- Ability of municipalities to undertake air quality management functions outlined in table 1
- Which municipalities are effective in carrying out the functions. (What is working where)

This will involve a review of existing air quality units/sub-units (or similar) in all district/metropolitan municipalities and compilation of a complete functional assessment of such units. The functional assessments will also involve assessment of financial
allocations and relevant national, provincial and other legislations governing and influencing municipal resource allocations.

The status quo analysis will also involve the identification of gaps, challenges and barriers to effective functioning of air quality units/subunits. Based on the analysis of gaps and barriers, the status quo assessment should include recommendations on key intervention points.

*Output 3: Status Quo Report*

3.4. **Development of a Business Case(s) and Model(s):** Based on the outcomes of the status quo analysis, the appointed service provider must develop a business case(s) for functional air quality units/sub-units at municipal level. The business case must also include a model of viable air quality units that are required for specific type of district municipality to undertake the air quality management work and deliver the results expected of it, in a value for money manner. Two to four business cases will be developed to take into account the size of the municipality and current (or anticipated) air quality issues. The development of the business case model(s) shall be based on qualitative and quantitative cost benefit analysis of the various option and take into account the risk factors. The business case should be aligned with and guided by the various relevant legislation including but not limited to, the Air Quality Act, 2004 (Act No. 39 of 2004); the National Framework for Air Quality Management; Municipal Systems Act, 2000 (Act 32 of 2000); Municipal Structures Act, 1998 (Act 117 of 1998); Municipal Finance Management Act and other treasury regulations etc.

*Output 4: Business Case Report*

3.5. **Costing:** The appointed service provider/s will undertake the following:
- The service provider/s shall submit a comprehensive budget containing the hours, amount to be spent on each case and inclusive of all expenses before work can commence.

3.6. **Extent of the Project:** The project seeks to develop a business case that is applicable nationally. However, for practical reasons, it is expected that the service provider may
sample a specific limited number of organization for the assessment. The minimum requirements in relation to the sample size is shown in the table below:

4. TIMING OF ASSIGNMENT
4.1. The project time line may not exceed 12 months from the date of signature of the SLR by both parties.

5. PERFORMANCE MONITORING
5.1. The performance measures for the delivery of the (specify the type of work you expect from the service provider/s) will be closely monitored by DEA.
5.2. The appointed service provider will be required to sign the Service Level Agreement (SLA) with the DEA before any work commence.
5.3. The SLA should be concluded and signed as soon as possible after awarding of BID. The successful bidder will be required to the project immediately after the final signature of the SLA.
5.4. The general conditions of the contract as provided by the National Treasury will be applicable.
